MARLEY VAUGHAN

Video Surveillance Systems for Use in Security Applications Taylor & Francis

Pinnacle Studio 10 is the latest version of the industry leading home video editing tool aimed at the Windows consumer market. In Pinnacle Studio 10 for Windows: Visual QuickStart Guide, veteran journalist and teacher Jan Ozer tackles Pinnacle Studio version 10 in classic and popular QuickStart style—with step-by-step instructions, plenty of illustrations, and straightforward language. Jan provides the skinny on all popular Studio 10 features like built-in DVD authoring with motion menus and custom navigation; Pan and Zoom, enabling users to quickly create engaging video slideshows from digital photos; SmartMovie II, a tool that let's you create home movies in minutes; dual monitor display; key framing special effects in real-time; and the Instant DVD Recorder. He also covers key Pinnacle Studio Plus 10 features including picture in picture (PIP); Chroma Key effects (green screen); and full HD editing, particularly creating HD slide shows from digital photos.

Advances in Computers University of Hawaii Press

This major new book brings together leading researchers in the field in order to describe and analyse internationally significant theoretical and empirical work on offender supervision, and to address the policy and practice implications of this work within and across jurisdictions. Arising out of the work of the international Collaboration of Researchers for the Effective Development of Offender Supervision (CREDOS), this book examines questions and issues that have arisen both within effectiveness research, and from research on desistance from offending. The book draws out the lessons that can be learned not just about 'what works?', but about how and why particular practices support desistance in specific jurisdictional, cultural and local contexts. Key themes addressed in this book include: New directions in theory and paradigms for practice Staff skills and effective offender supervision Different issues and challenges in improving offender supervision The role of families, 'significant others' and social networks Understanding and supporting compliance within supervision Exploring the social, political, organisational and historical contexts of offender supervision Offender Supervision will be essential reading for academics, undergraduate and postgraduate students, policy makers, managers and practitioners interested in offender supervision.

Managing Public Safety Technology Springer

Divided into four sections—public safety agencies, key issues like interoperability and cybercrime, management skills, and emerging trends like the transfer of military technologies to civilian agencies, Managing Public Safety Technology illustrates how essential managing technology is to the success of any project. Based on the authors' years of experience dealing with information systems and other tools, this book offers guidance for line personnel, supervisors, managers, and anyone dealing with public safety technology. Designed for current or future public safety personnel, especially those in management, Managing Public Safety Technology can also be used for undergraduate and graduate public safety management and leadership programs.

Utilizing Technology, Knowledge, and Smart Systems in Educational Administration and Leadership John Wiley & Sons

"This Handbook critically traces the birth and development of Refugee and Forced Migration Studies, and vividly illustrates the vibrant and engaging debates that characterize this rapidly expanding field of research and practice. The contributions highlight the key challenges faced by academics and practitioners working with and for forcibly displaced populations around the world, as well as identifying new directions for research in the field. Since emerging as a distinct field of study in the early 1980s, Refugee and Forced Migration Studies has grown from being of concern of a relatively small number of scholars and policy analysts to become a global field with thousands of students

worldwide studying displacement, either from traditional disciplinary perspectives or as a core component of newer interdisciplinary programmes across the Humanities and Social and Political Sciences". --Publisher.

Single-camera Video Hoover Press

As the software industry continues to evolve, professionals are continually searching for practices that can assist with the various problems and challenges in information technology (IT). Agile development has become a popular method of research in recent years due to its focus on adapting to change. There are many factors that play into this process, so success is no guarantee. However, combining agile development with other software engineering practices could lead to a high rate of success in problems that arise during the maintenance and development of computing technologies. Software Engineering for Agile Application Development is a collection of innovative research on the methods and implementation of adaptation practices in software development that improve the quality and performance of IT products. The presented materials combine theories from current empirical research results as well as practical experiences from real projects that provide insights into incorporating agile qualities into the architecture of the software so that the product adapts to changes and is easy to maintain. While highlighting topics including continuous integration, configuration management, and business modeling, this book is ideally designed for software engineers, software developers, engineers, project managers, IT specialists, data scientists, computer science professionals, researchers, students, and academics.

Streaming Media Architectures, Techniques, and Applications: Recent Advances Butterworth-Heinemann

This seminal text, now in its thirteenth edition, provides a comprehensive and accessible overview of the operations underlying video production. It provides thorough coverage of the theory and techniques readers need to know, balancing complexity with practical how-to information about detailed subjects in a concise, conversational style. The book has been updated to incorporate recent changes in the video production pipeline—emphasizing digital video, non-linear video production, streaming platforms, mobile production, and do-it-yourself video—while maintaining the foundational, nuanced, teamwork-based approach that has made the book popular. Chapters include key takeaways, review questions, on-set exercises, and QR codes, and a comprehensive glossary defines all the key production terms discussed. An accompanying eResource includes downloadable versions of the forms and paperwork used in the book, in addition to links to further online resources.

Multimedia Cloud Computing Systems Artech House

Methods in microbial systematics have developed and changed significantly in the last 40 years. This has resulted in considerable change in both the defining microbial species and the methods required to make reliable identifications. Developments in information technology have enabled ready access to vast amounts of new and historic data online. Establishing both the relevance, and the most appropriate use, of this data is now a major consideration when undertaking identifications and systematic research. This book provides some insights into how current methods and resources are being used in microbial systematics, together with some thoughts and suggestions as to how both methodologies and concepts may develop in the future.

CCTV for Security Professionals Prentice Hall Professional

Advances in Computers, Volume 123 presents innovations in computer hardware, software, theory, design and applications, with this updated volume including new chapters on Downlink Resource Allocations of Satellite-Airborne-Terrestrial Networks Integration, Evaluating Software Testing Techniques: A Systematic Mapping Study, The Screening Phase in Systematic Reviews: Can we speed up the process?, A Survey on Cloud-Based Video Streaming Services, and User Behavior-Ensemble Learning based Improving QoE Fairness in HTTP Adaptive Streaming over SDN approach.

Contains novel subject matter that is relevant to computer science Includes the expertise of contributing authors Presents an easy to comprehend writing style

Handbook of Research on Integrating Computer Science and Computational Thinking in K-12 Education IGI Global

Provides research on security issues in various wireless communications, recent advances in wireless security, the wireless security model, and future directions in wireless security.

Advances in Visual Computing Springer Nature

As technology continues to develop and prove its importance in modern society, certain professions are acclimating. Aspects such as computer science and computational thinking are becoming essential areas of study. Implementing these subject areas into teaching practices is necessary for younger generations to adapt to the developing world. There is a critical need to examine the pedagogical implications of these technological skills and implement them into the global curriculum. The Handbook of Research on Integrating Computer Science and Computational Thinking in K-12 Education is a collection of innovative research on the methods and applications of computer science curriculum development within primary and secondary education. While highlighting topics including pedagogical implications, comprehensive techniques, and teacher preparation models, this book is ideally designed for teachers, IT consultants, curriculum developers, instructional designers, educational software developers, higher education faculty, administrators, policymakers, researchers, and graduate students.

Trends in the Systematics of Bacteria and Fungi Pluto Press (UK)

In this insightful book, you'll learn from the best data practitioners in the field just how wide-ranging -- and beautiful -- working with data can be. Join 39 contributors as they explain how they developed simple and elegant solutions on projects ranging from the Mars lander to a Radiohead video. With Beautiful Data, you will: Explore the opportunities and challenges involved in working with the vast number of datasets made available by the Web Learn how to visualize trends in urban crime, using maps and data mashups Discover the challenges of designing a data processing system that works within the constraints of space travel Learn how crowdsourcing and transparency have combined to advance the state of drug research Understand how new data can automatically trigger alerts when it matches or overlaps pre-existing data Learn about the massive infrastructure required to create, capture, and process DNA data That's only small sample of what you'll find in Beautiful Data. For anyone who handles data, this is a truly fascinating book. Contributors include: Nathan Yau Jonathan Follett and Matt Holm J.M. Hughes Raghu Ramakrishnan, Brian Cooper, and Utkarsh Srivastava Jeff Hammerbacher Jason Dykes and Jo Wood Jeff Jonas and Lisa Sokol Jud Valeski Alon Halevy and Jayant Madhavan Aaron Koblin with Valdean Klump Michal Migurski Jeff Heer Coco Krumme Peter Norvig Matt Wood and Ben Blackburne Jean-Claude Bradley, Rajarshi Guha, Andrew Lang, Pierre Lindenbaum, Cameron Neylon, Antony Williams, and Egon Willighagen Lukas Biewald and Brendan O'Connor Hadley Wickham, Deborah Swayne, and David Poole Andrew Gelman, Jonathan P. Kastelec, and Yair Ghitza Toby Segaran

1987 Industry and Product Classification Manual (1972/77 SIC Basis). CABI

CD-ROM contains: security tools developed by author; publicly available security tools; modified version of popclient; author's GPG 1.0.1 public key.

Beautiful Data IGI Global

Within educational organizations, administration and leadership are relied upon for the allocation of resources as well as the optimization of processes that can include data storage, knowledge management, and decision making. To support these expectations, technologies, knowledge, and smart systems must be put into place that allow administrators and leaders to accomplish these tasks as efficiently as possible. Utilizing Technology, Knowledge, and Smart Systems in Educational Administration and Leadership is an academic research book that examines knowledge regarding the scholarly exploration of the technologies, information/knowledge, and smart systems in educational administration and leadership. It provides a holistic, systematic, and comprehensive paradigm. Featuring a wide range of topics such as technology leadership in schools, technology integration in educational administration, and professional development, this book is ideal for school administrators, educational leaders, principals, IT consultants, educational software developers, academicians, researchers, professionals, educational policymakers, educators, and students.

Industry and Product Classification Manual CRC Press

The book includes selected high-quality research papers presented at the Third International

Congress on Information and Communication Technology held at Brunel University, London on February 27-28, 2018. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of Things (IOT), and e-mining. Written by experts and researchers working on ICT, the book is suitable for new researchers involved in advanced studies.

1967 Census of Business Springer

Security for Multihop Wireless Networks provides broad coverage of the security issues facing multihop wireless networks. Presenting the work of a different group of expert contributors in each chapter, it explores security in mobile ad hoc networks, wireless sensor networks, wireless mesh networks, and personal area networks. Detailing technologies

Inscribed Landscapes William C. Brown

Will war ever end? Women across the world are proving that they can oppose patriarchal capitalist violence

Offender Supervision Oxford Handbooks

"This book spans a number of interdependent and emerging topics in streaming media, offering a comprehensive collection of topics including media coding, wireless/mobile video, P2P media streaming, and applications of streaming media"--Provided by publisher.

Video Production Oxford University Press

The aim to this series is to publish important and original studies of the various branches of EU law. Each work provides a clear, concise, and critical exposition of the law in its social, economics, and political context, at a level which will interest the advanced student, the practitioner, the academic, and government and community officials. Formerly the Oxford European Community Law Library. Book jacket.

Video Surveillance Systems for Use in Security Applications Academic Press

The past decade has seen closed circuit television (CCTV) technology emerge as a distinct entity within the large and developing security industry. Its successful implementation requires understanding of many technical disciplines, all of which are detailed in this book. From scene illumination, to signal transmission, to display and recording technology, CCTV Surveillance is the only book available which teaches all the aspects of CCTV. CCTV has become the crucial ingredient in the overall security system. Just as the proverb 'a picture is worth a thousand words' applies in everyday life, so too does the CCTV picture provide the essential ingredient to the successful security system. CCTV Surveillance is written in a format useful to the student interested in security, the system designer, consultant, architect and engineer, as well as the end user-management or the security director. The book covers CCTV from theory to equipment to application, from light source to final monitoring, recording and printing - and everything in between. Much of the design theory is written in generic form and is applicable to all forms of CCTV use. Specific subjects covered include: the need for CCTV, the safety/security scenario, cover cameras transmission, monitors, switchers, camera housing, recorders, printers, image intensifiers and accessories. Each chapter begins with an overview of the subject for the manager and security director, and proceeds with the theory, design and hardware information essential for successful implementation. All chapters are well illustrated - diagrams, tables, photographs to provide complete information for all reader categories. The applications chapter provides seven practical examples with layouts, schematics and a bill of materials (BOM) for the complete CCTV systems. A comprehensive glossary defines terms generic to CCTV and electro-optics and aids to understand the subject. A complete reference on CCTV technology. Gives practical advice on the proper uses of CCTV to best protect against crime. Contains more than 100 photos of the most modern equipment available.

Video Surveillance Systems for Use in Security Applications Springer Nature

This two-volume set of LNCS 13598 and 13599 constitutes the refereed proceedings of the 17th International Symposium on Visual Computing, ISVC 2022, which was held in October 2022. The 61 papers presented in these volumes were carefully reviewed and selected from 110 submissions. They are organized in the following topical sections: Part I: deep learning I; visualization; object detection and recognition; deep learning II; video analysis and event recognition; computer graphics; ST: biomedical imaging techniques for cancer detection, diagnosis and management. Part II: ST: neuro-inspired artificial intelligence; applications; segmentation and tracking; virtual reality; poster.
