There are few clinical problems in the sleep medicine field that are more challenging than the sleep difficulties experienced by individuals suffering from post-traumatic stress disorder (PTSD). This book offers a unique, complete resource addressing all the basic concepts and clinical applications in sleep medicine in settings where combat-related PTSD is commonplace. Authored by leading international experts in the field of sleep/military medicine, *Sleep and Combat-Related Post Traumatic Stress Disorder* is organized in six sections and provides a broad perspective of the field, from the established theories to the most recent developments in research, including the latest neuroscientific perspectives surrounding sleep and PTSD. The result is a full assessment of sleep in relation to combat-related PTSD and a gold standard volume that is the first of its kind. This comprehensive title will be of great interest to a wide range of clinicians -- from academics and clinicians working within or in partnership with the military health care system to veteran

hospital physicians and all health personnel who work with war veterans.

This book provides an update on heterocyclic compounds that serve as key components of anti-cancer agents administered in pre-clinical settings. Many of the compounds highlighted in the book are being actively investigated for the bioactive properties against a range of cancer cell lines. There is potential for heterocyclic compounds to design agents that can target specific molecules to treat different types of cancers. Chapters are contributed by experts in pharmaceutical chemistry and are written to give a general overview of the topic to readers involved in all levels of research and decision-making in pharmaceutical chemistry and anti-cancer drug design. Part 2 of the book set covers these topics: - Anticancer targets for heterocyclic lead compounds - Coumarin hybrids for cancer treatments - Progress in nitrogen and sulphur-based heterocyclic compounds for their anticancer activity - Imidazole as an anticancer heterocyclic ring - Morpholine for profiling anticancer lead compounds - Natural products as anticancer agents

This book deals with the effectiveness and the capability of microfinance institutions (MFIs) to enhance women's livelihoods and empowerment and to mitigate the effects of HIV and AIDS in Côte d'Ivoire. The results show that MFI credit causes positive and negative effects. MFI credit has improved incomes, the level of farm production and human and social capital. MFI credit has also enhanced women's decision-making power within households due to their new ability to contribute to the improvement of the household standard of living. Furthermore, women's empowerment regarding the demand for and the use of credit give them more opportunity to obtain MFI credit. Despite the positive effects of MFIs on women's income, this publication shows that loan repayment was not successful among some female borrowers due to the fact that the loan has not been used for investment purposes. For MFIs, the diversion of loans can endanger their functioning and sustainability and therefore their effectiveness in rural areas. Regarding HIV, this book highlights the diversity and the specificity of the way HIV-affected individuals are financially supported by credit institutions. Both the direct and indirect effects of HIV and AIDS on women's livelihood and MFIs are analysed.
