Women have been represented in art, literature, music, and more for decades, with the image of the woman changing through time and across cultures. However, rarely has a multidisciplinary approach been taken to examine this imagery and challenge and possibly reinterpret old women-related myths and other taken-for-granted aspects (e.g., grammatically inclusive gender). Moreover, this approach can better place the ideologies as myth creators and propagators, identify and deconstruct stereotypes and prejudices, and compare them across cultures with the view to spot universal vs. culturally specific approaches as far as women's studies and interpretations are concerned. It is important to gather these perspectives to translate and unveil new interpretations to old ideas about women and the feminine that are universally accepted as absolute, impossible to challenge, and invalidated truths. The Handbook of Research on Translating Myth and Reality in Women Imagery Across Disciplines is a comprehensive reference book that provides an interdisciplinary and multidisciplinary perspective on the perception and reception of women across time and space. It tackles various perspectives: gender studies, linguistic studies, literature and cultural studies, discourse analysis, philosophy, anthropology, sociology, etc. Its main objective is to present new approaches and propose new answers to old questions related to gender inequalities, stereotypes, and prejudices about women and their place in the world. Covering significant themes that include the ethics of embodiment, myth of motherhood at the crossroad of ideologies, translation of women's experiences and ideas across cultures, and discourses on women's rehabilitation and dignification across centuries, this book is critical for linguists, professionals, researchers, academicians, and students working in the fields of women's studies, gender studies, cultural studies, and literature, as well as other related categories such as political studies, education studies, philosophy, and the social sciences.

*Libraries and Librarianship During Muslim Rule in India* HarperCollins UK

From the New York Times bestselling author of *All About Love*, a brave and astonishing work that challenges patriarchal culture and encourages men to reclaim the best part of themselves.

Everyone needs to love and be loved—even men. But to know love, men must be able to look at the ways that patriarchal culture keeps them from knowing themselves, from being in touch with their feelings, from loving. In *The Will to Change*, bell hooks gets to the heart of the matter and shows men how to express the emotions that are a fundamental part of who they are—whatever their age, marital status, ethnicity, or sexual orientation. But toxic masculinity punishes those fundamental emotions, and it's so deeply ingrained in our society that it's hard for men to not comply—but hooks wants to help change that. With trademark candor and fierce intelligence, hooks addresses the most common concerns of men, such as fear of intimacy and loss of their patriarchal place in society, in new and challenging ways. She believes men can find the way to spiritual unity by getting back in touch with the emotionally open part of themselves—and lay claim to the rich and rewarding inner lives that have historically been the exclusive province of women.

*Against Plagiarism* Rutgers University Press

This volume brings together internationally known researchers representing different theoretical perspectives on students' self-regulation of learning. Diverse theories on how students become

self-regulated learners are compared in terms of their conceptual origins, scientific form, research productivity, and pedagogical effectiveness. This is the only comprehensive comparison of diverse classical theories of self-regulated learning in print. The first edition of this text, published in 1989, presented descriptions of such differing perspectives as operant, phenomenological, social learning, volitional, Vygotskian, and constructivist theories. In this new edition, the same prominent editors and authors reassess these classic models in light of a decade of very productive research. In addition, an information processing perspective is included, reflecting its growing prominence. Self-regulation models have proven especially appealing to teachers, coaches, and tutors looking for specific recommendations regarding how students activate, alter, and sustain their learning practices. Techniques for enhancing these processes have been studied with considerable success in tutoring sessions, computer learning programs, coaching sessions, and self-directed practice sessions. The results of these applications are discussed in this new edition. The introductory chapter presents a historical overview of research and a theoretical framework for comparing and contrasting the theories described in the following chapters, all of which follow a common organizational format. This parallel format enables the book to function like an authored textbook rather than a typical edited volume. The final chapter offers an historical assessment of changes in theory and trends for future research. This volume is especially relevant for students and professionals in educational psychology, school psychology, guidance and counseling, developmental psychology, child and family development, as well as for students in general teacher education.

*Resistance and Identity in Twenty-First Century Literature and Culture: Voices of the Marginalized* is a compendium of reflections on literary texts, politics of literature and culture. The book proffers ruminations on the pivotal role of constructive and positive resistance to reconstruct identities for meaningful human existence. The disciplinary power and dominance coerce the natural body to resist and yearn for freedom. One can establish unique identity by refusing to conform to pressures of society that deform the natural body. Dominant forces and oppressive structures evoke resistance that can range from 'polite demurrals' to 'refusal'. Resistance comes from the 'will' that refuses to be controlled and governed. The 'refusal' of the ordinary illuminates ordinary lives/bodies. Language and literary texts contain essential truths of such human existence. Words and imaginary worlds in literary works reveal truth and suggest possibilities for reconfiguring the order.

*Sugar and Sugar Derivatives: Changing Consumer Preferences* Penguin UK

Sugarcane enjoys a prominent position among agro-industrial crops and is commercially grown in 115 tropical and subtropical countries around the world. However, fluctuations in sugar prices have forced the sugarcane industry worldwide to broaden its revenue base by moving from single-commodity manufacturing to a range of value-added products. Utilizing the by-products in an innovative manner to create value-added products is the new course of action for sugar-producing countries. For many years sugarcane was regarded as a single-product crop, i.e., only useful for producing sugar. Its actual potential is now increasingly being recognised by the industry and there is a growing trend toward the manufacturing of allied products from sugarcane. Therefore, the focus is now on the establishment of sugar-agro-industry complexes, processing not just sugar but a range of other products. This book provides a comprehensive overview of sugarcane not only as a source of sweetening agents but also for many other uses, including as a source of bio-energy. It also explores the trend of sugar consumption and suggests practices to curb the consumption of sugar products in order to tackle obesity and reduce public health costs. The book underscores the need to diversify sugarcane and highlights means of doing so, while also addressing various innovations and technologies being developed in connection with sugar, sugar derivatives, and sugar industry by-products for sustainable utilization in the sugar-agro industry. Accordingly, it offers a valuable resource for professionals and R&D units in the sugar industry, and for students of agronomy and related fields.

'As hypnotic as an opium dream and pretty unputdownable' Daily Mail In September 1838 a storm blows up on the Indian Ocean and the *Ibis*, a ship carrying a consignment of convicts and indentured laborers from Calcutta to Mauritius, is caught up in the whirlwind. When the seas settle, five men have disappeared - two lascars, two convicts and one of the passengers. Did the same storm upend the fortunes of those aboard the *Anahita*, an opium carrier heading towards Canton? And what fate befell those aboard the *Redruth*, a sturdy two-masted brig heading East out of Cornwall? Was it the storm that altered their course or were the destinies of these passengers at

the mercy of even more powerful forces? On the grand scale of an historical epic, *River of Smoke* follows its storm-tossed characters to the crowded harbors of China. There, despite efforts of the emperor to stop them, ships from Europe and India exchange their cargoes of opium for boxes of tea, silk, porcelain and silver. Among them are Bahram Modi, a wealthy Parsi opium merchant out of Bombay, his estranged half-Chinese son Ah Fatt, the orphaned Paulette and a motley collection of others whose pursuit of romance, riches and a legendary rare flower have thrown together. All struggle to cope with their losses - and for some, unimaginable freedoms - in the alleys and crowded waterways of 19th century Canton. As transporting and mesmerizing as an opiate induced dream, *River of Smoke* will soon be heralded as a masterpiece of twenty-first century literature.
