search of great wine and famous people who are also winemakers. In the past few years, helming a winery has become more and more popular among the rich and famous. But how much involvement in the actual process of making that wine did those celebrities actually have? Were they merely name endorsements or were they part of the incredibly difficult process of creating great wine from a field of grapes? Travelling around the world, Wise and Sunshine interviewed such winemakers as B. R. Cohn, manager of the Doobie Brothers; screenwriter Robert Kamen of The Karate Kid fame; race car drivers Mario Andretti

and legendary football coach, Dick Vermeil. Written for fans of wine, travel, and the rich and famous, Celebrity Vineyards is a fascinating journey into a world that, for most of us, is only a dream. Here are artists and entrepreneurs, dreamers and businesspeople who share a love of wine, a respect for the grape, and the joy of creating something amazing out of the land.

Wines & Vines Lonely Planet

A collection of informative, irreverent, and hilarious columns from one of America's foremost wine critics. Connoisseurs, neophytes and beer-swillers alike will find themselves laughing, pondering, and armed with everything they need to impress

friends, terrify enemies, and stop wine snobs in their tracks.

Celebrity Vineyards

Elsevier

In an accessible question-and-answer format, Edward Finstein (a.k.a. Dr. WineKnow) takes the reader through the various areas of wine knowledge, working with questions he has been asked by clients and students during his quarter-century as a wine consultant, writer, and teacher. He addresses questions about the growing of wine, making it, finding and buying it (including a demystification of the puzzling information on wine labels), storing and aging it, and serving it (where should you store your glasses to assure good tasting?). Most

attention, however, is paid to enjoying it, including how to handle restaurant wine lists and rituals, how your health can affect your tasting, and how to get the most from the matching of food and wine. Each chapter is peppered with “Grape Flashes,” containing interesting bits of information, and the book also includes a glossary of wine terms, a simple guide to food and wine matching, and a selected bibliography for further reading. Edward Finstein believes that the most important thing about wine is enjoyment – and understanding aids that enjoyment. From the Trade Paperback edition.

Quarterly Review of Wines McClelland & Stewart

Following up on his bestselling Winery Technology and Operations, physical chemist and winemaker Yair Margalit comes out with the successive, Concepts in Wine Technology, fully updated and revised to meet the advances of modern winemaking. Among the extended topics are fermentation, skin contact, acid balance, phenolics, bottling, the use of oak and quality control. He begins in the vineyard discussing proper maturation, soil and climate, bunch health, vineyard disease states, and grape varieties. Next he tackles the preharvest with a careful look at vineyard management and preparing the winery for harvest. Dr.

Margalit then outlines the entire process of harvesting, from destemming, crushing, and skin contact as it applies to both red and white grapes to pressing, must correction, and temperature control. Fermentation is examined fully and includes a lengthy look at the factors affecting malo-lactic fermentation and its pros and cons. There is a chapter on cellar operations that deals with racking, stabilization, fining, filtration, blending, and maintaining winery hardware, followed by sections on barreling and bottling. The final chapter pulls together the more general aspects of wine technology, covering sulphur-dioxides, different forms of wine

spoilage and ways to ward them off, legal regulations and, one of the most important and enigmatic compounds in wine, phenolics.

Vine to Bottle Lonely Planet

THE PERFECT GETAWAY Beach paradises. Luxury hideaways. Cultural thrills. This showcase of the world's most enjoyable escapes celebrates the sheer pleasure of travel. Take time out to indulge in romantic getaways, culinary adventures, musical journeys and family holidays.

Wilmington Infinite Ideas

Ever been baffled by a wine list, stood perplexed before endless racks of bottles at the liquor store, or ordered an overpriced bottle out of fear of the scathing judgment of a restaurant sommelier? Before she became a James Beard Award—winning food and wine writer, Dara Moskowitz Grumdahl experienced all these things. Now she presents a handy guide that will show you how to stop being overwhelmed and intimidated, how to discover, respect, and enjoy your own personal taste, and how to be whatever kind of wine person you want to be, from budding connoisseur to someone who simply gets wine you like

every time you buy a bottle. Refreshingly simple, irreverent, and witty, *Drink This* explains all the insider stuff that wine critics assume you know. It will teach you how to taste and savor wine, alone, with a friend, or with a group. And perhaps most important, this book gives you the tools to learn the only thing that really matters about wine: namely, figuring out what you like. Grumdahl draws on her own experience and savvy and interviews some of the world's most renowned critics, winemakers, and chefs, including Robert M. Parker, Jr., Paul Draper, and Thomas Keller, who share their wisdom about everything from pairing food and wine to the inside scoop on

what wine scores and reviews really mean. Readers will learn how to master tasting techniques and understand the winemaking process from soil to cellar. *Drink This* also reveals how to get your money's worth out of wine without spending all you've got. At last there's a reason for wary wine lovers to raise a glass in celebration. Savor the insider's viewpoint and straight talk of *Drink This*, and watch your intimidation of wine transform into well-grounded, unshakeable confidence.

The standard of wines made today is arguably higher than any time in the six thousand years of vinous history. The level of knowledge of

producers and the ability to control the processes in wine production is also greatly improved. Authors Keith Grainger and Hazel Tattersall detail these processes, from vine to bottle, looking at key factors such as geography, winemaking techniques, the impact of decisions made upon style and quality, and problems that may be encountered. The authors are not afraid to discuss practices that may be regarded as controversial. Highly regarded consultants to the wine industry, Grainger and Tattersall present a clear and accessible handbook:

- Bullet points
- Vineyard and winery photographs
- Diagrams
- Text boxes
- Wine Production: Vine to Bottle

is a concise and

easy-to-use reference guide for all busy food and beverage industry professionals, students and others needing a working knowledge of wine production.

Ballantine Books

Wherever grapevines are cultivated this book will be welcome because it fills longstanding need for

a clear, concise treatment of modern viticulture. The chapters on vine structure, vine physiology, the grape flower and berry set, development and composition of grapes, and means of improving grape quality add to our knowledge of the vine and its functions. The text is designed to enable those concerned with either vine or fruit problems to arrive at considered diagnoses.

Fodors Travel Publications

Planting vineyards and producing grapes in what is still the world's coolest vine-growing region has always been difficult. From the days of the early Christian monks to the era of the landscape gardener, when wealthy landowners planted vines, none of the early vineyards were commercial prospects and the quality of the wine produced was such that mainland Europe's winemakers were never in danger of losing Great Britain's custom. Vine-growing in Britain only began in

earnest after the Second World War, when Ray Brock conducted his grape-growing experiments and Edward Hyams promoted the idea of wine production in Britain through his books and public talks. These pioneers laid the groundwork for the establishment of vineyards from the 1950s onwards, most producing the German-style white wines popular at the time. However, changing tastes and an influx of quality wines from the New World led, at the end of the twentieth century, to a decline in the area planted to vine. The revival of the industry began in the early 2000s after Nyetimber's consistently award-winning sparkling wines inspired many

producers to start making Champagne-style wines. The classic Champagne varieties now take up more than 60 per cent of the vineyard area and there are well over 500 commercial wine producers and over 150 wineries in England and Wales. Here Skelton focuses on just 21, through which he paints a complete picture of the country's wine industry. From small, new entrants onto the scene to the established big boys, he shows a range of approaches - to business, in the field and in the winery. From an industry insider of more than 40 years' standing The wines of Great Britain is an indispensable guide for students, wine enthusiasts and

aspiring wine producers.

Expert, insightful commentary accompanies each adventure.

John Wiley & Sons
How can a small winery possibly compete with the marketing of massive wine companies? How can it hope to capture the over-stimulated mindshare of the

modern consumer? By being strategic. This revised and updated edition to the bestselling book puts the vast bank of wine marketing knowledge within reach of industry novices, and fresh, practical, and powerful strategies into the hands of veteran brand managers and marketing professionals. With 100 pages of new and expanded material, this book addresses such topics as importing and exporting; logistical management; marketing your tasting room and wine region as a prime tourist destination; how to generate greater retail sales; and how to grab the benefits, while avoiding the dangers, of social networking and viral marketing.

All the Questions You Had About Wine but Were Too Busy Sipping to Ask Melrose Press
Unit Operations in Winery, Brewery, and Distillery Design focuses on process design for wineries, breweries, and distilleries; and fills the need for a title that focuses on the challenges inherent to specifying and building alcoholic beverage production facilities. This text walks through the process flow of grapes to wine, grain to beer, and wine and beer to distilled spirits, with an emphasis on the underlying engineering principles, the equipment involved in these processes, and the selection and design of said equipment. Outlines the process flow of alcoholic

beverage production
Reviews process engineering fundamentals (mass & energy balances, fluid flow, materials receiving & preparation, heat exchange, fermentation, downstream processing, distillation, ageing, packaging, utilities, control systems, and plant layout) and their application to beverage plants Describes the idea of sanitary design and its application to plant operation and design Covers critical equipment parameters for purchasing, operating, and maintaining systems Shows how winery/brewery/distillery can influence product "style" and how "style" can dictate design Features examples of

calculations derived from wineries designed by the authors, end of chapter problems, and integrative in-text problems that describe real-world issues and extend understanding. Written for both engineers in the alcohol industry and non-engineers looking to understand facility design, this textbook is aimed at students, winemakers, brewers, distillers, and process engineers.

 Could China take over the wine world?
 Cynthia Howson and Pierre Ly explore how Chinese wine went from being ignored and ridiculed to earning gold medals and praise

by famous critics in less than a decade. Wine made in... China? Until recently, for most people, at best, it didn't exist. Or at worst, as one colorful tasting note described, it evoked: "ash tray, coffee grounds, and urinal crust." Then, a 2009 Chinese red shocked the world when it won Best Bordeaux Blend at the Decanter World Wine Awards. Could China take over the wine world? Cynthia Howson and Pierre Ly provide a knowledgeable and exuberant exploration of how Chinese wine went from being ignored and ridiculed to earning gold medals and praise by famous critics in less than a decade. They take the reader along on their adventure on the China wine trail to meet the

farmers, entrepreneurs, and teachers who are shaping this new industry. They travel to Chinese wine tourism hotspots, talk to winemakers who struggle to find good wine grapes, and visit lush mountaintops and arid deserts to see what French multinational corporations have in common with small family farms. Then, they visit a Chinese wine school to meet professors and their students eager to join the wine work force. They reveal where they bought the best local wines as they give travelers new insights on China and ideas for Chinese wine tourism. Readers interested in current affairs, economic development, and

business in China will find that wine offers a clear lens for understanding the larger issues facing the country.
