The authors present concepts simply, then move the discussion toward complexity in contrast to the approach taken by many current property texts. Clear yet sophisticated, the casebook is the perfect choice for all skill levels.	Including problems that students can and should be able to do on their own, explanatory answers, and skills-based exercises, this casebook is both professor-friendly and student-friendly. Themes that run through the course are highlighted throughout the book, resulting in a casebook that clearly presents the fundamentals of property law. This allows students to develop an understanding of basic concepts on their own while allowing professors to assist their students in

developing an advanced understanding of property law. Although Property Law goes far beyond bar tested topics, the authors are experts on the property coverage on the bar exam, and wrote the book to give students exposure to every topic they are likely to see on the bar exam. New to the 3rd Edition: ● Some cases have been eliminated or shortened to make coverage more manageable, especially for four-credit courses. Edits from Second Edition will be included in the

teacher's manual. ● Chapter 9 revised to include Cedar Point Nursery v. Hassid, the Supreme Court's most recent takings case. ● Additional corrections, updates, and refinements throughout. Professors and students will benefit from: ● Property Law starts from simplicity and moves to complexity: The book first provides text that explains the basic doctrine, then presents a simple case example, and finally moves to more complex issues. ● Cases are introduced with

explanatory text discussing the law and issues surrounding the case. This radically different approach from most other casebooks allows students to have a better grasp of the concepts and themes before they even read the case. ● Problems and exercises that students can complete on their own, with explanatory answers included in an appendix. ● Innovative design that aids student learning, with sidebars, diagrams, charts, and illustrations that make

concepts clearer to students. ● Cases that are used as examples, not introductions to legal rules. Many topics in the book feature introductory text, illustrations, and problem sets before a single case is introduced, to aid in students' legal learning. ● The inclusion of sample documents, helping students to understand core concepts. ● Perfect for a four-credit course, the book also features a modular design that can be used in courses of varying credit size. ●

More comprehensive bar exam topic coverage than any competing book. *Property Inspection Checklist Real Estate Planner and Organizer* Performance Programs Company
 In this rapid and robust read, Home Inspection expert Wally Conway, "The Happy Home Inspector" reveals home inspection secrets to remove the mystery, fear and frustration from the home inspections. He honed his home inspection skills in over 5,000 houses before

being discovered by HGTV for "House Detective" and DIY Network on "Finders Fixers." Wally hosts "The Home and Garden Show" broadcast from WOKV in Jacksonville, Florida. Wally's unique blend of experience and the talent to tell the tale make for an enjoyable read. Who is this book for.....and what will you learn? Homebuyers will be able to eliminate surprise and unexpected expenses while feeling true peace of mind with their purchase decision. Home sellers can have their homes sold

in less time and for closer to the asking price by inspecting the home at the time of listing. Realtors and real estate agents will learn how to reduce their liability, close more deals, and create an all referral business. Understand the difference and uses of the home inspection, home warranty, survey, and appraisal in reducing buyers risk, seller's liability and Realtors commission. How to prepare for the arrival of the home inspector at your house. What

questions should you ask a home inspector before hiring them? What special training or tools should they have in addition to a certification and home inspection license? Is a simple home inspection checklist enough or is a more detailed home inspection report better? Should new homes be inspected, or should you trust that the city building inspector did enough when he said the house met the minimum building code? Do home inspectors inspect for building code violations? What should

be done with the list of repairs for the property that the home inspector reports? How much should a home inspection Cost what services should be included beyond a basic home inspection checklist. What tools should you expect a trusted home inspection expert to bring to the property inspection? Can a home inspector do a complete home inspection without using an infrared camera? Could a real estate agent who refers a home inspector who does not use an infrared

camera be considered negligent in making the referral? Is there a fundamental difference in how a home inspector should view a home in Jacksonville or St Augustine Florida compared to Denver, Dallas or your town? Is there a home inspection mindset that leads to peace of mind during and after the inspection of the house and property? Who is this book NOT for? This book is NOT a how to DO a home inspection checklist like those from Holmes on Holmes TV star

Mike Holmes, but a how to choose a home inspector and how to USE a home inspection guide! It's also NOT a how to repair guide like Bob Vila or the This Old House books. And it is for sure NOT a technical home inspection book like Norman Becker has written for home inspectors. Truth be told, if you've enjoyed the description of "Home Inspection Secrets of A Happy Home Inspector" enough to read the all the way to the bottom of the description, you will enjoy reading the entire book!
