This hardcover, full-color treasury includes six picture book stories adapted from the classic Little House books. The Little House series introduced generations of readers to Laura Ingalls Wilder's life on the frontier. Now with this illustrated storybook collection, the youngest readers can share in her world as well. Laura Ingalls lives in a snug little log cabin with her ma, her pa, her sisters, Mary and Carrie, and their dog, Jack. Almanzo Wilder

lives on a farm with his family and lots of animals. These pioneer children have all sorts of adventures, including trips to town, county fairs, cozy winter days, and holidays with family. The six stories included in this treasury were originally published as stand-alone picture books: A Little Prairie House, Going to Town, County Fair, Sugar Snow, Winter Days in the Big Woods, and Christmas in the Big Woods.

Concepts, Emerging Evidence, Practice Random House Studies the changes that have marked war in the Western World since the thirteenth century.

Education, like electricity, needs a conduit, a teacher, through which to transmit its power-- i.e., the discovery and continuity of information, knowledge, wisdom, experience, and culture. Through the stories and experiences of eight successful teacher-transmitters, *The Dreamkeepers* keeps hope alive for educating young African Americans. --Reverend Jesse L. Jackson, president and founder, National Rainbow Coalition In this beautifully written book Ladson-Billings illustrates the inspiring influence of a select group of teachers who keep the dreams alive for African American students. ?Henry M. Levin, David Jacks professor of Higher Education, Stanford University Ladson-Billing's portraits, interwoven with personal reflections, challenge readers to envision intellectually rigorous and culturally relevant classrooms that have the power to improve the lives of not just African American students but all children.

This is a pioneering work on "karayuki-san", impoverished Japanese women sent abroad to work as prostitutes from the 1860s to the 1920s. The narrative follows the life of one such prostitute, Osaki, who is persuaded as a child of ten to accept cleaning work in Sandakan, North Borneo, and then forced to work as a prostitute in a Japanese brothel, one of the many such brothels that were established throughout Asia in conjunction with the expansion of Japanese business interests. Yamazaki views Osaki as the embodiment of the suffering experienced by all Japanese women, who have long been oppressed under the dual yoke of class and gender. This tale provides the historical and anthropological context for understanding the sexual exploitation of Asian women before and during the Pacific War

and for the growing flesh trade in Southeast Asia and Japan today. Young women are being brought to Japan with the same false promises that enticed Osaki to Borneo 80 years ago. Yamazaki Tomoko, who herself endured many economic and social hardships during and after the war, has devoted her life to documenting the history of the exchange of women between Japan and other Asian countries since 1868. She has worked directly with "karayuki-san", military comfort women, war orphans, repatriates, women sent as picture brides to China and Manchuria, Asian women who have wed into Japanese farming communities, and Japanese women married to other Asians in Japan.

The mathematical study of games is an intriguing endeavor with implications and applications that reach far beyond tic-tac-toe, chess, and poker to economics, business, and even biology and politics. Most texts on the subject, however, are written at the graduate level for those with strong mathematics, economics, or business backgrounds. In *Journalism, fake news & disinformation* Routledge

The Center for US-Japan Comparative Social Studies (www.usjp.org) is an Internet-based nonprofit organization. Since its inception in 2000, the Center has provided information about education, culture and society in the United States and Japan. The author of this book, Miki Y. Ishikida, is Director and a principal researcher at the Center. *Japanese Education in the 21st Century* is an introduction to contemporary Japanese education and provides the latest information and resources for educators and anyone with an interest in the Japanese school system. Author Miki Y. Ishikida describes The rapid changes in today's Japanese schools and communities that came about from the implementation of the 1987 recommendation of the National Council on Educational Reform that relaxed rigid school regulations Compensatory education and ethnic education for minority and disadvantaged children-Buraku children, Ainu children, Korean children, Nikkei children and disabled children-that are designed to improve their academic achievements and to give them a sense of pride in their heritage Human rights education aimed to instill respect, acceptance, and tolerance for all people by teaching the history and culture of minority population. Ishikida discusses the current state of the Japanese educational system, and the issues of minority education, special

education, and lifelong education based upon her examination of administrative documents, school journals, and secondary literature. She also presents the results of case studies from her classroom observations and interviews with teachers and administrators from a cross-section of Japanese schools.

A Tuareg youth ventures into trackless desert on a life-threatening quest to find the father he remembers only as a shadow from his childhood, but the spirit world frustrates and tests his resolve. For a time, he is rewarded with the Eden of a lost oasis, but eventually, as new settlers crowd in, its destiny mimics the rise of human civilization. Over the sands and the years, the hero is pursued by a lover who matures into a sibyl-like priestess. The Libyan Tuareg author Ibrahim al-Koni, who has earned a reputation as a major figure in Arabic literature with his many novels and collections of short stories, has used Tuareg folklore about Anubis, the ancient Egyptian god of the underworld, to craft a novel that is both a lyrical evocation of the desert's beauty and a chilling narrative in which thirst, incest, patricide, animal metamorphosis, and human sacrifice are more than plot devices. The novel concludes with Tuareg sayings collected by the author in his search for the historical Anubis from matriarchs and sages during trips to Tuareg encampments, and from inscriptions in the ancient Tifinagh script in caves and on tattered manuscripts. In this novel, fantastic mythology becomes universal, specific, and modern.

At last! A book that reveals what thinking looks like. Think you

can't see someone's thinking? Think again! This book reveals what happens when the normally private, hidden and undefined act of thinking is transformed into one that is public, available and explicit. Thinking Skills and Eye Q is the world's first lexicon of visual tools - once tooled up, you can transform teaching and learning in your classroom. Thinking Skills and Eye Cue is a breakthrough in thinking. Ironically, there has been lots of fuzzy thinking about thinking skills. Caviglioli, Harris and Tindall, though, are very clear about what thinking is. In this book, they link thinking skills with visual tools and the genres that pupils encounter in every lesson. The book provides a theory of learning that oozes practicality, common sense and relevance at all Key Stages. Thinking Skills and Eye Q is a smart tool kit, for transforming teaching and learning. This book shows how to use 40 different visual tools to: infuse the teaching of the five National Curriculum Thinking Skills into subject teaching develop writing skills in all six genres show pupils how to be independent and creative thinkers and learners make speaking and listening, questioning and responding an integral part of all lessons raise IQ

Written by veterinary technicians for veterinary students and practicing technicians, Lavin's Radiography for Veterinary Technicians, 5th Edition, combines all the aspects of imaging — including production, positioning, and evaluation of radiographs — into one comprehensive text. Completely updated with all new vivid, color equipment photos, positioning drawings and detailed anatomy drawings, this fifth edition is a valuable resource for students, technicians and veterinarians who need information on

the latest technology or unique positioning. Broad coverage of radiologic science, physics, imaging and protection provide you with foundations for good technique. Positioning photos, radiographic images and anatomical drawings presented side-by-side with text explanation for each procedure increases your comprehension and retention. Objectives, key terms, outlines, chapter introductions and key points help you organize information to ensure you understand what is most important in every chapter. NEW! More than 1000 new full-color photos and updated radiographic images visually demonstrate the relationship between anatomy and positioning. NEW! All-new color anatomy art created by an expert medical illustrator help you to recognize and avoid making imaging mistakes. NEW! Non-Manual restraint techniques including sandbags, tape, rope, sponges, sedation and combinations improve your safety and radiation protection. NEW! Chapter on dental radiography aids general veterinarian techs and those specializing in dentistry. NEW! Increased emphasis on digital radiography, including quality factors and post-processing, keeps you up-to-date on the most recent developments in digital technology.

It isn't that they can't see the solution. It is Approach your problems from the right end and begin with the answers. Then one day, that they can't see the problem. perhaps you will find the final question. O. K. Chesterton. The Scandal of Father 'The Hermit Clad in Crane Feathers' in R. Brown 'The point of a Pin'. van Oulik's The Chinese Maze Murders. Growing specialization and diversification have brought a host of monographs and textbooks on increasingly specialized topics. However, the "tree" of knowledge of mathematics and related fields does not grow only by putting forth new branches. It also happens, quite often in fact, that branches which were thought to be completely disparate are suddenly seen to be related. Further, the kind and level of sophistication of mathematics applied in various sciences has changed drastically in recent years: measure theory is used (non trivially) in regional and theoretical economics; algebraic geometry interacts with physics; the Minkowsky lemma, coding theory and the structure of water meet one another in packing and covering theory; quantum fields, crystal defects and mathematical programming profit from homotopy theory; Lie algebras are relevant to filtering; and prediction and electrical engineering can use Stein spaces. And in addition to this there are such new emerging subdisciplines as "experimental mathematics", "CFD", "completely integrable systems", "chaos, synergetics and large-scale order", which are almost impossible to fit into the existing classification schemes. They draw upon widely different sections of mathematics.

The idea that Japan is a socially homogenous, uniform society has been increasingly challenged in recent years. This book takes the resulting view further by highlighting how Japan, far from singular or monolithic, is socially and culturally complex. It engages with particular life situations, exploring the extent to which personal experiences and lifestyle choices influence this contemporary multifaceted nation-state. Adopting a theoretically engaged ethnographic approach, and considering a range of "escapes" both physical and metaphorical, this book provides a rich picture of the fusions and fissures that comprise Japan and Japaneseness today.
