This book tells the story of the ancient land named Chianti and the modern wine appellation known as Chianti Classico. In 1716, Tuscany's penultimate Medici ruler, Cosimo III, anointed the region of Chianti, along with three smaller areas in the Florentine State, as the world's first legal appellations of origin for wine. In the succeeding centuries, this milestone was all but forgotten. By the late nineteenth century, the name Chianti, rather than signifying this historic region and its celebrated wine, identified a simple Italian red table wine in a straw-covered flask. In the twenty-first century, Chianti Classico emerged as one of Italy's most dynamic and fashionable wine zones. Chianti Classico relates the fascinating evolution of Chianti as a wine region and reveals its geographic and cultural complexity. Bill Nesto, MW, and Frances Di Savino explore the townships of Chianti Classico and introduce readers to the modern-day winegrowers who are helping to transform the region. The secrets of Sangiovese, the principal vine variety of Chianti, are also revealed as the book unlocks the myths and mysteries of one of Italy's most storied wine regions. The publication of Chianti Classico coincides with the three hundredth anniversary of the Medici decree delimiting the region of Chianti on September 24, 1716.

Floriculture, Ornamental and Plant Biotechnology: Advances and Topical Issues 4 Lulu Press, Inc

Parametricism is an avant-garde architecture and design movement that has been growing and maturing over the last 15 years, emerging as a remarkable global force. The tendency started in architecture but now encompasses all design disciplines, from urban design to fashion. In architecture, the style has an international following and is currently progressing beyond its experimental roots to make an impact on a broader scale, with practices like Zaha Hadid Architects (ZHA) winning and completing large-scale architectural projects worldwide.

Parametricism implies that all elements and aspects of an architectural composition or product are parametrically malleable; and the style owes its original, unmistakable physiognomy to its unprecedented use of computational design tools and fabrication methods. All design parameters are conceived as variables that allow the design to vary and adapt to the diverse, complex and dynamic requirements of contemporary society. Although Parametricism has been talked about and hotly debated for a number of years, so far there has been no publication dedicated to Parametricism. The issue is guest-edited by Patrik Schumacher, partner at ZHA, and one of the world's most highly renowned advocates of Parametricism. Contributors: Philippe Block, Shajay Bhooshan, Mark Burry, Mario Carpo, Manuel DeLanda, John Frazer, Mark Foster Gage, Enriqueta Llabres and Eduardo Rico, Achim Menges, Theo Spyropoulos, Robert Stuart-Smith, Philip F Yuan. Featured architects and designers: Arup, MARC FORNES/THEVERYMANY, Zaha Hadid Architects (ZHA) and Ross Lovegrove.

An Interdisciplinary Assessment Gareth Stevens Pub

The author undertakes a new interpretation of physiocratic economics and its contributions to the foundation of economic science.

L'industria meccanica rivista quindicinale Springer Science & Business Media

First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

Codice penale e leggi complementari Oxfam

In a world of damaged ecological and social systems, with a fragile global economy and a rapidly changing climate, business as we know it must evolve or perish. It is no longer acceptable to create financial profits by extracting the foundational living wealth of our lands and waters. Enterprises need a new model with which to interpret the world, and a new process for whole-systems design and decision-making. The 8 Forms of Capital is that model. By articulating the multiple forms of capital with

which we transact every day, it opens the door for an evolutionary approach to economics and profits. Regenerative Enterprise defines the difference between degenerative, sustainable, and regenerative systems. It articulates the four factors of a regenerative enterprise, and the principles for designing regenerative enterprise ecologies. The Regenerative Enterprise Institute also offers coaching and consulting services to enterprises and corporations that want to take the leap to regeneration.

With Preliminary Observations, And An Account Of Some Foreign Prisons And Hospitals Skira - Berenice

The demand for academic coursework and corporate training programs using the Internet and computer-mediated communication networks increases daily. The development and implementation of these new programs requires that traditional teaching techniques and course work be significantly reworked. This handbook consists of 20 chapters authored by experts in the field of teaching in the online environment to adult students enrolled in graduate university degree programs, corporate training programs, and continuing education courses. The book is organized to first lay a conceptual and theoretical foundation for implementing any online learning program. Topics such as psychological and group dynamics, ethical issues, and curriculum design are covered in this section. Following the establishment of this essential framework are separate sections devoted to the practical issues specific to developing a program in either an academic or corporate environment. Whether building an online learning program from the ground up or making adjustments to improve the effectiveness of an existing program, this book is an invaluable resource.--From Amazon.

Rhythms in Plants CABI

Today, forest health and the management of threats towards it are attracting more and more attention on a global scale. This book covers the most recent advances in the management of forest diseases, including the epidemiology and infection biology of forest pathogens, and forest protection based on integrated pest and disease management approaches. A comprehensive range of diseases caused by viruses, bacteria, fungi and other

organisms are discussed in detail, making this book essential reading for forest managers and extension specialists. Written by recognized authorities in the subject of forest health, this book also provides a wealth of information useful for researchers and lecturers of forest pathology and ecology.

The Oxfam Education Report Springer Science & Business Media
In recent years, the topic of environmental responsibility has been affecting policymakers and markets, and it has become a relevant issue in the multidisciplinary discussion between scientists and practitioners. Most countries have adopted new regulations and economic instruments to support environmental sustainability; at the same time, many organisations have adopted environmental policies and management tools such as the Environmental Management System (EMS). This book reviews the past, present and future of environmental management. It combines a review of differential game models of the ecological-economic systems and respective analytical techniques with original results in game theoretic modelling of the sustainable environmental management; summarises the results derived from four surveys conducted in Italy from 2008 to 2015, that involved the Italian ISO 14001 certified organisations in exploring their interest on the adoption of other environmental tools and labels; presents a holistic framework for analysing, assessing and improvement of environmental management in agriculture, and assesses the forms, factors and efficiency of agro-eco-management in Bulgaria during post-communist transition, European integration, and EU CAP implementation; and finally, presents key environmental and climate change challenges and opportunities in the Balkan Peninsula and in relation to alignment to the European Union (EU).

Historical Mapping Psychology Press

Processes of multi-scalar regional urbanization are occurring worldwide. Such processes are clearly distinguishable from those of the nineteenth and twentieth centuries due to the shifting concepts of both the city and the metropolis. International literature highlights how what we have historically associated with the idea of cities has long been subjected to consistent reconfiguration, which involves stressing some of the typical features of the idea of "cityness". *Post-Metropolitan Territories: Looking for a New Urbanity* is the product of a research project funded by the Italian Ministry for Education, Universities and

Research (MIUR). It constitutes a thorough overview of a country that is one of Europe's most diverse in terms of regional development and performance: Italy. This book brings together case studies of a number of Italian cities and their hinterlands and looks at new forms of urbanization, exploring themes of sustainability, industrialization, de-industrialization, governance, city planning and quality of life. This volume will be of great interest to academics and students who study regional development, economic geography and urban studies, as well as civil servants and policymakers in the field of spatial planning, urban policy, territorial policies and governance.

Notes of a Journey Through France and Italy Springer Science & Business Media

This book reviews recent progress in assessing underlying mechanisms controlling plant circadian and ultradian oscillations, and their physiological implications for growth, development, and adaptive responses to the environment. It focuses on mechanisms and theoretical concepts at the level of the cell to the entire plant. Written by a diverse group of leading researchers, this book will spark the interest of readers from many branches of science.

Constitution ... [members ... History] Edward Elgar Publishing
Since winning the bid to host the Olympic Games in 2008, Beijing became intent on revitalizing its image as the capital of a nation capable of taking a leading role in the world. This text presents an illustrated, in-depth investigation of the Chinese capital with a special focus on the changes in its urban layout between 1990 and 2005.

When I was about fifteen, my Biological Sciences teacher, Prof. N. Benacchio, lent me a book by Paul de Kruif "The Microbe Hunters" and I remained fascinated by infectious diseases. I was intrigued by the potency of virulent bacteria which are constantly trying to invade our bodies and often overcome what today we call innate and adoptive immunity. Indeed, shortly after that, I was struck by his tragic death due to peritonitis. Later, while studying medicine (although medical knowledge in the 1950s was almost primordial

compared with today), I soon realised how the various biological systems were wonderfully organised but at the same time frail and how our life could end in a few minutes. Slowly it became obvious that our "wellness" was the result of a dynamic and very unstable equilibrium between health and disease. This unstable equilibrium could be broken forever if the body's response could not reverse the pathological state. I stuck a sort of poster on the wall of my room with these three words and connecting arrows: HEALTH~? DISEASE -? DEATH As I don't believe in another world after death, it became obvious to me that we should make every possible effort not only to delay death, but to try always to shift the equilibrium to the left. In this book, I will try to show that this can be achieved, as a last resort, even with ozonotherapy.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The State Of The Prisons In England And Wales Springer

This book covers research into the most important practices in product line organization. Contributors offer experience-based knowledge on the domain and application engineering, the modeling and management of variability, and the design and use of tools to support the management of product line-related knowledge.

Rivista di frutticoltura e di ortofloricoltura John Wiley & Sons
What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high

seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

An Updated Approach Seven Stories Press

These volumes bring to a close the only comprehensive edition of the surviving correspondence of William Morris (1834-1896), a protean figure who exerted a major influence as poet, craftsman, master printer, and designer. Volumes III and IV, taken together, give in detail the comments and observations that articulate his problematic political and artistic stands and equally problematic position within the aesthetic movement as it developed in the 1890s. Most eloquently voiced also are the complexities of his troubled marriage and his devotion to his epileptic daughter, Jenny, and his other daughter, May. But dominating all these themes, organizing and structuring them, are the Kelmscott Press and the building of Morris's important library of medieval manuscripts and early printed books. The letters record the way

in which the Press becomes not only the center of Morris's aesthetic ambitions and achievements but also the site for his closest human relations and for much of his connecting with the makers of early modernism. The letters in Volumes III and IV are thoroughly annotated, and through texts and notes provide a new assessment of Morris's career. Included also, as appendices to Volume IV, are two important documents: the first, never before published, is F. S. Ellis's Valuation List of Morris's library, made after Morris's death, and the second, never before reprinted, is the text of what was to be Morris's final essay on socialism, published in April 1896. Originally published in 1995. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Software Product Lines Springer Science & Business Media
'Perrini et al provide a detailed, authoritative look at the evolving European perspective on corporate social responsibility. They show how Europe has moved from follower status to leading edge practice. The book is the best current indicator of what the next stages of CSR will look like.' - Thomas W. Dunfee, University of Pennsylvania, US
The rapidly increasing attention devoted to

Corporate Social Responsibility (CSR) has resulted in the term 'CSR' being applied to myriad dissimilar phenomena. The authors therefore aim to dispel this confusion by presenting a multi-faceted view of socially responsible corporate behavior and related themes. They provide a conceptualization of CSR that emphasizes the role of the adoption and implementation of specific CSR strategies and their impact on corporate social and economic performance.

Graphic Design Worlds/words. Catalogo Della Mostra (Milano, 26 Gennaio-27 Marzo 2011) Gruppo 24 Ore

In recent years, Alternative Food Networks (AFNs) have been a key issue both in the scientific community and in public debates. This is due to their profound implications for rural development, local sustainability, and bio-economics. This edited collection discusses what the main determinants of the participation of operators – both consumers and producers – in AFNs are, what the conditions for their sustainability are, what their social and environmental effects are, and how they are distributed geographically. Further discussions include the effect of AFNs in structuring the food chain and how AFNs can be successfully scaled up. The authors explicitly take an interdisciplinary approach to analyse AFNs from different perspectives, using as an example the Italian region of Piedmont, a particularly interesting case study due to the diffusion of AFNs in the area, as well as due to the fact that it was in this region that the 'Slow Food' movement originated.
