Atlas of Clinical Ophthalmology Lippincott Williams & Wilkins Featuring brilliant art, engaging new case studies, and dynamic new teaching and learning

resources, this 9th edition of Porth's Pathophysiology: Concepts of Altered Health States is captivating, accessible, and student-friendly while retaining the comprehensive, nursing-focused coverage that has made it a market leader. The book's unique emphasis on “concepts” of altered health states, as opposed to factual descriptions of diseases and disorders, helps students grasp both the physical and

psychological aspects of altered health. Drawing on the expertise of new co-author Sheila Grossman, the Ninth Edition maintains its comprehensive depth, while paring down content where appropriate and replacing descriptive content with striking art. (Approximately 600 illustrations are new or have been re-rendered in a consistent modern style.) Also new to this edition are advanced 3D narrated animations

that address the most clinically relevant and difficult to understand disorders, engaging unit-opening case studies that reinforce critical thinking and set the tone for the content to come, and a wide range of built-in study tools. Now, for the first time, Porth's Pathophysiology is supported by PrepU, an adaptive learning system that help students learn more, while giving

instructors the data they need to monitor each student's progress, strengths, and weaknesses.

At the last

Annual Representative Meeting of the British Medical Association a motion was passed that "certain additional cannabinoids should be legalized for wider medicinal use." This report supports this landmark statement by reviewing the scientific evidence for the therapeutic use of cannabinoids and sets the agenda for change. It will be welcomed by those who

believe that cannabinoids can be used in medical treatment. The report discusses in a clear and readable form the use and adverse effects of the drug for nausea, multiple sclerosis, pain, epilepsy, glaucoma, and asthma. Kanski's Clinical Ophthalmology E-Book F A Davis Company This book is a concise guide to contact lens fitting for optometrists and trainees. Beginning

with an introduction to contact lenses and the pre-contact lens fitting eye examination, making sure a patient is suitable for wearing contact lenses, the following chapters describe the fitting of different types of corrective lens - soft, toric and rigid gas permeable. Separate chapters examine the use of therapeutic contact lenses, used to protect the eye whilst it

heals after injury or infection, rather than to correct vision; and lenses for presbyopia, age-related long-sightedness.
