Heaven And Hell Mary I. Oliver, Clark Night

A gripping biography by the author of *Brave New World* The life of Father Joseph, Cardinal Richelieu's aide, was a shocking paradox. After spending his days directing operations on the battlefield, Father Joseph would pass the night in prayer, or in composing spiritual guidance for the nuns in his care. He was an aspirant to sainthood and a practising mystic, yet his ruthless exercise of power succeeded in prolonging the unspeakable horrors of the Thirty Years' War. In his masterful biography, Huxley explores how an intensely religious man could lead such a life and how he reconciled the seemingly opposing moral systems of religion and politics.

Could drugs offer a new way of seeing the world? In 1953, in the presence of an investigator, Aldous Huxley took four-tenths of a gramme of mescaline, sat down and waited to see what would happen. When he opened his eyes everything, from the flowers in a vase to the creases in his trousers, was transformed. His account of his experience, and his vision for all that psychedelics could offer to mankind, has influenced writers, artists and thinkers around the world. The Collected Poetry of Aldous Huxley McClelland & Stewart

The graphic novel adaptation of the classic dystopian masterpiece. From Fred Fordham, graphic novelist behind the sensational *TO KILL A MOCKINGBIRD* graphic novel. Originally published in 1932, *Brave New World* is one of the most revered and profound works of twentieth century literature. Touching on themes of control, humanity, technology, and influence, Aldous Huxley's enduring classic is a reflection and a warning of the age in which it was written, yet remains frighteningly relevant today. With its surreal imagery and otherworldly backdrop, *Brave New World* adapts beautifully to the graphic novel form. Fred Fordham's singular artistic flair and attention to detail and color captures this thought-provoking novel as never before, and introduces it to a new generation, and countless modern readers, in a fresh and compelling way.

Those Barren Leaves Open Road Media

What is persistent pain? How do we communicate pain, not only in words but in visual images and gesture? How do we respond to the pain of another, and can we do it better? Can explaining how pain works help us handle it? This unique compilation of voices addresses these and bigger questions. Defined as having lasted over three months, persistent pain changes the brain and nervous system so pain no longer warns of danger: it seems to be a fault in the system. It is a major cause of disability globally, but it remains difficult to communicate, a problem both to those with

pain and those who try to help. Language struggles to bridge the gap, and it raises ethical challenges in its management unlike those of other common conditions. Encountering Pain shares leading research into the potential value of visual images and non-verbal forms of communication as means of improving clinician-patient interaction. It is divided into four sections: hearing, seeing, speaking, and a final series of contributions on the future for persistent pain. The chapters are accompanied by vivid photographs co-created with those who live with pain. The volume integrates the voices of leading scientists, academics and contemporary artists with poetry and poignant personal testimonies to provide a manual for understanding the meanings of pain, for healthcare professionals, pain patients, students, academics and artists. The voices and experiences of those living with pain are central, providing tools for discussion and future research, shifting register between creative, academic and personal contributions from diverse cultures and weaving them together to offer new understanding, knowledge and hope.

A Natural Path to Better Vision Unlike the dystopian vision described in *Brave New World*, or the psychedelic vision described in his *The Doors of Perception*, in *The Art of Seeing*, Aldous Huxley focuses on the actual vision of the human eye. Documenting his own profound near blindness and subsequent attempts to improve his own sight, Huxley offers a thorough instruction manual on the controversial alternative vision therapy exercises developed by W. H. Bates. Although Huxley remained visually challenged throughout his life, he explains how and why he was able to get significant benefits from the "Bates Method" and was determined to share his discovery with the world. "Since optical glass was no longer doing me any good, I decided to take the plunge. Within a couple of months, I was reading without glasses . . . without strain and fatigue," he wrote of the beginning of his process. Huxley discusses the physiology of the eye and how it can heal; the effects of disease and emotion; eye movement exercises; blinking and breathing; relaxation and many more approaches to improved optical and mental function. He describes the process of improving your vision as an art rather than a science. Those familiar with Huxley's work won't be surprised to learn that *The Art of Seeing* is more than just a dry manual-it is a thorough discussion of the physiology and psychology of human sight. Huxley fans and those interested in the art of seeing will find this a must read.

Brave New World author Aldous Huxley on enlightenment and the "ultimate reality". In this anthology of twenty-six essays and other writings, Huxley discusses the nature of God,

enlightenment, being, good and evil, religion, eternity, and the divine. Huxley consistently examined the spiritual basis of both the individual and human society, always seeking to reach an authentic and clearly defined experience of the divine. Featuring an introduction by renowned religious scholar Huston Smith, this celebration of "ultimate reality" proves relevant and prophetic in addressing the spiritual hunger so many feel today.

MAGNIFICENT VOYAGERS Random House

Selected writings from the author of *Brave New World* and *The Doors of Perception* on the role of psychedelics in society. • Includes letters and lectures by Huxley never published elsewhere. In May 1953 Aldous Huxley took four-tenths of a gram of mescaline. The mystical and transcendent experience that followed set him off on an exploration that was to produce a revolutionary body of work about the inner reaches of the human mind. Huxley was decades ahead of his time in his anticipation of the dangers modern culture was creating through explosive population increase, headlong technological advance, and militant nationalism, and he saw psychedelics as the greatest means at our disposal to "remind adults that the real world is very different from the misshapen universe they have created for themselves by means of their culture-conditioned prejudices." Much of Huxley's writings following his 1953 mescaline experiment can be seen as his attempt to reveal the power of these substances to awaken a sense of the sacred in people living in a technological society hostile to mystical revelations. *Moksha*, a Sanskrit word meaning "liberation," is a collection of the prophetic and visionary writings of Aldous Huxley. It includes selections from his acclaimed novels *Brave New World* and *Island*, both of which envision societies centered around the use of psychedelics as stabilizing forces, as well as pieces from *The Doors of Perception* and *Heaven and Hell*, his famous works on consciousness expansion.

Brave New World: A Graphic Novel Reaktion Books

In one of his most significant pieces of non-fiction, the mind behind *Brave New World* presents a thorough and articulate comparison of different forms of mysticism. Written for an audience presumed to be primarily familiar with Christianity, *The Perennial Philosophy* aims to extract greater

theological truths from the common threads found across religions, and to explore how they can be used to judge mankind (and how it often fails to meet the standards set). It primarily consists of quotations taken from famous figures within each tradition, with short connecting passages written by Huxley. In his prescient vision of the 21st century, Huxley explores Buddhist ideology, nuclear threat and 'big oil' corporate greed. For over a hundred years the Pacific island of Pala has been the scene of a unique experiment in civilisation. Its inhabitants live in a society where western science has been brought together with Eastern philosophy to create a paradise on Earth. When cynical journalist, Will Farnaby, arrives to research potential oil reserves on Pala, he quickly falls in love with the way of life on the island. Soon the need to complete his mission becomes an intolerable burden and he must make a difficult choice. In counterpoint to *Brave New World* and *Ape and Essence*, *Island* gives us Huxley's vision of utopia. WITH AN INTRODUCTION BY DAVID BRADSHAW

Aldous Huxley- a major figure of the literary and intellectual history of this century- dramatizes here one man's disillusionment threatening to plunge the world into a new morass.

Encountering Pain Random House

Inspired by the poetry of William Blake, *Heaven and Hell* delves into the murky topic of human consciousness through a discussion of religious mystical perception, biochemistry and psychoactive drug experimentation. *Heaven and Hell* explains how science, art, religion, literature, and psychoactive drugs can expand the reader's everyday view of reality, offering a more profound grasp of the human experience. Like his earlier essay, *The Doors of Perception*, Aldous Huxley's *Heaven and Hell* exerted a tremendous influence on the counter-culture movement of the 1960s, inspiring the imaginations of an entire generation of artists and revolutionaries like Jim Morrison and Jackson Pollack. HarperTorch brings great works of non-fiction and the dramatic arts to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. In the twenty-first century we are confronted with a rapidly changing world full of social, economic and environmental uncertainties. We are all inherently connected to this changing world and in order to create the best possible conditions for life to thrive, we must each develop an inner capacity to respond and adapt to life in new, creative and innovative ways. The author of this visionary book argues that the path to a happy, healthy and peaceful world begins with the individual. By learning to recognise our cognitive habits of interrupting and defining life through our fixed ideas, labels and judgements, we can begin to develop a dynamic way of seeing that enables us to perceive and respond to life with greater attentiveness. *First Steps in Seeing* reveals a practical set of stepping stones that guide the reader into this dynamic way of seeing and relating. Using personal stories, practical exercises and real-world case studies in development, education and business, the author takes the reader on a journey to explore how to give our full attention to

life, and how to enliven the world that we each co-create. An inspiring guide for all those working for social change in youth work, business, education or research, or simply seeking fresh paths in life.

'The man who comes back through the Door in the Wall will never be quite the same as the man who went out'. Aldous Huxley first took mescaline in 1953 and continued his experiments with hallucinogenic drugs until 1963 when, on his deathbed, he asked for and was given LSD. Huxley explores the effects of the mescaline experience, describing how the drug enabled him to discover a 'sacramental vision of reality'. He also discusses the spiritual and moral implications of the experience, demonstrating how negative emotions can transform man's perceptual Nirvana into a 'schizophrenic hell'.
