Forgotten
Books
The image of
the scrum – a
beleaguered
politican
surrounded by

jockeying
reporters – is
central to our
perception of
Ottawa. The
modern scrum
began with

the arrival of television, but even in Sir John A. Macdonald's day, a century earlier, reporters in the parliamentary press gallery had waited outside the prime minister's office, pen in hand, hoping for a quote for the next edition. The scrum represents the test of wills, the contest of wits, and the battle for control that have characterized the relationship between

Canadian prime ministers and journalists for more than 125 years. Scrum Wars chronicles this relationship. It is an anecdotal as well as analytical account, showing how earlier prime ministers like Sir John A. Macdonald and Sir Wilfrid Laurier were able to exercise control over what was written about their administrators, while more recent leaders like John Diefenbaker,

Joe Clark, John Turner, and Brian Mulroney often found themselves at the mercy of intense media scrutiny and comment. [Of the Annual Report of the American Historical Association for the Year 1950](#) Oxford University Press The second of live volumes planned to give a systematic account of Japanese literature from its beginnings to the death of the modern novelist Mishima, this

book establishes the character of the literature of the early Middle Ages, from the ninth to the mid-twelfth century. Originally published in 1986. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions

preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. [A Study of Baseball, Basketball and Football](#)

[Fiction of the 1930s through 1960s](#)
Martinus Nijhoff Publishers
In the 'Moscow Declaration' of 1943 the Allies officially propagated the notion of Austria as the first victim of Hitlerite aggression and announced their intention to set up a "free and independent Austria" after the war, which finally happened in 1955. By questioning why it took so long to get to this point, the

author
addresses
issues such as
the victim
thesis,
Austrians as
perpetrators,
Austrian anti-
Semitism and
official
attempts to
mitigate its
effects after
the war. He
discusses the
various
proposals for
post-war
Austria and
connects for
the first time
the issues of
Anschluss,
German
question, Cold
War, and the

He makes it
clear that the
question of
Austria was
from the very

beginning
inextricably
linked with the
more
important
question of
Germany.

This volume
has richly
enhanced
General Henry
H. "Hap"
Arnold's
reputation as
the father of

today's United
States Air
Force. Major
General John
W. Huston,
himself an
Army Air
Forces combat
veteran of the
war, has
edited each of
Arnold's World
War II diaries
and placed
them in their
historical
context while
explaining the
problems Hap
faced and
evaluating the
results of his
travels.
General
Huston, a
professional
historian, has
taught at both
the US Air
Force
Academy and
the US Naval

Academy. A former Chief of the Office of Air Force History and an experienced researcher both here and abroad in the personal and official papers of the war's leaders, he has been careful to let Hap speak for himself. The result is an account of the four-year odyssey that took Arnold to every continent but one as he took part in deliberations that involved Allied leaders in major diplomacy/strategy meetings

with Franklin D. Roosevelt, Harry S Truman, Winston Churchill, Josef Stalin, Charles de Gaulle, and Chiang Kai-shek. At those meetings, Hap recorded the comments of the various participants. His 12 diaries contain his own thoughts, which range from being lost over the Himalayas to comforting the wounded as they were airlifted from the Normandy beaches. He experienced an air raid in London and viewed the

carnage in recently liberated Manila. Arnold recorded his honest impressions, from private meetings with King George VI in Buckingham Palace to eating from mess kits with his combat crews in the North African desert - all while perceptively commenting on the many issues involved and assessing the people, the culture, and the surroundings. This volume offers the best

assessment we have of Hap as he survived four wartime heart attacks and continued to work tirelessly for proper recognition of airpower. It will also continue my emphasis while Chief of Staff of the US Air Force on encouraging professional reading through making historical accounts available to personnel of the finest air force in the world, a success achieved in large part

because of Hap Arnold. Ronald R. Fogleman General, United States Air Force, Retired *American Airpower Comes of Age* Greenwood Publishing Group During World War II, the United States helped vanquish the Axis powers by converting its enormous economic capacities into military might. Producing nearly two-thirds of all the munitions used by Allied forces, American

industry became what President Franklin D. Roosevelt called "the arsenal of democracy." Crucial in this effort were business leaders. Some of these captains of industry went to Washington to coordinate the mobilization, while others led their companies to churn out weapons. In this way, the private sector won the war—or so the story goes. Based on new research in business and

military archives, Destructive Creation shows that the enormous mobilization effort relied not only on the capacities of private companies but also on massive public investment and robust government regulation. This public-private partnership involved plenty of government-business cooperation, but it also generated antagonism in the American business community

that had lasting repercussions for American politics. Many business leaders, still engaged in political battles against the New Deal, regarded the wartime government as an overreaching regulator and a threatening rival. In response, they mounted an aggressive campaign that touted the achievements of for-profit firms while dismissing the value of public-sector contributions.

This probusiness story about mobilization was a political success, not just during the war, but afterward, as it shaped reconversion policy and the transformation of the American military-industrial complex. Offering a groundbreaking account of the inner workings of the "arsenal of democracy," Destructive Creation also suggests how the struggle to define its heroes and villains has

continued to shape economic and political development to the present day.

Scrum Wars

The Minerva Group, Inc. Drawing on substantial new research, Saville focuses on the role of Ernest Bevin and his differences with Clement Attlee, particularly with regard to the Middle East.

Countering the widely held view that Bevin sought accommodation with the Soviet Union, he reveals

Labour's Foreign Secretary as a fervent ideologue, wholly in agreement with the deep-seated anti-Sovietism of his permanent officials.

This volume is number five in the 11-volume Handbook of the History of Logic. It covers the first 50 years of the development of mathematical logic in the 20th century,

and concentrates on the achievements of the great names of the period-- Russell, Post, Gödel, Tarski, Church, and the like. This was the period in which mathematical logic gave mature expression to its four main parts: set theory, model theory, proof theory and recursion theory. Collectively, this work ranks as one of the greatest achievements of our intellectual history.

Written by leading researchers in the field, both this volume and the Handbook as a whole are definitive reference tools for senior undergraduates, graduate students and researchers in the history of logic, the history of philosophy, and any discipline, such as mathematics, computer science, and artificial intelligence, for whom the historical background of his or her

work is a salient consideration.

- The entire range of modal logic is covered
- Serves as a singular contribution to the intellectual history of the 20th century
- Contains the latest scholarly discoveries and interpretative insights

Outstanding approach to continuum mechanics. Its high mathematical level of teaching together with abstracts, summaries, boxes of essential formulae and numerous exercises with solutions, makes this handbook one of most

complete books in the area. Students, lecturers, and practitioners will find this handbook a rich source for their studies or daily work.

Writings on American History, 1948, Vol. 2

Harvard University Press
Short subject films have a long history in American cinemas. These could be anywhere from 2 to 40 minutes long and were used as a "filler" in a picture show that would include a

cartoon, a newsreel, possibly a serial and a short before launching into the feature film. Shorts could tackle any topic of interest: an unusual travelogue, a comedy, musical revues, sports, nature or popular vaudeville acts. With the advent of sound-on-film in the mid-to-late 1920s, makers of earlier silent short subjects began experimenting with the short films, using them as a

testing ground for the use of sound in feature movies. After the Second World War, and the rising popularity of television, short subject films became far too expensive to produce and they had mostly disappeared from the screens by the late 1950s. This encyclopedia offers comprehensive listings of American short subject films from the 1920s through the 1950s. Sources of

Ball Tales McGill-Queen's Press - MQUP
 US Foreign Policy in World History is a survey of US foreign relations and its perceived crusade to spread liberty and democracy in the two hundred years since the

American Revolution.
 David Ryan undertakes a systematic and material analysis of US foreign policy, whilst also explaining the policymakers' grand ideas, ideologies and constructs that have shaped US diplomacy. US Foreign Policy explores these arguments by taking a thematic approach structured around central episodes and ideas in the history of US foreign relations and policy making, including: *

The Monroe Doctrine, its philosophical goals and impact *
 Imperialism and expansionism *
 Decolonization and self-determination * the Cold War * Third World development * the Soviet 'evil empire', the Sandinistas and the 'rogue' regime of Saddam Hussein * the place of goal for economic integration within foreign affairs.

Winner of the Texas State Historical Association

Coral Horton Tullis Memorial Prize for Best Book on Texas History, this authoritative study of red-baiting in Texas reveals that what began as a coalition against communism became a fierce power struggle between conservative and liberal politics.

An Extraordinary Re-creation of World War II through the Eyes and Minds of Hitler, Churchill, Roosev

Hardpress Publishing
In 1946, Edgar N. Johnson, later Professor of European History at the University of Nebraska, served as a political advisor for the American military government in Berlin. In diary-like letters, he described his meetings with important actors in American occupation politics such as General Lucius D. Clay, many representative s of the other occupying powers, and

leading German political and cultural figures.

Since unification, the Federal Republic of Germany has made vaunted efforts to make amends for the crimes of the Third Reich. Yet it remains the case that the demands for restitution by many countries that

were occupied during the Second World War are unresolved, and recent demands from Greece and Poland have only reignited old debates. This book reconstructs the German occupation of Poland and Greece and gives a thorough accounting of these debates. Working from the perspective of international law, it deepens the scholarly discourse around the issue, clarifying the

'never-ending story' of German reparations policy and making a principled call for further action. A compilation of primary sources comprising 125 annotated key texts (512 pages) on the complexity of reparations discussions covering the period between 1941 and the end of 2017 is available for free on the Berghahn Books website, doi: 10.3167/9781800732575.dd .
