Protein-Calorie Malnutrition reviews the state of knowledge of metabolic phenomena in the syndromes embraced by the general term protein-calorie malnutrition (PCM), and places this new knowledge in perspective with the traditional descriptions of kwashiorkar and marasmus. The clarification it provides constitutes a benchmark for design of future programs of prevention, therapy, rehabilitation, research, or teaching. Highly noteworthy are the new advances in amino acid and protein metabolism; the enlightening evidence concerning lysine and carnitine; the evidences of derangements or deficiencies of the broad spectrum of nutrients from carbohydrates to vitamins and minerals; and the implications of these for recovery and therapy. This book includes papers on the following: the impact of age on amino acid requirements; the

mechanisms of adaptation to low-protein intakes; the metabolic consequences of essential amino acid deficiency in higher animals; carbohydrate metabolism; vitamin deficiencies associated with PCM; and mineral metabolism in PCM. Other studies deal with the effects of malnutrition on endocrine function; liver function in PCM; the synergistic interaction of malnutrition and infection; and the treatment and prevention of PCM.

Everybody is distinct from one another in terms of their personalities, appearances, tastes, and lives. People are strange. To meet the ideal criteria—that we are both typical and distinctive—we must juggle our identities. That we blend in while standing out. It's a paradox because we need to be superior to others in order to live in the harsh society, but we also need to be similar to everyone else in order to fit in. We often have trouble figuring out who we are in society, whether we're teenagers or adults. Humans are social creatures. We require people and one another.

But as a result, a lot of us struggle to stand out from the crowd—or, as people like to say, to discover what makes us unique.

“Who Lies Within” is a book of 30+ writers who have penned down their thoughts on identity crisis and few other topics.

A Thousand Lives

The trademark hat, booming rich baritone, intent smouldering eyes, a towering height, and an imposing presence only a dramatic description would possibly delineate this versatile painter of sinister strokes, who left a tremendous, hypnotic impact on Indian cinema. Amrish Puri, whose voice could send shivers down your spine, while his antics made you chuckle; his costumes could drive you nuts, and his one-liners ranging from Mogambo khush hua to Dong kabhi wrong nahin hota became household parlance. The industry's ace villain was credited

with bringing the hitherto mundane villainy into strobe light, and lent it a pride of place on the billboard with his unmatched histrionics. This son of the soil, born in the heart of Punjab in Naushahr, spent his formative years in the hilly regions and trekked miles in the Valley of Simla, the summer capital of British India. He followed his creative instincts in college rather surreptitiously, given the stern scrutiny of a conservative, authoritarian father. Moved to the tinsel town of Bombay in the early 1950s, where his elder siblings Chaman and Madan Puri were already groping in the glamour world and he had to write his own destiny. After initial heartbreaks, dejected as a hero aspirant, he turned to theatre and created an amazing repertoire essaying some of the most challenging roles under the aegis of stalwarts, like Ebrahim Alkazi, Satyadev Dubey, Vijay Tendulkar, Girish Karnad, Badal Sircar and Mohan Rakesh, among others. But pursuing this innate passion for stage didn't provide for livelihood; bread and butter came from the

rigmarole of a clerical job in a government office. And recording advertisement jingles and radio plays extended a little icing on the cake. The providential break on the silver screen came at an age when lesser mortals would be resolving mid-career crisis. And once again, he made a distinct mark in offbeat, parallel cinema of Shyam Benegal and Govind Nihalani, as he subtly transplanted the stark profundity of theatre on to celluloid. But the real litmus test was the commercial viability of his talent, as he could also rake in revenue at the box-office. Here too, he graduated with stunning performances, and became the highest paid villain breathing life into characters as the bald baddie, the cold-blooded don, the ruthless politician, the lecherous viper. The Machiavellian prince evoked the essence of evil and went on to build a treasure of excellence, whether he played a wily father or an affectionate patriarch. This star-actor became a reckoning force in both Hindi and regional films with over 300 titles in his kitty. His brilliant renditions elicited the attention of renowned

Hollywood director Steven Spielberg, thus emerging on the international horizon. The book captures poignant moments in the life of a terrific performer with the class act of a chameleon, who depicted an era that encountered the most challenging facet of blending art and commerce, seeking triumph over the paradox of playing the negative and positive, to create cinematic history. Hats off!

In this informative new book, Ravi Kalia continues

his examination of the planning of Indian cities begun with his earlier study of Chandigarh. Here, Kalia makes systematic inquiries into the political circumstances that brought about modern Bhubaneswar, the capital of the state of Orissa, to reveal the historical and social circumstances that shaped the city. In this account, Kalia brilliantly shows the interplay of indigenous religious forces, regional loyalty, and Western secular ideas in the context of twentieth-century international architecture and planning movements. This book will prove invaluable to historians, architects, planners, sociologists, and scholars interested in India, as well as those interested in urban planning in developing countries. Dreams are essential. There will be no desire to pursue without dreams. There will be no objective to achieve. Without

dreams, we'd all be nothing. It's like pursuing an invisible shadow if you don't have any dreams. It's a merry-go-round. We need to know what we want to do and then go after it. We can't do anything in life until we have objectives, and in order to achieve these goals, we must dream. The majority of people have dreams. It doesn't matter if they're big or small. Even the most successful people have dreams, and it is their dreams that have propelled them to where they are now. A human being's ability to dream is critical. You will lose interest in life and eventually despise it if you do not have dreams. You will become bored and tired of the same repetitive daily routines, and you will lose interest in even the most thrilling things. Only via dreams will you discover a reason to live your life. You'll begin to work hard toward your goal and never lose interest in life. You'll never get bored, and you'll always be motivated. This is the most effective method for achieving achievement. "The Far-Fetched Dreams" is a book contributed by 31 writers who have penned down

their thoughts, dreams and experiences.

Hope can be a wish for something to occur, a desire for things to improve, or a specific ambition or aspiration. It is crucial for us to have hope in our lives and to look forward with optimism. Hope also serves as a significant barrier against invasive or potentially dangerous ideas. Also, hope is very personal, so it's crucial not to let other people's opinions influence how you judge your success. Your goals are significant to you personally. "Asha: A Ray of Hope" is an anthology based on the theme of hope.
