*The Elgar Companion to ASEAN* Disha Publications

This volume is the fully revised and updated version of the first comprehensive commentary on the Convention on the Elimination of All Forms of Discrimination against Women and its Optional Protocol. It reflects the developments during the decade following the publication of the first edition in 2012, which has also seen a notable rise in individual complaints (more than 85), ten new General Recommendations, and six new inquiry procedures as well as numerous statements, partly in conjunction with other UN human rights bodies. The Convention is a key international human rights instrument and the only one exclusively addressed to women. It has been described as the United Nations' 'landmark treaty in the struggle for women's rights'. At a time when the backlash against women's human rights and the concept of gender-based discrimination is increasingly challenged by governments and powerful societal actors, the Commentary is an important instrument to hold all state powers to account on their international obligations under the Convention. The Commentary analyses the interpretation of the Convention through the work of its monitoring body, the Committee on the Elimination of Discrimination against Women. It comprises detailed analyses of the Preamble and each article of the Convention and of the Optional Protocol, including a separate chapter on the cross-cutting substantive issue of violence against women. The sources relied on are the treaty language and the general recommendations, concluding observations, and case law under the Optional Protocol (individual complaints and inquiries), through which the Committee has interpreted and applied the Convention. Each chapter is self-contained, but the Commentary is conceived of as an integral whole. The book also includes an introduction which provides an overview of the Convention and its embedding in the international law of human rights as well as the most recent challenges to women's human rights worldwide.

**HIV-1 Genetic Diversity** Penguin Random House South Africa

This proceedings present current trends in the transport growth. It presents transport solutions both at a micro-level, such as that of a single city or a single company, as well as at a macro-level of a whole transportation system. The transport decisions made by an individual in regards to the transport mode and route, add up to the structure and efficiency of the whole system. Transport systems cannot grow extensively anymore, due to lack of space or the amount of additional costs, so the authors presents new solutions, ones which are innovative and sustainable, while also increasing the efficiency of transport operations. These solutions are analyzed for performance at a scale of individual cities or companies, as well as whole transport systems. The researchers, who are often also practitioners in the field of transport, provide not only the theoretical background for the transport analysis but also empirical data and practical experience.

Northern Lights on Civic and Citizenship Education Oxford University Press

*Metalloenzymes: From Bench to Bedside* offers a thorough overview of metalloenzymes, spanning biochemical and structural features, pharmacology, and biotechnological applications. After a brief overview, international experts in the field discuss a wide range of magnesium, calcium, zinc, manganese, nickel, iron, copper, cadmium, molybdenum, and tungsten enzymes, along with catalytic roles within their active sites. With a uniform approach throughout, each chapter includes the structure and function of the enzyme, physiologic and pathologic roles, inhibitors and activators of the enzyme (and their design), and clinical agents or compounds applied in medicine and drug discovery. This book enables scientists across academia and industry to adopt ongoing metalloenzyme research, and continuous discovery of novel metalloenzymes, in new life science studies and clinical applications. Examines a range of metalloenzymes, from biochemistry to pharmacology and drug design Each chapter examines enzyme structure and function, physiologic and pathologic roles, inhibitors and activators, and clinical application Features chapter contributions from international experts in the field

*Pain Management and the Opioid Epidemic* Routledge

This book offers critical insights into the China-led Belt and Road Initiative (BRI) from an EU perspective. It analyzes the political, cultural, and diplomatic effectiveness of Xi's efforts to expand socio-cultural ties and build new trade corridors between Europe and the Far East, and sheds light on the lasting success and influence of China-led economic programs. The book is divided into three parts. The first part provides an overview of the various dimensions of the BRI initiative, including the challenges and opportunities of the EU-China trade relationship, China's geopolitical interests, and foreign policy approaches. The second part analyzes BRI cooperation from the perspective of the business sector, while the third part presents case studies that examine the impacts and responses of various European countries to the BRI.

Transport Development Challenges in the 21st Century National Trust

Sarah Merker brings you 50 scone recipes from the National Trust. History is best enjoyed with a scone, as everyone who's visited a National Trust house knows. This book brings you the best of both. Scone obsessive Sarah Merker has gathered 50 - yes 50 - scone recipes from National Trust experts around the country. And she's written a quirky guide to 50 National Trust places to delight and entertain you while you bake or eat those blissful treats. Eccentric owners, strange treasures, obscure facts - it's all here. Whip up a Triple Chocolate scone while you read about the mechanical elephants at Waddesdon Manor. Or savour an Apple & Cinnamon scone while you absorb the dramatic love life of Henry Cecil of Hanbury Hall. Marvel at a Ightham Mote's Grade 1 listed dog kennel while you savour a Cheese, Spring Onion and Bacon scone. 50 of the best scones in history. And 50 of the best places to read about. You'll never need to leave the kitchen again.

""Belongs on every individual investor's shelf."--Smart Money Standard & Poor's is recognized as the world's leading provider of securities information. "Standard & Poor's Stock and Bond Guide,

2003 Edition, is a complete directory and performance guide to more than 14,000 stocks, bonds, and mutual funds. Investors get all the vital data they need to make the most informed stock picks--including hard-to-find, detailed coverage of convertible and preferred stocks.

Metalloenzymes Frontiers Media SA

This third volume, like its predecessors, adds to the growing body of literature concerned with the history of biblical interpretation. With eighteen essays on nineteen biblical interpreters, volume 3 expands the scope of scholars, both traditional and modern, covered in this now multivolume series. Each chapter provides a biographical sketch of its respective scholar(s), an overview of their major contributions to the field, explanations of their theoretical and methodological approaches to interpretation, and evaluations and applications of their methods. By focusing on the contexts in which these scholars lived and worked, these essays show what defining features qualify these scholars as "pillars" in the history of biblical interpretation. While identifying a scholar as a "pillar" is somewhat subjective, this volume defines a pillar as one who has made a distinctive contribution by using and exemplifying a clear method that has pushed the discipline forward, at least within a given context and time period. This volume is ideal for any class on the history of biblical interpretation and for those who want a greater understanding of how the field of biblical studies has developed and how certain interpreters have played a formative role in that development.

**The Un Convention on the Elimination of All Forms of Discrimination Against Women and Its Optional Protocol**  
World Scientific

Criminals in Hong Kong and China are often superstitiously religious. Ironically, both they and police officers worship the same folk god, Guan Gong, who represents righteousness! But their religiosity has no moral consequences - what both groups are seeking is protection from their opponents. Unfortunately, some Asian Christians have a similar model of religiosity. They want God's protection and blessings, but they do not want God to affect how they live. James will have none of this. He is convinced that our devotion to God must be reflected in the way we live, and so he writes a letter that is full of sound, practical advice. He exhorts us to control our tongues, he speaks against greed, envy, and wrong desires, and he gives wise advice about enduring

suffering, praying for ailing believers, and restoring believers who are tempted to depart from the truth. Using Asian applications, this commentary of James highlights the relevance the triune God has in all contexts of life. The Asia Bible Commentary Series empowers Christian believers in Asia to read the Bible from within their respective contexts. Holistic in its approach to the text, each exposition of the biblical books combines exegesis and application. The ultimate goal is to strengthen the Body of Christ in Asia by providing pastoral and contextual exposition of every book of the Bible.

*Standard & Poor's Stock and Bond Guide* Springer

CRISPR/Cas is a recently described defense system that protects bacteria and archaea against invasion by mobile genetic elements such as viruses and plasmids. A wide spectrum of distinct CRISPR/Cas systems has been identified in at least half of the available prokaryotic genomes. On-going structural and functional analyses have resulted in a far greater insight into the functions and possible applications of these systems, although many secrets remain to be discovered. In this book, experts summarize the state of the art in this exciting field.

*OECD Public Governance Reviews Strengthening Analytics in Mexico's Supreme Audit Institution Considerations and Priorities for Assessing Integrity Risks* Springer Nature

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

The Bankers Encyclopedia Frontiers Media SA

This open access book presents an in-depth analysis of data from ICCS. An international group of scholars critically address the state of civic and citizenship education in the four Nordic countries that participated in the IEA International Civic and Citizenship Education Study (ICCS) in 2009 and 2016. The findings are of particular relevance to educators at all levels, from school education through to teacher education. Nordic countries have long traditions of democracy and their students have performed relatively well in the ICCS assessments. Nonetheless, citizenship education continues to evolve and has received increasing attention in recent educational reforms, indicating policymakers understanding that schools play an important role in establishing democratic values among future citizens. Data from ICCS can be used to analyze, discuss, and reflect on the status of civic and citizenship education and can contribute to the discourse on the potential role of education in contributing to sustainable democracies for a common future. However, teaching citizenship and learning democracy are two different things. While young people can be taught about democracy in school, it is vital that schools work together with the wider community in which youth operate to strengthen civic understanding and values for all young people regardless of their social and economic background.

*The Man Who Founded the ANC* MSU Press

This report explores ways for Mexico's supreme audit institution, Auditoría Superior de la Federación (ASF), to strengthen its use of analytics. While the report focuses on the use of data to enhance the detection of integrity risks, it also recognises the implications of better analytics for the ASF's broader digital transformation strategy.

**China and the Belt and Road Initiative** Waxmann Verlag

This encyclopedia provides an authoritative guide intended for students of all levels of studies, offering multidisciplinary insight and analysis of over 500 headwords covering the main concepts of Security and Non-traditional Security, and their relation to other scholarly fields and aspects of real-world issues in the contemporary geopolitical world.

Physics, Chemistry And Application Of Nanostructures: Reviews And Short Notes To Nanomeeting-2017 Edward Elgar Publishing

This book presents invited reviews and original short notes of recent results obtained in studies concerning the fabrication and

application of nanostructures, which hold great promise for the new generation of electronic, optoelectronic and energy conversion devices. They present achievements discussed at Special Sessions "Frontiers of Molecular Diagnostics with Nanostructures" and "Nanoelectromagnetics" organized within Nanomeeting-2017. Discussing exciting and relatively new topics such as fast-progressing nanoelectronics and optoelectronics, molecular electronics and spintronics, nanoelectromagnetics, nanophotonics, nanosensorics and nanoenergetics as well as nanotechnology and quantum processing of information, this book gives readers a more complete understanding of the practical applications of nanotechnology and nanostructures.

*Challenging Life: Existential Questions as a Resource for Education* EduGorilla Community Pvt. Ltd.

In 1910 Isaiah Shembe was struggling. He had left his family and quit his job as a sanitation worker to become a Baptist evangelist, but he ended his first mission without much to show. Little did he know that he would soon establish the Nazaretha Church as he began to attract attention from people left behind by industrial capitalism in South Africa. By his death in 1935, Shembe was an internationally known prophet and healer, described by his peers as "better off than all the Black people." In *A Prophet of the People: Isaiah Shembe and the Making of a South African Church*, historian Lauren V. Jarvis provides a fascinating and intimate portrait of one of South Africa's most famous religious figures, and in turn the making of modern South Africa. Following Shembe from his birth in the 1860s across many environments and contexts, Jarvis illuminates the tight links between the spread of Christianity, strategies of evasion, and the capacious forms of community that continue to shape South Africa today.

*CRISPR-Cas Systems* Springer Nature

How do we respond to harm faced by young people beyond their front doors? Can practitioners keep young people safe at school, in their neighbourhoods or with their friends when social care systems are designed to work with families? The *Contextual*

*Safeguarding* approach has transformed how policy makers, social care leaders, practitioners and researchers understand harm that happens to young people in their communities and what is required to respond. Since 2015 it has been tested across the UK and internationally. This book shares stories from child sexual exploitation, child criminal exploitation and peer violence about what has been learnt on this journey. For anyone interested in how we safeguard young people beyond their front doors, this book shows how much we have achieved and raises big questions about what more we need to do to ensure young people are safe – whatever the context.

*Bond Guide* Springer Nature

Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

*The Nova Scotia Atlas* Formac Publishing Company

Food is the first necessity for humans to survive with huge amounts of food consumed daily worldwide. Globalization of food industry results in an increasingly complex food chain, making food safety a universal issue. Many millions of people in the world become sick while hundreds of thousand die annually due to consumption of contaminated food. Pathogenic bacteria contaminate food at any stages in the food chain, including production, processing, supplying, and storage. The most commonly known bacterial pathogens associated with human foodborne diseases worldwide are *Salmonella enterica*, *Campylobacter jejuni*, *Escherichia coli*, *Listeria monocytogenes*, *Cronobacter sakazakii*, *Vibrio cholerae*, and *Vibrio parahaemolyticus*. This eBook includes publications on recent discoveries in genetic diversity, prevalence, resistance and novel transmission vectors; molecular mechanisms underlying the pathogenesis; and new compounds and treatment strategies for better control of the human foodborne pathogenic bacteria. The information in the articles supports the urgent need for improving food safety and public health, particularly in globalization background.

**Sensory Processing in Vision and Olfaction - Common Features of Key Players** Oxford University Press

Providing a contemporary discussion of ASEAN, this holistic Companion critically examines the organisation's characteristics, strengths and weaknesses, politics and policies, internal dynamics, and external relations. This fascinating and informative Companion makes a significant contribution to the literature on ASEAN, providing a comprehensive overview of the organisation and evaluating multidisciplinary perspectives on Southeast Asian regionalism.

*Contextual Safeguarding* Springer Science & Business Media

COVID-19 is the most severe pandemic the world has experienced in a century. This book analyses major legal and regulatory responses internationally to COVID-19, and the impact the pandemic has had on human rights and freedoms, governance, the obligations of states and individuals, as well the role of the World Health Organization and other international bodies during this time. The authors examine notable legal challenges to public health measures enforced during the pandemic, such as lockdown orders, curfews, and vaccine mandates. Importantly, the book contextualizes the legal analysis by examining the broader social and economic dimensions of risks posed by the pandemic. The book considers how COVID-19 impacted the operation of the criminal justice system, civil litigation concerning negligently caused deaths and business losses arising from contractual breaches, consumer protection litigation, disciplinary regulation of health practitioners, coronial inquests and other investigations of unexpected deaths, and occupational health and safety issues. The book reflects on the role of the law in facilitating the remarkable scientific and epidemiological achievements during the pandemic, but also the challenges of ensuring the swift production and equitable distribution of treatments and vaccines. It concludes by considering the possibilities that the legal and regulatory responses to this pandemic have illuminated for effectively tackling future global health crises.
