Jy het by my verbygestrompel en op hierdie dubbelbed neergeval. Ek het jou na die koppenent se kant toe probeer sleep. Die man wat my knieë lam gemaak het wanneer hy in uniform tussen ander staan, was pap en swaar, 'n dronk pateet. Die Weermag, die noodlot, die sisteem — het 'n man en beskermer, 'n mens wat 'n morele leier kon gewees het, van my gesteel. Die man op ons dubbelbed kon enigiets gewees het, enigiets. Maar jy moes drink om die oorlog in jou kop beëindig te kry. Die dampe van die drank in die vertrekke van ons huis was oorlogsdampe. Maretha Maartens en Magda Slabbert neem hande om in Klankgrens die verhaal van pyn, oorlewing en die diepe worstelinge van die grensoorlog se weermagvroue oop te vlek. Uit die oogpunt van die vrouens wat moes agterbly, wat moes aanhou, wat moes verstaan, en kop bo water hou, leer ken ons vir Jo en haar kinders en die stryd wat die vrouens gevoer het, weg van die grens.

Frankie se gesin is anders. Behalwe dat haar pa soos Atilla die Hun lyk, met sy wilde hare en harige voorarms, kom hy van Vlaandere en hy praat nog steeds Nederlands "" en soms 'n bietjie Frans as hy Frankie wil treiter. Hy ry met 'n Big Boy-bromponie en het sy eie kookskool. Haar ma, weer, het in die hippie-jare vasgesteek, dra batik-broeke en het die hele planeet en al sy bewoners lief. Dis waarom sy lensies eet en V8-groentesap drink. En Frankie? Sy is mal oor skaatsplank ry en

In September of 1893, Norwegian zoologist Fridtjof Nansen and a crew manned the schooner Fram, intending to drift, frozen in the Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and his companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go "farthest north." They survived a winter in a moss hut eating walruses and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration.

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Destructive forces have been eroding the University of Cape Town, Africa's leading university. This book tells the sad, true tale of what has been transpiring. It is a saga of lunacy, criminality, pandering, and identity politics. The mad and the bad - the deranged, deluded, the depraved - have been granted endless latitude in bullying and abusing others. The decline began in 2015 with the Rhodes Must Fall protest that resulted in the offending statue's removal within a month, and which spawned similar protests abroad. Emboldened by their local success, the protestors issued new and

ever-increasing demands later that year and then again in 2016 and 2017. Their methods also became criminal - including intimidation, assault, and arson. The university leadership capitulated to this behaviour, and this fostered a broader and now pervasive toxic environment within the institution. These developments offer important lessons for universities around the world that are yielding to the forces of a faux "progressivism".
