Creating intelligent forms can be challenging. Forms have to present critical information in a compact format. Interactive forms that respond to data entry by the user require some programming. Dynamic forms also have to work seamlessly with the database that collects customer information. Plus, forms need to be designed well to eliminate confusion and entice completion by the user. As shown in this book, LiveCycle Designer addresses the many objectives of forms creation. It offers a digital handshake between the graphic designer and the data programmer. LiveCycle Designer lets form designers create more compelling and dynamic documents than is possible with Acrobat or Microsoft Word. Forms created with LiveCycle Designer automatically expand to accommodate different amounts of data and report that information back to a database. The new version of LiveCycle Designer (ES4) allows for the first time forms to be deployed in HTML5 format, so they can be used on a wider array of devices (page sizes can adjust to smaller screens) and in a wider range of software systems (no special reader or plugin needed to use them, just a Web browser). Adobe LiveCycle Designer: Creating Dynamic PDF and HTML5 Forms for Desktop and Mobile Applications shows design strategies as well as the technical underpinnings of PDF and XFA (Adobe XML Forms Architecture), the tools necessary to create intelligent forms. Dies ist ein Expertenbuch für Programmierer und SAP-Formularentwickler, die bei der Arbeit mit dem LiveCycle Designer für Adobe Forms über knifflige Anforderungen stolpern. Die Anreicherung eines Interactive-Form-/XFA-PDF-Templates mit zusätzlicher Logik wird mit diesem Buch zum Standardfall. Die Autoren führen durch praxisbewährte Lösungen, mit denen sich diese konkreten Probleme erstaunlich schnell lösen lassen. Ein grober Überblick klärt zunächst die Begriffe »Skripte« und »Events«, wie diese prinzipiell programmiert werden und wie der Adobe-Aktionsgenerator dabei unterstützen kann. Die Autoren zeigen viele hilfreiche Scripting-Tricks und einige diffizile Sonderfälle bei der Datenversorgung von Formularen. Dabei gehen Sie ganz gezielt auf die verschiedenen Vorgehensweisen für die beiden Formate Druckformular und Interaktives Formular ein. Für Letztere stellt sich zudem die Frage, wie die Formulareingaben an den ursprünglichen Formularersteller zurückgelangen. Weitere Hilfestellung erhält der Leser für komplizierte Besonderheiten beim Befüllen von Tabellen oder für Probleme beim Formular-Ausdruck. - Scripte für ein Interactive-Form-/XFA-PDF-Template - Formulare im LiveCycle Designer geschickt konfigurieren - XML für Einbindung von Interactive-Forms/PDF-Formularen in die DV-Landschaft - Möglichkeiten der Datenbindung für Formularfelder

This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like "Reliable Code Execution on a Tamagotchi," "ELFs are Dorky, Elves are Cool," "Burning a Phone," "Forget Not the Humble Timing Attack," and "A Sermon on Hacker Privilege." Twenty-four

full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.
