Awarded the Nobel Prize for Literature in 1969, Samuel Beckett's influence on 20th century fiction and drama is immeasurable. Published in conjunction with the RT (Radio Telef s ireann) Thomas Davis Lecture Series to mark the centenary of Beckett's birth, Samuel Beckett - 100 Years consists of thirteen essays by many of the foremost academics studying Beckett today. Literary luminaries such as John Banville and Anthony Cronin line up alongside philosophers Dermot Moran and Richard Kearney to delve into the psyche of the man responsible for classics such as *Murphy*, *Krapp's Last Tape*, and *Waiting for Godot*, while actors Barry McGovern

and Rosemary Pountney describe what makes his works so theatrical. The book is a challenging and serious look at Beckett's work and its impact on literature today.

162 pages and more than 450 illustrations and charts, size 8.25 x 10.75 inches. This publication is a reproduction of the original Honda factory Workshop manual. This group of twin cylinder Honda motorcycles began with the introduction of the 1959 to 1967 four speed 250cc CB72 and 305cc CB77 series. A workshop manual for these earlier models can be found under ISBN 9781588500731. The models covered in this manual are the twin cylinder 1968 to 1973 five speed CB250 (K0 K5) CL250 (K0 K2) and the CB350 (K0 K4), CL350 (K0 K5) and SL350 (K0 K2). Also included are the front disc brake CB250G and CB350G models. Beginning in 1968 and extending through the 1975 model year, the 'K' suffix often, but not always, changed on an

annual basis. 'K0' was used to indicate the first model in the series with updated versions identified as K1, K2, K3 etc. While the 'K' number designations continued in use outside the USA through 1978, in September 1973, American Honda adopted a year identifier within the model number - for example a CT70'76 would be a 1976 model. Therefore, while the use of the letter 'K' suffix has become accepted practice to identify the progression of a particular model by year of production it can, at times, be misleading. For example, Honda occasionally identifies the 1968 models in the CB250/350 series as the CB250 & CB350 without the use of the 'K0' suffix and sometimes 'bypasses' the use of K1 for the 1969 models and jumps to K2 for the 1970 models. Setting this potential for confusion aside and reverting to what has become generally accepted usage of the 'K' suffix, we can state that this manual covers the five speed K0, K1, K2, K3, K4, K5 and disc brake models of the CB250 & CB350 and their variants from 1968 through 1973. Finally, please note that the text in the original Honda Factory Workshop Manual was translated from Japanese into English. Consequently, some

of the phrasing, grammar, punctuation and word usage may be subtly different from that commonly used in the English language. However, the information, as presented, is readily understandable. In addition, while we have done our best to identify any anomalies and errors that may have occurred during the original translation process, we are certain that we will have missed one or two and we request your indulgence in ignoring them.
