SIENA DAVENPORT

More Than 200 Items You Can't Be Without Penguin

"This book provides a valuable resource for promoting current academic discourse on innovation in knowledge-intensive organizations and contexts"--Provided by publisher.

Concepts for Organizational Creativity and Collaborative Design

David Zwirner Books
Toxicological Effects of
Veterinary Medicinal
Products in Humans is the
first definitive guide to
discuss the adverse
effects of veterinary
medicinal products in
humans. The chapters
focus on occupational
safety and consumer
issues and examine the
circumstances under

which exposure is likely to occur. To be in context, it reviews this against the background of adverse health effects from other sources in the veterinary and farming professions. The book examines adverse drug effects reported to regulatory agencies (mainly the FDA's Center for Veterinary Medicine) and then considers a series of individual drugs, including antibiotics, anaesthetics

and organophosphorus compounds. The chapters also discuss the fundamental aspects of regulatory issues relating to safety assessment, and examine the manner in which user safety is assessed prior to authorisation/approval and what measures can be taken after authorisation/approval in the light of findings from pharmacovigilance activities. There is growing concern over the issue of antimicrobial resistance and the contribution made by

veterinary medicinal products. This too is addressed along with the significance to human health and measures that can be taken to mitigate the effects (if any) of the use of antibiotics in animals e.g. prudent use measures. The book will be an essential resource for medical practitioners in hospitals and general practice, pharmaceutical industry scientists, analysts, regulators and risk managers. *Business Week* FT Press Bold is a radical how-to guide for using

exponential technologies, moonshot thinking, and crowd-powered tools to create extraordinary wealth while also positively impacting the lives of billions. A follow-up to the authors' *Abundance* (2012).

Fun in the Dark: A Guide to Successful Night Photography

Basic Books

You've had a kid or two . . . or three. Now, every time you look in the mirror you ask yourself, "Who the hell is that tired, washed out woman looking back at me?"

What happened to the stylish, stiletto-wearing woman who prided herself on living the fabulous life? It's time to reclaim your pre-baby body, mind, and mojo. No more sulking, stressing, or resenting other moms who have it more together than you and wondering how they do it. Motherhood is a B#tch! tells you how YOU can do it. This guide tells it like it is and explains how women lose their sense of self once they have children and why it's so important to reclaim it. Motherhood is a B#tch!

tackles the toughest issues facing moms today and empowers you to regain your once fierce and fab self. In the end, you'll be happier, healthier, and hotter than ever. Motherhood is a B#tch! is the modern mom's bible for dealing with the day-to-day chaos with style and grace. It's written for the stressed out working mom and the harried stay-at-home mom, who have sacrificed their lives, careers, bodies, and sanity to become moms. And, honey, it's time to take it

all back!
"O'Reilly Media, Inc."
How could General Electric--perhaps America's most iconic corporation--suffer such a swift and sudden fall from grace? This is the definitive history of General Electric's epic decline, as told by the two Wall Street Journal reporters who covered its fall. Since its founding in 1892, GE has been more than just a corporation. For generations, it was job security, a solidly safe investment, and an elite business education for top

managers. GE electrified America, powering everything from lightbulbs to turbines, and became fully integrated into the American societal mindset as few companies ever had. And after two decades of leadership under legendary CEO Jack Welch, GE entered the twenty-first century as America's most valuable corporation. Yet, fewer than two decades later, the GE of old was gone. *Lights Out* examines how Welch's handpicked successor, Jeff Immelt, tried to fix flaws in

Welch's profit machine, while stumbling headlong into mistakes of his own. In the end, GE's traditional win-at-all-costs driven culture seemed to lose its direction, which ultimately caused the company's decline on both a personal and organizational scale. *Lights Out* details how one of America's all-time great companies has been reduced to a cautionary tale for our times.

Turning Fear and Doubt into Fuel for Brilliance Currency

A critical exploration of

today's global imperative to innovate, by champions, critics, and reformers of innovation. Corporate executives, politicians, and school board leaders agree—Americans must innovate. Innovation experts fuel this demand with books and services that instruct aspiring innovators in best practices, personal habits, and workplace cultures for fostering innovation. But critics have begun to question the unceasing promotion of innovation, pointing out its gadget-

centric shallowness, the lack of diversity among innovators, and the unequal distribution of innovation's burdens and rewards. Meanwhile, reformers work to make the training of innovators more inclusive and the outcomes of innovation more responsible. This book offers an overdue critical exploration of today's global imperative to innovate by bringing together innovation's champions, critics, and reformers in conversation. The book presents an overview of innovator

training, exploring the history, motivations, and philosophies of programs in private industry, universities, and government; offers a primer on critical innovation studies, with essays that historicize, contextualize, and problematize the drive to create innovators; and considers initiatives that seek to reform and reshape what it means to be an innovator. Contributors Errol Arkilic, Catherine Ashcraft, Leticia Britos Cavagnaro, W. Bernard Carlson, Lisa D.

Cook, Humera Fasihuddin, Maryann Feldman, Erik Fisher, Benoît Godin, Jenn Gustetic, David Guston, Eric S. Hintz, Marie Stettler Kleine, Dutch MacDonald, Mickey McManus, Sebastian Pfothenauer, Natalie Rusk, Andrew L. Russell, Lucinda M. Sanders, Brenda Trinidad, Lee Vinsel, Matthew Wisnioski *Makers* Houghton Mifflin You will need more than just food and water when the grid goes down. Many people know what they need to survive a doomsday scenario. They

stock high-calorie foods and clean water, they find their own sources of power and heat, and they prepare to defend themselves, if need be. With all they have stored, they have the ability to survive for days, even months at a time. You may think you have finished preparing once you have accumulated these basic necessities, but there is always more that can be done. In *The Pocket Guide to Prepping Supplies*, Patty Hahne offers up two hundred and thirty-five oft-forgotten

items that may prove to be indispensable for surviving the apocalypse—should it happen. From the mundane, like quality shelving and needle and thread, to more specialized tools, such as a closet auger and jumper cables, Hahne describes how each one can prove to be a vital addition to the prepper's cache. You may be surprised to see what common household items can do when used creatively, and Hahne is here to help inspire you. Presented in a compact

design, *The Pocket Guide to Prepping Supplies* is an important addition to any prepper's book collection, one that can be carried in a purse or pocket, stored in the car, or slipped into that carefully prepared bug-out bag.

Jonathan Fields knows the risks-and potential power-of uncertainty. He gave up a six-figure income as a lawyer to make \$12 an hour as a personal trainer. Then, married with a 3-month old baby, he signed a lease to launch a yoga center in the heart of New York City. . . the day before 9/11. But he survived, and along the way he developed a fresh

approach to transforming uncertainty, risk of loss, and exposure to judgment into catalysts for innovation, creation, and achievement. Properly understood and harnessed, fear and uncertainty can become fuel for creative genius rather than sources of pain, anxiety, and suffering. In business, art, and life, creating on a world-class level demands bold action and leaps of faith in the face of great uncertainty. But that uncertainty can lead to fear, anxiety, paralysis,

and destruction. It can gut creativity and stifle innovation. It can keep you from taking the risks necessary to do great work and craft a deeply-rewarding life. And it can bring companies that rely on innovation grinding to a halt. That is, unless you know how to use it to your advantage. Fields draws on leading-edge technology, cognitive-science and ancient awareness-focusing techniques in a fresh, practical, non-dogmatic way. His approach enables creativity and

productivity on an entirely different level and can turn the once-tortuous journey into a more enjoyable quest. Fields will reveal how to: Make changes to your workflow that unlock buried creative potential. Build "creation hives" -- supportive groups that can supercharge and humanize the process. Tap social technology and user co-creation to add clarity, certainty, and sanity, even if you're an artist or solo-creator. Develop a set of personal practices and mindset

shifts that let you not just tolerate, but invite and even amplify, uncertainty as a catalyst for genius. Drawing on extensive case studies and research, Fields shares a set of detailed personal practices and environmental changes that can not only humanize the creative process, but also allow individuals and teams to stay more open to opportunity and play a bigger creative game. **The Art of Product Design** Proceedings of the XIII International

Symposium SymOrg 2012: Innovative Management and Business Performance Welcome to your abundant, limitless life. What if, right now, you had access to all the right tools and resources to create your universe of Abundance and attract success in all areas of life? GET TO THE FUTURE
FIRST! LEVERAGE
STRATEGIC NOVELTY (SN)
TO TRANSFORM AND
DOMINATE YOUR MARKET
Become an "outlier
organization": recognize
huge opportunities in
novelty, and act fast and
first Listen for the tremors
already building beneath
your markets Learn from
winning "outlier" business

models, organizational forms, markets, products, and services Today, the companies that rise rapidly to dominance are the outliers. They're radically novel where it matters: whether in business models, products, services, or some other key driver of value. Strategic Innovation reveals how to think like these vanguard organizations—and become one of them. You'll discover how to borrow the lenses and insights of companies operating right at the

edge of conventional industry dynamics and boundaries...where opportunities are underdefined, predictions unstable, and the greatest opportunities exist. Using linked case studies and a proven three-step methodology, the authors guide you through uncovering Strategic Novelty (SN) with explosive potential...executing quickly... and learning and tweaking relentlessly to amplify your impact. If you keep doing what everyone else is doing,

you may succeed—but not greatly, and not for long. If you want to create, transform, and dominate your market, you need to think and act like an outlier. Learn how. Now. Before someone does it to you. Right now, all around you, there's an explosion of new business models, new product/service categories, and new organizational forms. It's a veritable Cambrian Explosion of business life, led by outlier organizations you've never even heard of.

Many will remain practically invisible to the incumbents in their markets...until they suddenly explode into dominance. What do they share? A fundamental commitment to Strategic Novelty (SN). Now, in Strategic Innovation, leading innovation strategists Liisa Välikangas and Michael Gibbert show you how to leverage SN to become your industry's winning disruptor. You'll master SN through case studies from leading outlier organizations in areas

ranging from 3D printing to crowd financing and resource-constrained innovation. Each case is original, previously unpublished, and based at least in part on the authors' direct experiences. Through these cases, you'll explore how each company's story is playing out: sometimes in failure, but often in massive success. You'll discover why incumbents rarely notice outliers in time, and how to keep it from happening to you. Perhaps most valuable of all, the

authors help you extrapolate the likely impact of any novelty, so you can tell the difference between promising opportunities and those destined to fail.

Your Passport to Success University of Belgrade, Faculty of Organizational Sciences "An excellent primer on what it means to live digitally. It should be required reading for adults trying to understand the next generation." -- Nicholas Negroponte, author of *Being Digital* The first

generation of children who were born into and raised in the digital world are coming of age and reshaping the world in their image. Our economy, our politics, our culture, and even the shape of our family life are being transformed. But who are these wired young people? And what is the world they're creating going to look like? In this revised and updated edition, leading Internet and technology experts John Palfrey and Urs Gasser offer a cutting-edge sociological portrait

of these young people, who can seem, even to those merely a generation older, both extraordinarily sophisticated and strangely narrow.

Exploring a broad range of issues -- privacy concerns, the psychological effects of information overload, and larger ethical issues raised by the fact that young people's social interactions, friendships, and civic activities are now mediated by digital technologies -- *Born Digital* is essential reading for parents, teachers, and the myriad of confused

adults who want to understand the digital present and shape the digital future.

Hardware Age Que Publishing

3D Robotics co-founder and bestselling author Chris Anderson takes you to the front lines of a new industrial revolution as today's entrepreneurs, using open source design and 3-D printing, bring manufacturing to the desktop. In an age of custom-fabricated, do-it-yourself product design and creation, the collective potential of a

million garage tinkerers and enthusiasts is about to be unleashed, driving a resurgence of American manufacturing. A generation of "Makers" using the Web's innovation model will help drive the next big wave in the global economy, as the new technologies of digital design and rapid prototyping gives everyone the power to invent--creating "the long tail of things".
