[The Rich Housewife \(A gripping psychological thriller with a shocking twist\)](#) Te Neues Publishing Company
 When Ferrari of Los Gatos opened, few people could afford an expensive sports car. In 1976, the average annual income was \$12,686, and a new home cost about \$48,000. Motorists in California could only buy gas on odd or even-numbered days based on the last digit of their license plate, due to the global oil crisis. Times were tough, and people were hesitant to take chances, especially with a car that cost more than a house. At the same time, Brian Burnett and his friend Richard Rivoir had the idea of starting a Ferrari dealership. The Dealer is the story of how one dealership, Ferrari of Los Gatos, fueled the rise of the iconic Italian sports car in the U.S. market on its way to becoming the number one Ferrari dealer in North America. Even Enzo Ferrari himself took notice, flying Brian and the other dealers to Italy to show his appreciation for their success. Customers included movie stars, sports celebrities, entertainers, and some with unusual sources of income and a strong desire for a low

profile. Along the way, the two men made friends, enemies, and millions of dollars, only to lose everything in the blink of an eye. Author Jim Ciardella shows readers a part of Ferrari that no one has even seen, with behind-the-scenes stories as told to him by Richard Rivoir and Brian Burnett, their customers and employees, and other North American dealers who all rode high and eventually burned out on selling fast cars.

A leading anthrozoologist and the bestselling author of *Dog Sense* and *Cat Sense* explains why we are so drawn to pets. Historically, we relied on our pets to herd livestock, guard homes, and catch pests. But most of us don't need animals to do these things anymore. Pets have never been less necessary. And yet, pet ownership has never been more common than it is today: half of American households contain a cat, a dog, or both. Why are pets still around? In *The Animals Among Us*, John Bradshaw, one of the world's leading authorities on the relationship between humans and animals, argues that pet ownership is actually an intrinsic part of human nature. He explains how our empathy with animals evolved into a desire for pets, why we still welcome them into our families, and why we mourn them so deeply when they die. Drawing on the latest research in biology and psychology, as well as fields as diverse as robotics and musicology, *The Animals Among Us* is a surprising and affectionate history of humanity's best friends.

In *Fault Line*, Sarah Andrews' seventh absorbing mystery, forensic geologist Emily Hansen finds herself in a heavenly situation—for a geologist, anyway. Here, Salt Lake City, on the verge of hosting the Olympics, is hit with a major earthquake, Em's first; she's delighted to see her science at work live and in color instead of in a lab like usual. Not that it's all fun and games—the quake is minor in terms of damage, but the specter of the possibility of a much larger disaster looms. And the geological event brings her a job. For the past few months while trying to move forward in her relationship with her boyfriend, Ray, a cop in Salt Lake, Em has been consulting for and training with the FBI as an unofficial investigator; when a state-employed geologist is murdered hours after the quake, the Feds ask Em to put her special brand of detection skills to work on the case. The disaster already has the local government types edgy, and a murder at the height of the emergency gets even the governor's attention. Em must use all the investigatory tools in her arsenal to uncover what in the dead geologist's life—earthquake related or not, professional or personal—could have made her the target of a killer. Action-packed and tensely written, *Fault Line* is as much about the very real effects of an earthquake on our modern lives as it is about the science of finding a killer.

Sixteen-year-old Bentley Royce seems to have it all: an actual Bentley, tuition to a fancy private school, lavish vacations, and everything else that comes along with being an LA starlet. But after five seasons on her family's reality show, *Rolling with the Royces*, and a lifetime of dealing with her narcissistic sister, Porsche, media-obsessed mother, Mercedes, and somewhat clueless brother, Maybach, Bentley wants out. Luckily for her, without a hook for season six, cancellation is looming and freedom is nigh. With their lifestyle on the brink, however, Bentley's family starts to crumble, and one thing becomes startlingly clear—without the show, there is no family. And since Bentley loves her family, she has to do the unthinkable—save the show. But when her future brother-in-law's car goes over a cliff

with both Bentley and her sister's fiancé inside—on the day of the big made-for-TV wedding, no less—things get real. Really real. Like, not reality show real. Told in a tongue-in-cheek voice that takes a swipe at all things Hollywood, Royce Rolls is a laugh-out-loud funny romp with an LA noir twist about what it means to grow up with the cameras rolling and what really happens behind the scenes.
