Biomechanics and Physical Training of

the Horse John Wiley & Sons Winner, 2021 Reference & Bibliography Award in the 'Reference' Section, given by the Association of Jewish Libraries An unprecedented treasury of Yiddish children's stories and poems enhanced with original illustrations While there has been a recent boom in Jewish literacy and learning within the US, few resources exist to enable American Jews to experience the rich primary sources of Yiddish culture. Stepping into this void, Miriam Udel has crafted an exquisite collection: *Honey on the Page* offers a feast of beguiling original translations of stories and poems for children. Arranged thematically—from school days to the holidays—the book takes readers from Jewish holidays and history to folktales and fables, from stories of humanistic ethics to multi-generational family sagas. Featuring many works that are appearing in English for the first time, and written by both prominent and lesser-known authors, this anthology spans the Yiddish-speaking globe—drawing from materials published in Eastern Europe, New York, and Latin America from the 1910s, during the interwar period, and up through the 1970s. With its vast scope,

Honey on the Page offers a cornucopia of delights to families, individuals and educators seeking literature that speaks to Jewish children about their religious, cultural, and ethical heritage.

Complemented by whimsical, humorous illustrations by Paula Cohen, an acclaimed children's book illustrator, Udel's evocative translations of Yiddish stories and poetry will delight young and older readers alike.

Creativity & Innovation London ; Boston : Allen & Unwin

"Creativity and innovation are to events, what the heart and soul are to the living." The book aims at encouraging readers to capture the traits and develop skills for enhancing their creative and innovative capabilities, cultivating the culture of creativity and innovation. Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services.

Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and

innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees' creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.

Though there has been much discussion on the academic aspects of Japanese education abroad (e.g., high scores on international tests, lesson study), there has been little information on the non-academic aspects of Japanese schooling. This non-academic aspect is called Tokkatsu (tokubetsu katsudo). Unlike math and reading, Tokkatsu is not confined to a certain period, but extends throughout the school day and even after-school activities -- such as school excursions. It includes classroom activities such as classroom discussions, morning and afternoon meetings that take place daily, cleaning and serving lunch, school events such as sports day, school excursions, student councils, and club activities. Such activities occur every single day, throughout one's school years, from elementary school (actually, even kindergarten) to high school. They are, however, bound together by the common goals of the Tokkatsu framework. This book is the foremost attempt to address a gap in English literature on Tokkatsu. *Effective Local Management of Schools*
