 PayPal offers a wide range of payment technologies, but it's not always clear

which is the best choice for a website. This book gets under the hood to show you how the different technologies work, how to choose the right solution, and how to implement it - complete with real-world examples. The book shows developers how to integrate PayPal directly into websites to make use of its payment technologies. This allows developers, no matter what language they program in, to build shopping carts or similar channel products with

PayPal as a payment option. The book is written by a PayPal employee with great knowledge of the technology.

 Hachette UK

In E-Commerce Basics, the authors introduce the basic technological

infrastructure and basic business issues to understand when analyzing the feasibility of e-commerce initiatives. The book uses a layered approach that first presents the basic web technology that supports all e-business, then presents the e-commerce business issues, and then revisits the technology to discuss the challenges in bringing businesses on to the web. Since the web wasn't created for business purposes, the issues of combining business applications in a

technical environment are examined. This layered approach gives the reader an Understanding of the underlying infrastructure and how traditional business issues should be considered when considering e-commerce, and thus, makes it easier to grasp the strengths, limitations, and implications of various e-commerce solutions. When discussing the business of ecommerce the layered approach reflects on traditional business models used to measure successes, such

as profit and return on investment. - Layered Approach - Takes a layered approach that stresses the technology infrastructure and the business issues surrounding the integration of business and technology. -

The International
Conference on E-
commerce and Web
Technologies (EC-Web) is
a mature and well-
established forum for
researchers working in
the area of electronic
commerce and web
technologies. These are
the proceedings of the
ninth conference in the
series, which, like
previous EC-Web

conferences, was co-
located with DEXA, the
International Conference
on Database and Expert
Systems Applications,
which, this year, took
place in Turin, Italy. One
key feature of EC-Web is
its two-fold nature: it
brings together both
papers proposing
technological solutions for
e-commerce and the
World Wide Web, and
papers concerning the
management of e-
commerce, such as web
marketing, the impact of
e-commerce on business
processes and

organizations, the
analysis of case studies,
as well as social aspects
of e-commerce (to
understand the impact of
e-commerce solutions on
day-to-day life and the
new opportunities that
these behaviors open).
The technical program
included 12 reviewed
papers and two invited
papers. Each paper was
reviewed by five
reviewers, in order to
select only the best
quality papers. The
program included five
sessions: "Security in E-
Commerce" (with two

papers), “Social Aspects of E-Commerce” (with two papers), “Business Process and EC Infrastructures” (with three papers), “Recommender Systems and E-Negotiations” (with four papers) and “Web Marketing and User Profiling” (with three papers). We found the program interesting and we hope participants and readers feel the same. Furthermore, we hope the attendees enjoyed the conference and Turin. June 2008 Giuseppe Psaila Roland R. Wagner
