A thought-provoking, original appraisal of the meaning of religion by the host of public radio's *On Being* Krista Tippett, widely becoming known as the Bill Moyers of radio, is one of the country's most intelligent and insightful commentators on religion, ethics, and the human spirit. With this book, she draws on her own life story and her intimate conversations with both ordinary and famous figures, including Elie Wiesel, Karen Armstrong, and Thich Nhat Hanh, to explore complex subjects like science, love, virtue, and violence within the context of spirituality and everyday life. Her way of speaking about the mysteries of life-and of listening with care to those who endeavor to understand those mysteries--is nothing short of revolutionary.

A book for students of all ages and all degrees of experience. The most comprehensive account of clinical methods on the market. This long established textbook of clinical method has been thoroughly revised, with fewer chapters, so as to concentrate on the basic principles of history and examination in all the various clinical settings which medical students need to master.
