INTRODUCTION  
TO DATA  
COMMUNICATIONS  
AND NETWORKING  
Data  
communications refers  
to the transmission of  
this digital data  
between two or more  
computers and a  
computer network or

data network is a telecommunications network that allows computers to exchange data. The physical connection between networked computing devices is established using either cable media or wireless media. Data Communication & Computer Network - Tutorialspoint For example, a common example of data communications is a computer connected to the Internet via a Wi-Fi connection, which uses a wireless medium to send and receive data from one or more remote servers. Some devices/technologies used in data communications are known as data communication equipment (DCE) and data terminal equipment (DTE). What
