The ability to demonstrate that a specific health care profession provides valuable and effective services that meet society's health needs is a major objective for all health care academicians and researchers. Such skills are critical to ensure service reimbursement from an increasingly small pool of health care dollars. Demonstrating clinical effectiveness depends on the reporting of written research results through journal publication so that the health care community and larger society will be able to access and read evidence supporting health care services. Today, several clinical reporting standard guidelines have been created by researchers to enhance the ability of readers to evaluate the quality and value of studies. Journal Article Writing and Publication is the first text to compile those clinical research reporting standards in one source and helps educators and novice researchers to better understand the skills needed for journal publication. Health care researchers must begin using these reporting standards in

order to write manuscripts that are both correctly formatted and transparently convey all critical study strengths and limitations. Educators must teach these reporting standards to students who must evaluate research reports as consumers and possible future contributors to the literature through their own writing. Journal Article Writing and Publication by Dr. Sharon A. Gutman (a former editor of the American Journal of Occupational Therapy) provides specific guidelines, based on the most commonly accepted reporting standards, for the preparation and writing of general research studies, intervention effectiveness studies, instrument development and testing studies, and case reports. A section is devoted to helping authors understand the rules governing the reporting of statistical data in text and tables. Separate sections help authors understand the manuscript preparation and submission process, the revision process, and the etiquette guiding communication with editors and reviewers. Guidelines for the preparation of scholarly discussion papers and editorials are also provided. Journal Article Writing and Publication also features a section that aims to help doctoral students and newly minted faculty turn academic work and dissertations into publishable journal articles. Suggestions are provided to help clinicians turn clinical data into research databases that could serve as the foundation for pilot studies. Finally, information is provided to help authors better understand the ethical considerations of publication including plagiarism, dual submissions, inappropriate authorship, copyright, and conflict of interest.

Worldview of social occupational therapy reinforces the importance of the field and underscores the growing practice and theoretical field for global occupational therapy. In-depth analysis of social issues is incorporated throughout the text along with a detailed analysis of the potential contributions of occupational therapists to their societies. Focus on the social role of occupational therapy highlights the role of occupational therapy as a social profession and prepares readers to respond to social issues. Theoretical and practical chapters talk about occupational therapy and social challenges. Emphasis on human rights and social issues reflects the World Federation of Occupational Therapists Minimum Standards for the Education of Occupational Therapists.

Occupational therapists who work with adults with neurological problems must be able to appropriately and quickly use a variety of screening methods to pinpoint deficit areas and assess how these have impaired the person's daily life function. This comprehensive book compiles the most common occupational therapy screening methods used with adults with neurological conditions. Presented as a step-by-step instruction manual, the book includes copies of all screens and is presented in an easy-to-use format that facilitates its use in the clinic and in home health and community-based settings. It is also an ideal text for students, clearly outlining how to administer neurological screens in occupational therapy practice.

Extensive use of photographs enhances the instructions and clearly shows practitioners how to use the various techniques. Book jacket.

"Quick Reference Neuroscience for Rehabilitation Professionals is a concise and quick reference for the practitioner and student who are learning or reviewing the most relevant neuroscience principles supporting rehabilitation therapy. The updated Third Edition continues to meet a need in the rehabilitation profession that has gone unfilled--the ability to break down neuroscience information into the essential principles that can be used to understand neurological conditions and the principles underlying rehabilitation evaluation and practice. Quick Reference Neuroscience for Rehabilitation Professionals, Third Edition provides a quick review of a specific neuroscience concept or critical neuroscience principles supporting a specific rehabilitation intervention. In this era of information overload, this text rapidly and thoroughly provides condensed information in a user-friendly, easy-to-use format for the practitioner to better convey that information to a patient. Dr. Sharon Gutman has divided the text into three primary sections: the first addresses neuroanatomy; the second addresses the function of neurological systems underlying physical, psychiatric, cognitive, and visual perceptual disorders; and the final section addresses clinical neuropathology related to aging, addiction, memory, and the neurological substrates of sex and gender. A specific section describes the common neurodiagnostic tests that therapists do not administer but must have knowledge of when results are discussed at treatment team meetings"--Provided by publisher.

ONE OF THE MOST ANTICIPATED BOOKS OF THE SUMMER BY POPSUGAR, FROLIC, PARADE, TRAVEL & LEISURE, SHE KNOWS, and SHE READS! NAMED

A REAL SIMPLE BEST BOOK OF 2020 (SO FAR). "Fast Girls is a compelling, thrilling look at what it takes to be a female Olympian in pre-war

America...Brava to Elise Hooper for bringing these inspiring heroines to the wide audience they so richly deserve."—Tara Conklin, New York Times

bestselling author of *The Last Romantics* and *The House Girl* Acclaimed author Elise Hooper explores the gripping, real life history of female athletes, members of the first integrated women's Olympic team, and their journeys to the 1936 summer games in Berlin, Nazi Germany. Perfect for readers who love untold stories of amazing women, such as *The Only Woman in the Room*, *Hidden Figures*, and *The Lost Girls of Paris*. In the 1928 Olympics, Chicago's Betty Robinson competes as a member of the first-ever women's delegation in track and field. Destined for further glory, she returns home feted as America's Golden Girl until a nearly-fatal airplane crash threatens to end everything. Outside of Boston, Louise Stokes, one of the few black girls in her town, sees competing as an opportunity to overcome the limitations placed on her. Eager to prove that she has what it takes to be a champion, she risks everything to join the Olympic team. From Missouri, Helen Stephens, awkward, tomboyish, and poor, is considered an outcast by her schoolmates, but she dreams of escaping the hardships of her farm life through athletic success. Her aspirations appear impossible until a chance encounter changes her life. These three athletes will join with others to defy society's expectations of what women can achieve. As tensions bring the United States and Europe closer and closer to the brink of war, Betty, Louise, and Helen must fight for the chance to compete as the fastest women in the world amidst the pomp and pageantry of the Nazi-sponsored 1936 Olympics in Berlin.

*Using Environments to Enable Occupational Performance* is a unique new text that specifically focuses on how environments (physical, social, cultural, institutional) can be used by occupational therapists to enable occupational performance with all types of clients. This informative text provides a framework to think about how environments fit into occupational therapy theory and practice. Examples of different approaches to occupational therapy intervention involving environments are demonstrated in a comprehensive format. Community settings, institutions, mental health, pediatrics, hand rehabilitation, health promotion, and gerontology are just a few of the areas covered inside. Each chapter contains "real world" scenarios from occupational therapists about how the environment can be used to optimize occupational performance. Review questions are also included that ask the reader to apply the learned knowledge in a variety of settings. These features, along with the shared expertise of contributing authors, are beneficial to both students and clinicians in reinforcing the theory-practice link.
