Commutative Algebra Exercises Solutions - quintinlake.com Commutative Algebra Exercises Solutions the given solution, possibly discussing it with others, but always making sure they can eventually solve the whole exercise entirely on their own. In any event, students v vi

Preface should read the given solution, even if they think they already know it, just to make sure; also, some Commutative Algebra Exercises Solutions - modularscale.com Solution:  $xyz = 1$  implies that  $x(yz) = 1$ . Let  $yz = a$ . Then we have  $xa = 1$  and so  $ax = 1$  since  $a$  is invertible and  $a^{-1} = x$ . (See solution 6) It follows that  $(yz)x = 1$ . Hence  $yzx = 1$ . On the other hand, if  $xyz = 1$ , it is not always true that  $yxz = 1$ . To see this, let  $G$  be the group of  $2 \times 2$  real matrices and let  $x = \begin{pmatrix} 1 & 2 & 0 & 2 \\ 0 & 1 & 2 & 1 \end{pmatrix}$  and  $z = \begin{pmatrix} 1 & 2 & 3 & 4 & 1 & 1 \\ 1 & 1 & 1 & 1 & 1 & 1 \end{pmatrix}$ .

Then  $xyz = 1$  but  $yxz \neq 1$ . The converse follows from exercise 1 and exercise 2, (ii). (ii) If  $f(x)$  is nilpotent, then we can apply induction to  $n$  to show that all its coefficients are nilpotent. The case  $n = 0$  is a tautology. In the general case, it's apparent that the leading coefficient will be nilpotent for suitable  $m \in \mathbb{N}$  hence  $a^m = 0$ .

Solutions to Atiyah and MacDonald's Introduction to ... Commutative Algebra By Allen ALTMAN and Steven KLEIMAN Version of September 1, 2013: 13Ed.tex ... "provided hints, and sometimes complete solutions, to the hard" exercises. More-over, they developed a significant amount of the main content in the exercises. By Commutative Algebra - MIT  $x^2/q$ , then  $x^{n/2} = p$  for all  $n$ , so  $yn = 2p = r(q)$ , and there exists  $m > 0$  such that  $ym = (yn)m/2q$ . Thus  $q$  is primary. Let  $\mathfrak{a}$  be the intersection of the ideals  $\text{Sp}(0)$  as  $p$  runs through the minimal prime ideals of  $A$ . Show that  $\mathfrak{a}$  is contained in the nilradical of  $A$ . Let  $P \subseteq \text{Spec}(A)$  be the set of minimal prime ideals.
