This collection brings together an interdisciplinary group of
 scholars exploring how development financing and interventions

are being shaped by a wider and more complex platform of
 actors than usually considered in the existing literature. The
 contributors also trace a changing set of key relations and
 alliances in development – those between business and
 consumers; NGOs and celebrities; philanthropic organizations and
 the state; diaspora groups and transnational advocacy networks;
 ruling elites and productive capitalists; and between ‘new donors’
 and developing country governments. Despite the diversity of
 these actors and alliances, several commonalities arise: they are
 often based on hybrid transnationalism and diffuse notions of
 development responsibility; rather than being new per se, they
 are newly being studied as engaging in practices that are now
 coming to be understood as ‘development’; and they are limited
 in their ability to act as agents of development by their lack of
 accountability or pro-poor commitment. The articles in this
 collection point to images and representations as increasingly
 important in development ‘branding’ and suggest fruitful new
 ground for critical development studies. This book was originally
 published as a special issue of Third World Quarterly.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Ordnance iUniverse

TRB's National Cooperative Highway Research Program (NCHRP) Report 705: Evaluation of Safety Strategies at Signalized Intersections explores crash modification factors (CMFs) for safety strategies at signalized intersections. CMFs are a tool for quickly estimating the impact of safety improvements.

Evaluation of Safety Strategies at Signalized Intersections John Wiley & Sons

The five-volume set LNCS 3980-3984 constitutes the refereed proceedings of the International Conference on Computational Science and Its Applications, ICCSA 2006. The volumes present a total of 664 papers organized according to the five major conference themes: computational methods, algorithms and applications high performance technical computing and networks advanced and emerging applications geometric modelling, graphics and visualization information systems and information technologies. This is Part IV.

Highly recommended." —Bill Aulet, Managing Director, The Martin Trust Center for MIT Entrepreneurship & Professor of the Practice, MIT Sloan School and Author of Disciplined Entrepreneurship "An excellent, practical guide for first time entrepreneurs building physical world products." —Laila Partridge, Managing Director, STANLEY+Techstars Accelerator "Product Realization picks up where so many product design books end. Here is the book that explains it all — chock full of shop-floor wisdom, fascinating

stories and compelling examples." —Steven Eppinger, Professor of Management Science and Engineering Systems, Massachusetts Institute of Technology "Product Realization contains the critical information and roadmap hardware entrepreneurs need as they take their concepts from prototype to production." —Ken Rother, Managing Director eLab and Visiting Lecturer of Management, Johnson Graduate School of Management, Cornell University Product Realization: Going from One to a Million delivers a comprehensive treatment of the entire product launch process from beginning to end. Drawing upon the author's extensive first-hand experience with dozens of successful product launches, the book explores the process of bringing a design from prototype to product. It illustrates the complicated and interdisciplinary process with vignettes and examples, provides checklists and templates to help teams, and points out common challenges teams will face. Perfect for both students, start-ups, and engineers in the field, Product Realization: Going from One to a Million will be the go-to reference for engineers seeking practical advice and concrete strategies to launch higher quality products, at the right cost and on time.

New Actors and Alliances in Development

The concepts of Zope 3 and its component architecture are explained thoroughly, continually accompanied by a demo application. Special sections for Zope 2 developers cover the basic differences to the predecessor.

The Massachusetts register

"TRB's National Cooperative Highway Research Program (NCHRP) 756: Highway Safety Research Agenda: Infrastructure and Operations develops a proposed agenda of prioritized safety research needs in the area of highway infrastructure and operations. The report provides options to the U.S. transportation community on how to direct research to the areas where it can provide the most benefit. The agenda is based on a prioritization methodology developed by the research team which can be applied on a recurring basis to update the agenda over time. Both the agenda and the methodology documented in this report will assist government officials, private sector employees, and academics with managing highway safety research. In addition to the report, 16 unpublished appendices (Appendices A-O and R) have been made available electronically."--Publisher description.
