 A landmark new history from design journalist Nick Hull, Land Rover Design – 70 years of Success offers a detailed insight to the company's design story, from the early days of Land Rover in Solihull to the latest generation of the Range Rover Velar in 2018. The Land Rover was born from a desperate need by the Rover Company to develop a stop-gap model to provide cashflow in the post-war years. The original aim of a simple 4x4 agricultural tool soon developed into a multi-purpose vehicle that became the mainstay of the British Army and produced numerous offshoots for the emergency services, police, forestry and aid agencies worldwide. This book details the personalities involved in the various projects since the late 1940s up to today: the designers, modellers and studio engineers. It charts the development of Land Rover and Range Rover projects in the UK, particularly those designed in the Gaydon studio that opened in 1996, and is

still a key part of JLR's design resource. From the early days of chalk drawings and wooden models to today's digital renderings and milled clays for the latest Range Rover Evoque, Land Rover's designers and technicians have never been short of creativity. This book tells their story, in their own words, and is a fitting tribute to the spirit and ethos of Land Rover design and engineering.

Within the Office of Space Science of the National Aeronautics and Space Administration (NASA) special importance is attached to exploration of the planet Mars, because it is the most like Earth of the planets in the solar system and the place where the first detection of extraterrestrial life seems most likely to be made. The failures in 1999 of two NASA missions-Mars Climate Orbiter and Mars Polar Lander-caused the space agency's program of Mars exploration to be systematically rethought, both technologically and scientifically. A new Mars Exploration Program plan (summarized in Appendix A) was announced in

October 2000. The Committee on Planetary and Lunar Exploration (COMPLEX), a standing committee of the Space Studies Board of the National Research Council, was asked to examine the scientific content of this new program. This goals of this report are the following: -Review the state of knowledge of the planet Mars, with special emphasis on findings of the most recent Mars missions and related research activities; -Review the most important Mars research opportunities in the immediate future; - Review scientific priorities for the exploration of Mars identified by COMPLEX (and other scientific advisory groups) and their motivation, and consider the degree to which recent discoveries suggest a reordering of priorities; and -Assess the congruence between NASA's evolving Mars Exploration Program plan and these recommended priorities, and suggest any adjustments that might be warranted.

The discovery of insulin at the University of Toronto in 1921-22 was one of the most dramatic events in the history of the treatment of disease. Insulin was a wonder-drug with ability to bring patients back from the very brink of death, and it was no surprise that in 1923 the Nobel Prize for Medicine was awarded to its discoverers, the Canadian research team of Banting, Best, Collip, and Macleod. In this engaging and award-winning account, historian Michael Bliss recounts the fascinating story behind the discovery of insulin - a story as much filled with fiery confrontation and intense competition as medical dedication and scientific genius. Originally published in 1982 and updated in 1996, *The Discovery of Insulin* has won the City of Toronto Book Award, the Jason Hannah Medal of the Royal Society of Canada, and the William H. Welch Medal of the American Association for the History of Medicine.

"As I was seated in remembrance and contemplation one night, in front of me appeared a great stag, shining and shimmering in whiteness, and there was a concentration of brilliant white light above its head. The stag was some feet away and was moving toward me. As it got closer, I could see that the white light on its head was emanating from a flaming brand, a torch, lit, glowing with brilliant white star-like light. The flaming brand, 'qabas' in Quranic Arabic, was as if a projection from the top of its head. The stag came straight toward me, approached me until it was so near I could have reached out and touched it, and then the flaming brand that was on its head, was suddenly but so naturally, held by it in its mouth. The stag bowed its head and placed this flaming brand, this qabas at my feet, and disappeared. As this happened the following verse flashed through my mind, and I knew I had been given permission to spread the teachings that are coming to me, and I was given the name under which to do so; It is 'Qabas', a flaming brand; a torch for warmth and a light for guidance. إِذْ رَأَىٰ نَارًا فَقَالَ لِأَهْلِهِ امْكُتُوا إِنِّي أَنَا نَارٌ هَدَىٰ قُرْآن: surah 20, ayah 10 When he saw a fire he said to his family, "tarry here, I have indeed perceived a fire maybe I can bring you from it a flaming brand or I can find guidance at the fire"\*\*\*This is the first volume in the four volume Qabas series. It collects 40 poems, composed of four series of 10 pieces each, that are collected for the blessing and spiritual state of the number 40. These poems were penned by the author during the years preceding her formal initiation into spiritual training. Works written during the beginning, middle, and end stages of her training comprise volumes 2, 3 and 4 in this series.
