This book provides the reader with an opportunity to practice the double entry system of accounting, managerial accounting, finance, audit, and full cycle accounting.

Financial Accounting 200 Multiple Choice Financial Accounting 200 Non-Multiple Choice Managerial Accounting Key Performance Indicating Metrics 200 Business Cases Financial Audit 150 Multiple Choice Financial Accounting 1 Year Full Cycle from Transactions to Financial Statements 5 Cases The solutions are provided for each question, along with an explanation, so that the student will be able to pinpoint exactly where any errors may have been made. These financial accounting questions pertain to fictitious companies with revenues from services and sales. They include sales revenue, sales returns, various expenses, capital purchases, depreciation, dividend payouts, unearned revenue, and prepaid expenses. There are also practice questions for business loans, which include the posting of interest expense as well as the principal portion of the loan repayment. The business cases involve the calculation revenue, cost of sales, wages, salaries, overhead, depreciation of buildings, depreciation of equipment, and a high-level effective tax rate. The quantitative analysis involves the calculation of gross margin, labor costs, fixed costs, net income, EBITDA, the tax effect, cashflow, and break-even sales quantity. The 5 full cycle cases are each presented as a list of transactions for a full yearly cycle, and then the reader can then prepare a full set of journal entries, as well as a general ledger, trial balance, balance sheet, income statement, statement of retained earnings, and cashflow statement. These comprehensive accounting cases cover fictitious start-up companies with revenues

from services and sales, as well as sales returns, various expenses, capital purchases, depreciation, shareholder investment and dividends, unearned revenue, prepaid expenses, the year-end closing entry to book the income statement accounts to retained earnings. Each case also includes a business loan, along with the loan amortization schedule which allows the student to practice posting journal entries for interest expense and loan repayments. This book does not teach the theory, but instead, it is intended to allow students to practice what they have learned in their introductory accounting, managerial accounting, and audit courses.

This book contains the solutions to problems in the main Introduction to Financial Accounting Textbook This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student.
