 civilenglineering.files.wordpress.com  
 Concrete is a material that is often locally  
 sourced and thus typically requires  
 minimal energy to transport to building  
 sites. Rebar for concrete is often  
 produced from recycled steel. At end of  
 life, concrete can be crushed and  
 recycled but the recycled material  
 cannot be used for new building  
 concrete. Steel: Which is the better  
 building material? Concrete or  
 steel? Structural analysis and design of
