### GEORGE ELLE

Accounting for Governmental and Nonprofit Entities John Wiley & Sons  
 Praise for Streetsmart Financial Basics for Nonprofit Managers, Third Edition "Tom McLaughlin is a proven master at making the daunting concepts of nonprofit financial management clear and engaging. This book is a superb introduction for new nonprofit executives, board members, and students. It is also an excellent refresher and reference for those of us who have been around the nonprofit sector for a while. It is well written, concise, and thought provoking." —J. Gregory Dees, Professor of the Practice of Social Entrepreneurship and Nonprofit Management at Duke University's Fuqua School of Business, and coauthor of *Enterprising Nonprofits* and *Strategic Tools for Social Entrepreneurs* "A very practical guide to understanding and managing the finances of a nonprofit organization. As nonprofits strive for greater accountability, Tom McLaughlin's real-world examples and accessible style make this book indispensable for nonprofit executives, managers,

and board members at organizations of any size." —Gordon J. Campbell, President and CEO, United Way of New York City "Tom McLaughlin's powerful book is far more than a useful tool. It provides the philosophical approach to instill strong stewardship and future viability to those in the world of nonprofits. He takes apart the complex issues of nonprofit stewardship just as Einstein translated relativity into a simple equation. Purely masterful." —Jim Mellor, Senior VP, Chief Financial Officer, YMCA of the USA Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

*Governmental Accounting Made Easy* Richard d Irwin

The national income and product accounts that underlie gross domestic product (GDP), together with other key economic data—price and employment statistics—are widely used as indicators of how well the nation is doing. GDP, however, is focused on the production of goods and services sold in markets and reveals relatively little about important production in the home and other areas outside of markets. A set of satellite accounts—in areas such as health, education, volunteer and home production, and environmental improvement or pollution—would contribute to a better understanding of major issues related to economic growth and societal well-being.

*Beyond the Market: Designing Nonmarket Accounts for the United States* hopes to encourage social scientists to make further efforts and contributions in the analysis of nonmarket activities and in corresponding data collection and accounting systems. The book illustrates new data sources and new ideas that have improved the prospects for progress.

With increased competition for external funding, technological advancement, and public expectations for transparency, not-for-profit and non-governmental organizations are facing new challenges and pressures. While research has explored the roles of accounting, accountability, and performance management in nonprofit organizations, we still lack evidence on the best practices these organizations implement in the areas of accountability and performance management. This book collects and presents that evidence for the first time, offering insights to help nonprofits face these new challenges head-on. *Performance Management in Nonprofit Organizations* focuses on both conventional and contemporary issues facing nonprofits, presenting evidence-based insights from leading scholars in the field. Chapters examine the design, implementation, and working of accounting, accountability, governance, and performance management measures, providing both retrospective and contemporary views, as well as critical commentaries on accounting and performance related issues in nonprofit organizations. The book's contributors also offer critical commentaries on the changing role of accounting and performance management in this sector. This research-based collection is an interesting and useful read for academics, practitioners, students, and consultants in nonprofit organizations, and is highly accessible to accounting and non-accounting audiences alike.

For more than 60 years, *Accounting for Governmental & Nonprofit Entities* has been the leader in the market. It is a comprehensive governmental and not-for-profit accounting text written for students who will be auditing and working in public and not-for-profit sector entities. Originally published in 1951 and written by Professor R. M. Mikesell, this book and the many subsequent editions revised by Professors Leon Hay, Earl Wilson, Susan Kattelus, Jacqueline Reck, and Suzanne Lowensohn have given generations of instructors and students a comprehensive knowledge of the specialized accounting and financial reporting practices of governmental and not-for-profit organizations, as well as an understanding of how those organizations can better meet the information needs of a diverse set of financial statement users and decision makers. The vision of these original authors continues to be reflected in this 18th edition, and their strategy of providing a large and innovative set of instructional support materials prepared and tested in the classroom by the authors continues to be a guiding principle today. The current author team brings to this edition their extensive experience teaching government and not-for-profit courses as well as insights gained from their professional experience, scholarly writing, and professional activities. The result is a relevant and accurate text that includes the most effective instructional tools.

"The current nonprofit accounting standards have been in place for 20 years. Recently, the FASB nonprofit accounting committee (NAC) agreed to significantly update the standards for nonprofit financial reporting. These changes will be formalized and released to the industry in late 2015. In addition to walking readers line by line through the financial reports key to every nonprofit organization, this edition will include the new FASB standards with detailed explanation of what they are and how to implement them correctly. The authors have deep knowledge of the FASB standards and forthcoming changes and will share their insider knowledge with readers. The new standards will focus on: 1) Reporting model for the statement of activities, 2. Net asset classification, 3. Statement of cash flows, 4. Financial statement disclosures and 5. New footnote disclosures for improving financial statement relevance and understandability!"--

*Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations*, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.
