Hurvin Anderson Prentice Hall Art History

This is the first comprehensive overview of the career to date of British artist Hurvin Anderson (b.1965). Anderson is known for painting loosely rendered 'observations' of scenes and spaces loaded with personal or communal meaning. Anderson's painting style is notable for the ease with which he slips between figuration and abstraction, playing with the tropes of earlier landscape traditions and 20th-century abstraction. His paintings of barbershop interiors, country tennis clubs and tropical roadsides teem with rich brushwork and multitudes of decorative patterns or architectural features, at once obscuring and adding to underlying ruminations on identity and place. Drawing on interviews with the artist, Michael J. Prokopow offers a critical assessment of Hurvin Anderson's painting practice to date that will be enlightening for all students, dealers and collectors of

contemporary painting.

If modernism initially came to Africa through colonial contact, what does Ethiopia's inimitable historical condition—its independence save for five years under Italian occupation—mean for its own modernist tradition? In *Modernist Art in Ethiopia*—the first book-length study of the topic—Elizabeth W. Giorgis recognizes that her home country's supposed singularity, particularly as it pertains to its history from 1900 to the present, cannot be conceived outside the broader colonial legacy. She uses the evolution of modernist art in Ethiopia to open up the intellectual, cultural, and political histories of it in a pan-African context. Giorgis explores the varied precedents of the country's political and intellectual history to understand the ways in which the import and range of visual narratives were mediated across different moments, and to reveal the conditions that account for the extraordinary dynamism of the visual arts in Ethiopia. In locating its arguments at the intersection of visual culture and literary and performance studies, *Modernist Art in Ethiopia* details how innovations in visual art intersected with shifts in philosophical and ideological narratives of modernity. The result is profoundly innovative work—a bold intellectual, cultural, and

political history of Ethiopia, with art as its centerpiece.

Janson's History of Art The Museum of Modern Art

Erwin Rosenthal's *Contemporary Art in the Light of History*, originally published in 1971, is a small masterpiece of writing on the art of the twentieth century. A scholar of medieval art by training and a prominent antiquarian bookseller, Rosenthal, who died in 1981, was equally entranced by modern art, particularly abstraction. His three linked essays in this book—"Contemporary Art in the Light of History," "Art and Technology," and "Art Theories and Manifestos, Old and New"—set out a path to understanding modern art through its affinities with the art of the past. Rosenthal engages with some of the enduring aesthetic questions: How do new forms and new artistic vocabularies respond to the deepest human needs and impulses? What is the relationship between artistic theory and artistic expression? Nicolas Poussin's mythological landscapes, Paul Klee's graphic abstractions, Bridget Riley's op-art compositions—these and many other examples from centuries of painting, sculpture, poetry, and music take us, in these pages, on a fascinating cultural journey with a sophisticated and lucid guide. Rosenthal's explorations of the theory and practice of twentieth-century artists bring us directly into the minds and studios of modern artists. What is more, like his previous *The Changing Concept of Reality in Art*, already republished by Arcade, this book invites us into a great intimacy with the origins of art.

Inventing Abstraction, 1910-1925 U of Minnesota Press

In the mid-1980s the sprouting of new movements that had driven modern art since the nineteenth century finally went

dormant, sputtering out with a last few half-hearted lels ('pattern painting', 'neo-geo', 'commodity art'). But this was not the end of art history -- far from it. In the years since, art's creative development has remained more vibrant than ever, resulting in a staggering diversity of new forms. Defining Contemporary Art responds to this unique landscape with an innovative approach to art history. Assembled and written by eight of the most prominent curators working today, all of whom have both witnessed and shaped this period, Defining Contemporary Art tells the story of the two hundred pivotal artworks of the past twenty-five years. These artworks include not only the most talked out pieces but also the quietly influential works, those which may have been overlooked at the time of their making but which went on to change the paradigm of their era. Arranged year by year, these two hundred works provide a true chronological depiction of creativity in our era, forming a mosaic in which readers may find their own patterns..

Rewritten and reorganized, this new edition weaves together the most recent scholarship, the most current thinking in art history, and the most innovative online supplements, including MyArtsLab and the Prentice Hall Digital Art Library. Experience the new Janson and re-experience

the history of art. The Portable Edition of Janson's History of Art, Eighth Edition features four lightweight, paperback books packaged together along with optional access to a powerful student website, www.myartslab.com, making the text more student friendly than ever. Janson's History of Art is still available in the original hardcover edition and in Volume I and Volume II splits. The Portable Edition is comprised of four books, each representing a major period of art history: Long established as the classic and seminal introduction to art of the Western world, the Eighth Edition of Janson's History of Art is groundbreaking. When Harry Abrams first published the History of Art in 1962, John F. Kennedy occupied the White House, and Andy Warhol was an emerging artist. Janson offered his readers a strong focus on Western art, an important consideration of technique and style, and a clear point of view. The History of Art, said Janson, was not just a stringing together of historically significant objects, but the writing of a story about their interconnections, a history of styles and of stylistic change. Janson's text focused on the visual and technical characteristics of the objects he discussed, often in extraordinarily eloquent language. Janson's History of Art helped to establish the canon of art history for many generations of scholars. The new Eighth Edition, although revised to remain current with new discoveries and scholarship, continues to follow Janson's lead in important ways: It is limited to the Western tradition, with a chapter on Islamic art and its relationship to Western art. It keeps the focus of the discussion on the object, its manufacture, and its visual character. It considers the contribution of the artist as an important part of the analysis. This edition maintains an organization along the lines established by

Janson, with separate chapters on the Northern European Renaissance, the Italian Renaissance, the High Renaissance, and Baroque art, with stylistic divisions for key periods of the modern era. Also embedded in this edition is the narrative of how art has changed over time in the cultures that Europe has claimed as its patrimony.

Comprehensive and insightful, History of Modern Art: Painting, Sculpture, Architecture, Photography is the definitive source of

information on the art of the modern era. This Fourth Edition is a freshly retold story of the art and artists of the last 150 years from modernism's mid-nineteenth-century European beginnings to today's divergent art trends. In the decade that has passed since the publication of the previous edition, art historians have come to recognize that works of art, whether sublimely beautiful or provocatively repelling, are artistic responses made by individuals to life in the real world. In her thoughtful reworking of H. H. Arnason's classic text, Marla Prather poses critical questions -- Why did Cubist painters and sculptors refract their subject matter in the way they did? Why did Abstract Expressionism take hold in America? Why did Postmodern architects reject the clean lines of the International Style? What does it mean that artworks of the late 1990s defy categorization? -- and provides insightful and thought-provoking answers. Almost 500 of the nearly 1,500 illustrations are new to this edition, a reflection of Prather's thorough rethinking and updating of the content. The final section of the book presents thirty-seven artists representative of today's decentralized art scene who are working in mediums ranging from conventional painting and photography to video and performance art. With its fully revised bibliography, History of Modern Art, Fourth Edition, is an essential volume for anyone with a curiosity about modern art and culture. Book jacket.

Groundbreaking in both its content and its presentation, Art Since 1900 has been hailed as a landmark study in the history of art. Conceived by some of the most influential art historians of our time, this extraordinary book has now been revised, expanded and brought right up to date to include the latest developments

in the study and practice of art. It provides the most comprehensive critical history of art in the twentieth and twenty-first centuries ever published. With a clear year-by-year structure, the authors present 130 articles, each focusing on a crucial event - such as the creation of a seminal work, the publication of an important text, or the opening of a major exhibition - to tell the myriad stories of art from 1900 to the present. All the key turning-points and breakthroughs of modernism and postmodernism are explored in depth, as are the frequent antimodernist reactions that proposed alternative visions. This third edition includes a new introduction on the impact of globalization, as well as essays on the development of Synthetic Cubism, early avant-garde film, Brazilian modernism, postmodern architecture, Moscow conceptualism, queer art, South African photography, and the rise of the new museum of art. The book's flexible structure and extensive cross-referencing enable readers to plot their own course through the century and to follow any one of the many narratives that unfold, be it the history of a medium such as painting, the development of art in a particular country, the influence of a movement such as Surrealism, or the emergence of a stylistic or conceptual body of work such as abstraction or minimalism. Illustrating the text are reproductions of almost eight hundred of the canonical (and anti-canonical) works of the century. A five-part introduction sets out the methodologies that govern the discipline of art history, informing and enhancing the reader's understanding of its practice today. Two roundtable discussions consider some of the questions raised by the preceding decades and look ahead to the future. Background information on key events, places and people

is provided in boxes throughout, while a glossary, full bibliography and list of websites add to the reference value of this outstanding volume. Acclaimed as the definitive work on the subject, *Art Since 1900* is essential reading for anyone seeking to understand the complexities of art in the modern age.

Modernist Art in Ethiopia Prentice Hall

This volume explores the late medieval and early modern periods from the perspective of objects. While the agency of things has been studied in anthropology and archaeology, it is an innovative approach for art historical investigations. Each contributor takes as a point of departure active things: objects that were collected, exchanged, held in hand, carried on a body, assembled, cared for or pawned. Through a series of case studies set in various geographic locations, this volume examines a rich variety of systems throughout Europe and beyond.
