This book demonstrates the importance of Léon Duguit for property theory in both the civil and common law world. It translates into English for the first time ever Duguit's seminal lecture on property, the sixth of a series given in 1911 in Buenos Aires. It also collects essays from the leading experts on the social function of property in major civil and common law

jurisdictions internationally. The book explores the importance that the notion of the social function of property has come to have not only in France but in the entire civil law tradition, and also considers the wide - if un-attributed and seldom regarded - influence in the common law tradition and theory of property.  John Bollinger is a giant in today's trading community. His Bollinger Bands sharpen the sensitivity of fixed indicators, allowing them to more precisely reflect a market's volatility. By more accurately indicating the existing market environment, they are seen by many as today's standard—and most reliable—tool for plotting expected price action. Now, in *Bollinger on Bollinger Bands*, Bollinger himself explains how to use this extraordinary technique to compare price and indicator action and make sound, sensible, and profitable trading decisions. Concise, straightforward, and filled with instructive charts and graphs, this remarkable book will be essential reading for all serious traders, regardless of market. Bollinger includes his simple system for implementation, and techniques for

combining bands and indicators.

 Every day, at least 1,191 Americans die before their time. They die painful, lingering deaths that could have been prevented. Every three days, as many citizens die from their own smoking habit, or from exposure to second-hand smoke, as died in the Sept 11 tragedy. Each and every pack of cigarettes costs American taxpayers \$40 in higher medical premiums, unavailability of health services, and other hidden financial drains. And every year, 925 out of every 1,000 smokers who try to quit on their own fail to stay smoke-free for a year—while hundreds of thousands of children become addicted to nicotine. Dr. Michael Rabinoff, a respected psychiatrist who holds two patents and has published repeatedly in the *New England Journal of Medicine* and other top-flight journals, shows the health and financial suicide we commit by allowing tobacco companies to continue doing business as usual—and, like any good doctor, provides a detailed prescription for what to do about it: simple actions you can take to save the lives of millions around

the world.

 This is the first work in English to devote itself entirely to the poetry of Jules Laforgue (1860-1887). Based on a detailed study of manuscripts as well as printed texts, it analyses the evolution of Laforgue's poetic ideas as he understood it himself. Anne Holmes presents a detailed investigation of Laforgue's changing poetic techniques in order to illuminate both his

extraordinary poetic versatility and the significance of his adoption of free verse. Arguing that Laforgue is the great innovator in the use of free verse in French poetry, Holmes sheds light on his method of composition by means of close analysis of variants, and explores the precise nature of his experiment with interior monologue. She sets Laforgue firmly in the context of contemporary French poetry and highlights the influence on him of Walt Whitman and Impressionist painting. Comparison is also made with the work of T. S. Eliot, for whom Laforgue was a major influence. Laforgue emerges from this study as a far more important figure in the evolution of French verse than has previously been thought. He stands as a great and self-consciously modern writer, close in spirit to his twentieth-century successors.

Instead of outsourcing tasks to providers using labor-intensive countries, libraries around the world increasingly appeal to the crowds of Internet users, making their relationship with users more collaborative. These internet users can be volunteers or paid, work consciously, unconsciously or in the form of games. They can provide the workforce, skills, knowledge or financial resources that libraries need in order to achieve unimaginable goals.

Multivariable Mathematics combines linear algebra and multivariable mathematics in a rigorous approach. The material is integrated to emphasize the recurring theme of implicit versus explicit that persists in linear algebra and analysis. In the text, the author includes all of the standard computational material found in the usual linear algebra and multivariable calculus courses, and more, interweaving the material as effectively as possible, and also includes complete proofs. * Contains plenty of examples, clear proofs, and significant motivation for the crucial concepts. * Numerous exercises of varying levels of difficulty, both computational and more proof-oriented. * Exercises are arranged in order of increasing difficulty.

Over the last three decades, Pierre Bourdieu has produced one of the most imaginative and subtle bodies of social

theory and research of the post war era. Yet, despite the his influence, no single introduction to his wide-ranging work is available. This book offers a systematic and accessible overview, providing interpretative keys to the internal logic of Bourdieu's work by explicating thematic and methodological principles underlying his work. Firstly Loic Wacquant provides a clear and systematic account of the main themes of Bourdieu's work, outlining his conception of knowledge, his theory of practice and his distinctive methods of analysis. In the second part of the book Wacquant collaborates with Bourdieu to discuss the central concepts of Bourdieu's work, confront some criticisms and objections, and develop Bourdieu's views on the relations between sociology, philosophy, history and politics. Finally Bourdieu displays his sociological approach in practice: beginning with the practical demands of research, he moves, step by step, to a formulation of the principles of sociological reason. Supplemented by an extensive and up-to-date bibliography, this book will be essential reading for anyone who wishes to understand Bourdieu's unique and

outstanding contribution to contemporary social thought.

From the #1 international bestselling author: a woman wakes up on a Central Park bench with no memory of how she got there in this "unpredictable and moving psychological thriller that keeps you holding your breath" (Métro) Alice, a fierce and respected Parisian cop, wakes up on a Central Park bench with no memory of the night before, handcuffed to a complete stranger—a musician named Gabriel. Disoriented, dazed, and with someone else's blood on her shirt, Alice works furiously to reconnect the dots. She remembers clubbing with her friends the

night before on the Champs-Élysées. Gabriel claims he was playing a gig in Dublin. Was she drugged? Kidnapped? Why is the gun in her jacket pocket missing a bullet? And whose blood is on her clothes? Over the next twenty-four hours, Alice and Gabriel race across New York in search of answers, stumbling upon a startling set of clues that point to a terrible adversary from the past. Alice must finally confront her memories of hunting the serial killer who took everything from her—a man she thought was dead, until now. From France's #1 bestselling author, Central Park is a taut and suspenseful thriller that will keep readers riveted until its final shocking twist.

The "Ambition numérique" ("digital ambition") report is the conclusion of an open debate with the French citizens in order to prepare the government's digital strategy. The report formulates 70 proposals divided in four parts : fairness and freedom in a common digital environment; a new form of public action: openness, innovation, participation; fostering French growth for an innovation-

driven economy; solidarity, fairness, empowerment: the challenges of a digital society. During five months (october 2014 - february 2015), the Conseil National du Numérique (French Digital Council) animated a wide consultation on the "digital ambition" of France, in order to collect proposals and plans for action to make of the digital an asset as much for economy as for society. This mission, assigned to the CNum by the French Prime Minister in september 2014 and followed by Axelle Lemaire, Secretary of State assigned to the Digital, and Thierry Mandon, Secretary of State to the Reform of the State and to Simplification, is an unprecedented experimentation of public policy building. The platform www.contribuez.cnumerique.fr conceived with the association Démocratie Ouverte permitted to each citizen, public or private organisation to contribute to the proposed consultations. At the end of those consultation phases, the CNUM published syntheses open to comments for each

consultation, tracing back the great controversies that emerged while staying as neutral as possible and studying the proposed plans for action. During the concertation, 4 "journées contributives" ("contributive days") have been organized on each of the themes - respectively in Lille, Strasbourg, Bordeaux and Nantes - in presence of local actors. During those days, thematic workshops permitted to deepen the proposals seen on the online platform, and to confront them to participants' feedback. In parallel, "contributive pitches" gave the opportunity to entrepreneurs, students, members of civil society, law professionals, etc. to present their innovations and to propose their ideas to "update France". A concertation on the network, mobilizing various actors: to stimulate the production of collective ideas, the CNum developed, while being accompanied by the start-up Nod-A, a DIY resource kit, offering the possibility for actors to organize themselves workshops on the consultations of their choice. The

CNum has also brought their support on methodological and background subject grounds (from a distance or on the spot) to ensure a good appropriation of the tools and of the addressed problems. Organizers, on their side, engaged themselves to post their contributions on the platform at the end of those workshops. A regular followup of the concertation with the government: to ensure the coordination of the concertation's progresses with the government's work (preparation of the digital bill, elaboration of action plans), weekly points were held, gathering the CNum and the ministerial cabinets of the Prime Minister, Axelle Lemaire and Thierry Mandon. Interministerial meetings were also organized to spread the concertation in administrations.
