This book provides an overview of some fundamental topics of
 international Technical and Vocational Education and Training
 (TVET), e.g. genesis of TVET research, fields of TVET research,
 curriculum development, TVET planning and developing, methods
 of TVET research etc. The International Handbook of Technical
 and Vocational Education and Training Research
 (Rauner/Maclean), published in 2009 by Springer, was the first
 handbook to provide a comprehensive coverage of TVET research
 in an international context and with a special focus on research
 and research methods. Building upon the great success of this

handbook and replying to the great demand expressed by
 researchers, (postgraduate) students and decision makers in VET,
 this new book "Areas of Vocational Education Research" focuses
 on providing an easier accessible overview of the fundamental
 topics of international TVET research.
