"Few major achievements of world
literature are as little known to
Americans as the great ecstatic poetry of
the Hindus and Sufis, as exemplified by

the work of the 15th century master, Kabir. Irreverent while being intensely religious, Kabir seems incredibly playful in his taunting of the sacred dogmas of his time--to readers accustomed to the solemnity and ideological fidelity of most Western religious poems. Kabir has been translated into English only once before, by Rabindranath Tagore and Evelyn Underhill. Unfortunately, Tagore's Victorian English was simply not equal to Kabir's directness, spontaneity, and irreverent humor. Working from the Tagore-Underhill translation, Bly has done much more than retranslate into American diction. A noted poet himself, he has breathed new life into the work of a fascinating poet"--From back cover. [Advanced Bach Flower Therapy](#) Oxford University Press

Juan Cole examines Shi'i Islam as a world religion that has faced modernity on its own terms. He explores the little known history of Shi'i communities as far afield as Bahrain and India, giving attention as well to important centers such as Lebanon , Iraq, and Iran. He demonstrates the way in which the Shi'is have sought to define space and time as sacred, and to defend those spaces from encroachment by the Other, whether that other be Sunni Arab, Hindu, or European Christian.

Sacred Space and Holy War

In order to understand the true message and spirit of the Holy Quran, it is essential to know the language it has been revealed in. The first step is to understand the meaning of individual words. One needs to understand how words were used by the ancient Arabs by the time of Quranic revelation, and not depend on anyone's explanation or understanding as to what they mean today. Along with proper understanding of Arabic grammar, the true meanings of Quranic words, and their use with respect to the context in which they have been revealed in, one student of Quran may get closer to the Truth. The task of creating a Quranic dictionary or encyclopedia that would explain the classical meanings of Quranic words and

their use along with significance was undertaken by Allama Ghulam Ahmed Parwez in 1960, where he compiled Lughat-ul-Quran in Urdu language. Now this dictionary has been translated to English by Quranic Education Society in Norway, in order to appeal to a larger audience worldwide and to inspire modern Quranic students.
