There has rarely been a British success story like the Land-Rover. Developed in a short time and on a small budget, it was launched in 1948 and having passed through many revisions is still a world leader today. The Series detailed in Land Rover takes the reader from the beginning to 1985, and the many surviving examples, supported by a comprehensive parts and restoration industry, are seeing a solid increase in values. Here James Taylor, the premier historian of the marque, provides a detailed study of the Land-Rover's evolution through the period and the variants and special-purpose versions that were produced. Uniquely, it is the manufacturer's own sales brochures and

advertising that supply the illustrations, which number some 400 images and serve not only to correctly depict the vehicles but also to re-create the atmosphere of the times when they were made.

The E30 3 Series was the car that defined BMW more than any other during the 1980s, and it has gone on to become a much-loved modern classic. This book tells the full story of the cars from the time in 1976 when work first began on the successor to the original E21 3 Series. This new book features the story of how and why BMW designed their new compact E30 saloon for the 1980s; the styling, engineering and specification changes introduced over the lifetime of the model. There are full technical specifications, including paint and interior trim choices given along with a chapter on the special US variants. Details of the M3 and the cars produced by the leading German tuners and finally, there is a chapter on buying and owning a BMW E30.
