Hukum Kontrak Bisnis Courier Corporation
 Hukum kontrak (contract of law; bahasa Inggris) atau overeencomstrecht (dalam bahasa Belanda) mengandung pengertian keseluruhan kaidah-kaidah hukum yang mengatur hubungan hukum antara dua pihak atau lebih berdasarkan kata sepakat untuk menimbulkan akibat hukum. Hukum kontrak di Indonesia masih menggunakan peraturan pemerintah kolonial Belanda yang terdapat dalam Buku III KUH Perdata. Buku III KUH Perdata menganut sistem terbuka (open system), artinya bahwa para pihak bebas mengadakan kontrak dengan siapa pun, menentukan syarat-syaratnya, pelaksanaannya, maupun bentuk kontraknya baik secara tertulis maupun lisan. Di samping itu, diperkenankan membuat kontrak, baik yang telah dikenal dalam KUH Perdata maupun di luar KUH Perdata. Hal ini sesuai pula dengan Pasal 1338 ayat (1) KUH Perdata yang berbunyi: "Semua perjanjian yang dibuat secara sah berlaku sebagai undang-undang bagi mereka yang membuatnya." Buku ini menawarkan konsep teoretis hukum perjanjian dan bagaimana teknik penyusunan sebuah kontrak, yang di dalamnya membahas antara lain: konsep teoretis dan pengertian hukum perjanjian; syarat-syarat sah dan momentum terjadinya kontrak; kontrak-kontrak yang sudah dikenal dalam KUH Perdata (kontrak nominaat) seperti jual beli, tukar-menukar, sewa-menyewa, persekutuan perdata, hibah, penitipan barang, pinjam pakai, pinjam-meminjam, pemberian kuasa, penanggungan utang, perjanjian untung-untungan, dan perdamaian; ketentuan-ketentuan umum dalam hukum kontrak; penyusunan, struktur, dan anatomi kontrak; pola penyelesaian sengketa di bidang kontrak; serta berakhirnya kontrak. Materi buku ini sangat membantu berbagai kalangan seperti praktisi hukum, calon notaris atau notaris, legal drafter, mahasiswa hukum. Di sisi lain, buku ini dapat menjawab tantangan zaman dengan berkembangnya bidang ekonomi dan perdagangan karena peserta bisnis sangat membutuhkan kontrak perjanjian sebagai bukti teoah terjadinya suatu kerja sama antara para pihak.

Dasar-dasar Teknik Pembuatan Akta Pustaka Alvabet
 Buku ini dibentuk berdasarkan dorongan dari kalangan mahasiswa magister kenotariatan yang menempuh mata kuliah Teknik Pembuatan Akta, yang merupakan salah satu Mata Kuliah Keahlian Berkarya dan mata kuliah wajib yang harus ditempuh mahasiswa program studi Magister Kenotariatan di Fakultas Hukum di seluruh universitas di Indonesia. Mata kuliah ini membahas mengenai jenis atau bentuk dari suatu akta autentik yang membedakannya dengan surat di bawah tangan,

sistematika akta yang terbagi dalam awal akta, badan akta dan penutup akta, tata cara pembuatan komparasi akta, premise serta isi akta, surrogate. Di samping itu juga akan dibahas mengenai teknik pembuatan daftar surat di bawah tangan yang disahkan (legalisasi) dan daftar surat di bawah tangan yang dibukukan (waarmerk), akta-akta notaris secara umum dan tata cara renvoi dari suatu akta. Tujuan mempelajari Mata kuliah Teknik Pembuatan Akta adalah mahasiswa mampu merancang berbagai macam akta notariil secara umum sesuai dengan norma hukum yang berlaku di Indonesia, dengan demikian, mahasiswa dapat lebih mudah dalam hal penerapan pembuatan akta dimaksud.

 Praise for Idea Mapping "Nast's work in Idea Mapping enables those with creative minds to clearly lay out their thinking process and those who are more process-minded to become creative. If your organization is looking for a pragmatic, step-by-step guide to idea mapping, this is it." --Chris Brown, Executive Vice President, DTE Energy Resources "I have used idea maps for thirty years and have taught MBA students, employees, and my children how to harness their power. I strongly recommend this book and believe you will feel it to be one of the best investments you have ever made in your own growth." --Stephen C. Lundin, coauthor, FISH! "This is a book that everyone should read. It's an interactive, thought-provoking book about the brain and learning that will expand your mind. Nast, an accomplished and well-respected instructor, has guided me into a new realm of learning experiences and possibilities. I'm sure you will feel the same upon reading her insightful work." --Simon Tai, CEO, Buzan Centre Taiwan and S&J Media Intergration Co. Ltd., Host of News Discovery on NEWS 98 Taiwan "Nast shows you a revolutionary method to capture your thinking processes. Don't underestimate the simplicity of idea mapping because therein lies its genius." --Scott Hagwood, four-time USA Memory Champion, author, Memory Power "The ability to visually capture and organize thoughts and ideas has enabled millions of people around the world to do their work with greater creativity and productivity, run their businesses more strategically, and manage complex projects more efficiently--even map out a sales process or new product roll-out. Nast's very practical, readable book will get you quickly up to speed on one of the simplest but most powerful ways to organize your ideas, your work, and yourself." --Mike Jetter, cofounder and CTO, Mindjet Corporation, coauthor, The Cancer Code "The principles Nast writes about in Idea Mapping have become a staple for me over the past fourteen years. I was turned onto the concept of idea mapping in 1992 and have been a student and practitioner ever since. This has absolutely transformed the way I learn, design learning, and prepare for public speaking. I have never been more confident in my recall,

knowing the content is nicely tucked away in my brain as it was designed to be. Get ready for a life-changing experience for yourself and those you influence." --Will Flora, Senior Manager, Chick-Fil-A University, Atlanta, GA

These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

In this book, authors Tenko Raykov and George A. Marcoulides introduce students to the basics of structural equation modeling (SEM) through a conceptual, nonmathematical approach. For ease of understanding, the few mathematical formulas presented are used in a conceptual or illustrative nature, rather than a computational one. Featuring examples from EQS, LISREL, and Mplus, A First Course in Structural Equation Modeling is an excellent beginner's guide to learning how to set up input files to fit the most commonly used types of structural equation models with these programs. The basic ideas and methods for conducting SEM are independent of any particular software. Highlights of the Second Edition include: • Review of latent change (growth) analysis models at an introductory level • Coverage of the popular Mplus program • Updated examples of LISREL and EQS • Downloadable resources that contains all of the text's LISREL, EQS, and Mplus examples. A First Course in Structural Equation Modeling is intended as an introductory book for students and researchers in psychology, education, business, medicine, and other applied social, behavioral, and health sciences with limited or no previous exposure to SEM. A prerequisite of basic statistics through regression analysis is recommended. The book frequently draws parallels between SEM and regression, making this prior knowledge helpful.

"[This book provides a] history of special prosecutors in American politics. For more than a century, special prosecutors have struck fear into the hearts of presidents, who have the power to fire them at any time. How could this be, [the author] asks? And how could the nation entrust such a high responsibility to such subordinate officials? [The author] demonstrates that special prosecutors can do much to protect the rule of law under the right circumstances. Many have been thwarted by the formidable challenges of investigating a sitting president and his close associates; a few have abused the powers entrusted to them. But at their best, special prosecutors function as catalysts of democracy, channeling an unfocused popular will to safeguard the rule of law. By raising the visibility of high-level misconduct, they enable the American people to hold the president accountable. Yet, if a president thinks he can fire a special prosecutor without incurring serious political damage, he has the power to do so. Ultimately, [the author] concludes, only the American people can decide whether the President is above the law."--

The Tunnel Engineering Handbook, Second Edition provides, in a single convenient volume, comprehensive coverage of the state of the art in the design, construction, and rehabilitation of tunnels. It brings together essential information on all the principal classifications of tunnels, including soft ground, hard rock, immersed tube and cut-and-cover, with comparisons of their relative advantages and suitability. The broad coverage found in the Tunnel Engineering Handbook enables engineers to address such critical questions as how tunnels are planned and laid out, how the design of tunnels depends on site and ground conditions, and which types of tunnels and construction methods are best suited to different conditions. Written by the leading engineers in the fields, this second edition features major revisions from the first, including: * Complete updating of all chapters from the first edition * Seven completely new chapters covering tunnel stabilization and lining, difficult ground, deep shafts, water conveyance tunnels, small diameter tunnels, fire life safety, tunnel rehabilitation and tunnel construction contracting * New coverage of the modern philosophy and techniques of tunnel design and tunnel construction contracting The comprehensive coverage of the Tunnel Engineering Handbook makes it an essential resource for all practicing engineers engaged in the design of tunnels and underground construction. In addition, the book contains a wealth of information that government

administrators and planners and transportation officials will use in the planning and management of tunnels.

The book covers not only practical aspects but also the underlying theoretical approaches. It also covers the fundamentals of rock mechanics. It addresses not only students but also professionals who are interested to understand the underlying principles and methods and – possibly – to further develop them. Emphasis is given to the mechanical approach rather than to hardly tractable empirical statements. The text is concise and comprises a large list of citations. Publications of the English and German speaking scientific communities have been taken into account.

Franz Kafka's vision of the Law in "The Trial" is so strange, arbitrary, and unjust that it would seem to be the antithesis of our own. Yet, that is what makes Robert Burns' latest book so compelling. Robert Burns brilliantly shows that Kafka's masterpiece provides an uncanny lens through which to see and understand the American criminal justice system today. It provokes a shock of recognition that makes us see it in a very different light. Assuming no prior knowledge of Kafka's book, Burns tells the story, at once funny and grim, of Josef K., caught in the Law's grip and then crushed by it. Laying out the characteristics of Kafka's Law, Burns argues that the American criminal justice system has taken on too many of those same qualities. In the overwhelming majority of cases, our system is composed of police interrogation followed by plea bargaining, where the courts only function is but to set a sentence on an individual already determined to be guilty. Like Kafka's nightmarish vision, too much of our criminal law and procedure has become unknowable, ubiquitous, and bureaucratic. It too has come to rely on deception in dealing with suspects and jurors, to limit the role of defense counsel, and to increasingly dispense justice without the protections of formal procedures. Burns compellingly explains how and why we have become an increasingly punitive society. Finally, he takes up the question of whether we have the resources to change these Kafkaesque aspects of our criminal justice system and shows how the jury trial has that potential, but only if it is returned to a more central place in our system."

She's a free-spirited dreamer. He's a brilliant painter. But now their shared passion for art has turned into something deeper... For as long as she can remember, Kugy has loved to write. Whimsical stories are her passion, along with letters full of secret longings that she folds into paper boats and sets out to sea. Now

that she's older, she dreams of following her heart and becoming a true teller of tales, but she decides to get a "real job" instead and forget all about Keenan, the guy who makes her feel as if she's living in one of her own fairy tales. Sensitive and introverted, Keenan is an aspiring artist, but he feels pressured to pursue a more practical path. He's drawn to Kugy from first sight: she's unconventional, and the light radiating from her eyes and the warmth of her presence pull him in. They seem like a perfect match—both on and off the page—but revealing their secret feelings means risking their friendship and betraying the people they love most. Can they find the courage to admit their love for each other and chase their long-held dreams?

This work illustrates how the Analysis of Controlled Deformation in Rocks and Soils (ADECO-RS) is used in the design and the construction of tunnels. This is a very new and effective way of tunnel construction. The ADECO-RS approach makes a clear distinction between the design and the construction stages and allows reliable forecasts of construction times and costs to be made. It uses the advance core (the core of ground ahead of the face) as a structural tool for the long and short term stabilisation of tunnels, after its rigidity has first been regulated using conservation techniques.
