 An invaluable glossary of significant language and linguistic terms and concepts designed for students of English Language and Linguistics. The book also provides a very useful overview of the subject as well as covering principal figures in linguistic criticism and their contribution to the

subject. Organized into the core subject areas of language and linguistics, it enables the reader to contextualize each particular definition and gain a wider understanding of each topic. This edition has been updated to include more extensive coverage, particularly of language terms.

By creating certain marks on paper, or by making certain sounds-breathing past a moving tongue- or by articulation of hands and bodies, language users can give expression to their mental lives. With language we command, assert, query, emote, insult, and inspire. Language has meaning. This fact can be quite mystifying, yet a science of linguistic meaning-semantics-has emerged at the intersection of a variety of disciplines: philosophy, linguistics, computer science, and psychology. Semantics is the study of meaning. But what exactly is "meaning"? What is the exact target of semantic theory? Much of the early work in natural language semantics was accompanied by extensive reflection on the aims of semantic theory, and the form a theory must take to meet those aims. But this meta-theoretical reflection has not kept pace with recent theoretical innovations. This volume re-addresses these questions concerning the foundations of natural

language semantics in light of the current state-of-the-art in semantic theorising.

 This work sets out Austin's conclusions in the field to which he directed his main efforts for at least the last ten years of his life. Starting from an exhaustive examination of his already well-known distinction between performative utterances and statements, Austin here finally abandons that distinction, replacing it with a more general theory of 'illocutionary forces' of utterances which has important bearings on a wide variety of philosophical problems.

Fifty Years of Kiswahili in Kenya is a collection of articles that were presented at an international

Kiswahili conference organized by the National Kiswahili Association (CHAKITA) Kenya in 2013,

which was held at the Catholic University of Eastern Africa (CUEA). A few articles are however from

a similar conference held in 2012 at Kenyatta University. The book exemplifies the importance of

the Kiswahili language in various sectors of society. Therefore, within this book you will find articles

that focus on the teaching of the Kiswahili language; Kiswahili as a tool for national economic

development; the contribution of Kiswahili to national cohesion and integration; Kiswahili research

in language and literature; Kiswahili and portrayal of women; children's literature in Kiswahili; and

how Sheng affects Kiswahili. In short, the articles herein are a testimony of how Kiswahili has

developed in the last fifty years in Kenya. This is a very important book for Kiswahili students and

teachers. It is also an invaluable text for Kiswahili enthusiasts and all those who recognize its

contribution to society.

Indian ecocriticism has not yet adequately demonstrated the applicability of ecological/deep

ecological/tinai principles to visual texts. Culture and Media: Ecocritical Explorations closes this gap

at the most opportune moment. Though this volume accommodates ecologically oriented

interpretations from several cultures across the world, it reserves the centre stage for Indian

ecocriticism and ecotheory quite appropriately. The volume effectively challenges the major

documents on ecocriticism and theory (published by international presses), which have been

reluctant to give space to tinai criticism and theory that transcend Dravidian or Tamil boundaries.

The day is not far when cinema of the world, shaped by tinai theory, will employ tinai hermeneutics

to gain fresh insight, which, in turn, will feed into the processes of creation and production of

relevant and great movies.
