When people speak, their words never fully encode what they mean, and the context is always compatible with a variety of interpretations. How can comprehension ever be achieved? Wilson and Sperber argue that comprehension is a process of inference guided by precise expectations of relevance. What are the relations between the linguistically encoded meanings studied in semantics and the thoughts that humans are capable of entertaining and conveying? How should we analyse literal meaning, approximations, metaphors and ironies? Is the ability to understand speakers' meanings rooted in a more general human ability to understand other minds? How do these abilities interact in evolution and in cognitive development? Meaning and

Relevance sets out to answer these and other questions, enriching and updating relevance theory and exploring its implications for linguistics, philosophy, cognitive science and literary studies.

Haji Gora Haji, born in 1933 on the island of Tumbatu, Zanzibar, represents a living archive of poetic and philosophical knowledge, which is transformed into verses with a characteristic voice enriched by dialectal features (from Tumbatu and Unguja). As a recognition of his life-long commitment to Swahili language and literature, the editors and translators, Flavia Aiello and Irene Brunotti, decided to work hard on conceiving a publishing project of Shuwari, his poetical anthology or diwani, fashioned as a bilingual Swahili-English edition which, along with the poems, could offer some analytical insights into Haji Gora Haji's artistry. ***Swahili Grammar for Introductory and Intermediate Levels*** Lulu.com
