- Define and use imaginary and complex numbers.
- Solve quadratic equations with complex roots. You can see in the graph of  $f(x) = x^2 + 1$  that  $f$  has real zeros. If you solve the corresponding equation  $0 = x^2 + 1$ , you find that  $x =$  , which has real solutions.

In Chapter 5, you learned that the graph of a quadratic function is a parabola. Because a parabola is a conic section, it can also be defined in terms of distance. A parabola is the set of all points in a plane that are equal \_\_\_\_\_ from both a fixed point, the \_\_\_\_\_, and a fixed line, the \_\_\_\_\_.
