Nissan 350z Haynes Publishing

The fifth Nissan Z car generation, the 350Z Coupe, made its US debut as a 2003 model and was offered with five levels of trim. The Roadsters appeared the following year. The 350Z filled a gaping hole in the market and was greeted enthusiastically. Models reported on are the Coupe, Roadster, GT4, GT-S and Nismo. Included are road and comparison tests, updates, specifications plus advice on acquiring a good used 350Z.

[How to Build Performance Nissan Sport Compacts, 1991-2006 HP1541](#) Brooklands Books Limited

Some 35 years ago Datsun (now Nissan) introduced the 1970 Datsun 240Z sports car, emphatically disproving the perception that Japanese

automakers could only produce economy cars. Designed specifically to appeal to the American market, the Z car has enjoyed long-term popularity with its sporty styling and impressive performance. Z car fans are loyal and numerous. Over 1.4 million Z cars have been sold worldwide, including 1 million-plus in the U.S. The five generations of Z cars include the latest version, the 350Z introduced in 2003, which has refueled interest in Z cars. This book will thoroughly cover the history of this breakthrough Japanese sports car, and will include official Datsun/Nissan photography and memorabilia such as advertising and international marketing materials.

Nissan Navara/Pathfinder 2005-13 Haynes Publishing

The book has the author's professional views of the development of the worldwide automotive industries and their current emphasis on self and driverless cars and trucks. He has written about the 17 years' experience working for little known Nissan Motors USA that imported Datsun cars and trucks. He helped to develop a strong Datsun dealer network that during his tenure outsold all other imports in the Western United States. He shared his stories while he was one of the few dedicated pioneering employees in the West who helped initiate policies and procedures that eventually led to the success of Nissan that we know of today.

Nissan Bluebird Haynes Publishing

Hatchback, Saloon & Estate, inc. special/limited editions. Does NOT cover 100 NX Coupe, 2.0 GTi or 2.0 GTi-R 4x4. Petrol: 1.4 litre (1392cc) & 1.6 litre (1597cc).

Motorbooks

When Don Devendorf and John Knepp got together to form Electramotive Engineering of El Segundo, California, little did they realise that they were setting in motion a train of events which would sooner, rather than later, bring to them and the mighty Nissan GTP cars that they promoted, developed and raced, no less than four IMSA Camel GT Championships. Here, for the first time, is the story of Nissan in racing from 1984 to 1993, the GTP era. The full story of Electramotive and NPTI is told, with interviews with Don Devendorf, John Knepp, Geoff Brabham, Trevor Harris, Kas Kastner, Ashley Page, and many other members of the crew that won the IMSA Camel GT Championship from 1988 to 1991. The story of the European Group C Nissans, using chassis from March and Lola, from 1985 to 1992 is also told, along with interviews from many of the drivers and technicians involved, such as Mark Blundell, Julian Bailey, Dave Price and Bob Bell.

How to Modify Your Nissan/Datsun OHC Engine Haynes Publishing

Nissan has engineered a lot of vehicles, from the Frontier truck to the electric Leaf, but perhaps its crowning achievement is the sleek GT-R. Reluctant readers can follow Nissan's history and learn about all the features that make this supercar stand out. With sidebars outlining specifications and showing off identifying qualities, this high-interest title is an exciting ride!

Nissan Micra (K11 Series) Burns & Oates

This book tells the story of the modern car industry from the inside. What is it really like to work for the carmakers - the industrial giants that influence the daily lives of millions? How are mass-production cars really designed, engineered, and manufactured? What does it take to engineer a successful vehicle? The story is told through the author's own journey around the globe - starting as a young graduate engineer working for Nissan in the UK, to working for Nissan in Japan and, finally, for Renault in France as Chief Engineer of its 'halo' sports-car, designed to relaunch the Alpine brand. It tells the behind-the-scenes story of three well-known vehicles, whose development teams were led by the author - the Nissan Qashqai, the Renault ZOE, and the Alpine A110 - revealing some of the fascinating stories of how these vehicles came into being. The book seeks to show the real work that goes on behind the glamour of the Motor Shows and the well-honed corporate press releases - work that is sometimes exciting, but often grudgingly difficult.

A&C Black

"This volume ... looks in detail at all of the Datsun sports cars that proudly carried the Fairlady name--the SP/SR roadsters, the 240Z, 260Z and 280Z, and the S130 series, commonly known as the 280ZX in export markets."--Folded portion of front cover.

Nissan 350Z Motorbooks

Nissan Z: 50 Years of Exhilarating Performance is the Nissan-official chronicle of Z history, from Datsun's planning for the new model in the late 1960s through the latest 50th anniversary Nissan 370Z. The Datsun 240Z revolutionized the sports car industry and demolished established assumptions about Japanese automakers. With the Z, Datsun gave the world a sleek, sexy, fast product—one that forever banished the idea that Japanese manufacturers could only build economy cars. Over the past 50 years, six generations of the Z car have generated a massive, devoted following. More than 1.5 million cars have been sold worldwide. The retro-inspired 350Z reinvigorated the Z's fortunes in the 21st century, and the latest incarnation, the 370Z, continues the tradition of high-performance in a modern, affordable package. In addition to a complete history of the Z, this handsomely illustrated book examines the car's significant racing history with successes in IMSA and SCCA sports car racing, including extensive racing by Paul Newman for Bob Sharp and John Morton with Brock Racing Enterprises. Special attention is devoted to the cult of Z-fans around the world who have supported Nissan's sports car through thick and thin and the early car's emergence as a rapidly appreciating collector car. The story is told by author Pete Evanow, who has enjoyed a long relationship with Nissan. His insights into the history of this automotive icon provide a fresh, compelling perspective on the five decades of the Z that no enthusiast will want to miss.

Nissan Pick-ups Haynes Manuals

This work looks behind the Nissan image of quality, consensus, flexibility and teamworking at what actually goes on in the workplace. It argues that Nissan's success in Sunderland has relied on a passive labour force deriving from internal social control and local unemployment, combined with support from a Thatcher government committed both to private ownership and to union restraint associated with the company. The authors conclude that Nissan is unlikely to regenerate the local economy as a whole, as skills required to manufacture Nissan cars are company-specific and components used come from Japanese suppliers.
