• Best Selling Book in English Edition for NTA UGC NET Economics (Concerned Subject : Paper II) with objective-type questions as per the latest syllabus given by the NTA. • Compare your performance with other students using Smart Answer Sheets in EduGorilla's NTA UGC NET Economics (Concerned Subject : Paper II) Practice Kit. • NTA UGC NET Economics (Concerned Subject : Paper II) Preparation Kit comes with 12 Mock Tests with the best quality content. • Increase your chances of selection by 16X. • NTA UGC NET Economics (Concerned Subject : Paper II) Prep Kit comes with well-structured and 100% detailed solutions for all the questions. • Clear exam with good grades using thoroughly Researched Content by experts.

Minerals Yearbook Walter de Gruyter GmbH & Co KG

This open access book compares and contrasts the results of international student assessments in ten countries. The OECD's Programme for International Student Assessment (PISA) released the results of its 2018 assessment in December 2019. This book reflects the debates that typically follow the release of these results and focuses on the causes of differences between countries. Such causes include continuous decline in one country, improvement combined with increasing internal inequalities in another country, or rapid improvement in spite of an outdated curriculum in yet another. In addition, the book discusses a number of general questions: Is knowledge outdated? Are computers taking over and replacing teachers? Are schools killing creativity? Are we adequately preparing the next generation? Are schools failing to educate our kids? The book starts out with a summary of PISA's evolution and PISA results, and an explanation of the major factors that play a role in changes in countries' results. The next ten chapters are devoted to ten specific countries, offering a summary of data and an explanation of the major drives for changes in education results for each one. Each chapter includes a short description of the country's educational

system as well as the impact of PISA and other ILSA studies on the country's educational policies. The chapters also include a timeline of policy measures and main hallmarks of the country's educational evolution, discussing the impact of these measures on its PISA results. A final reference chapter explains what PISA is, what it measures and how. While highlighting the 2018 results, the book also takes into consideration previous results, as well as long-term initiatives. This book gathers the contribution of well-known and respected experts in the field. Specialists such as Eric Hanushek, for the US, Tim Oates, for England, Montse Gomendio, for Spain, Gunda Tire, for Estonia, and all other contributors draw on their vast experience and statistical analysis expertise to draw a set of rich country lessons and recommendations that are invaluable for all of those who care about improving a country's education system.

Distance Learning World Bank Publications

In Islamic jurisprudence, a comprehensive ethic has been formulated governing how business and commerce should be run, how accountability to God and the community is to be achieved, and how banking and finance is to be arranged. This Handbook examines how well these values are translated into actual performance. It explores whether those holding true to the system are hindered and put at a disadvantage or whether the Islamic institutions have been able to demonstrate that faith-based activities can be rewarding, both economically and spiritually.

Report on Activities, ... December 28, 2013 to January 2, 2015, House Report 113-679, 113-2 JHU Press

Many businesses and organizations are increasingly aware of the case for promoting gender equality, both within and outside their organizational boundaries. Evidence suggests that gender equality in the workplace boosts performance, and legal frameworks in many countries mandate specific action on gender inequality in the workplace. However, despite organizational policies on promoting equality and equal opportunities, there remain challenges to be overcome in many businesses, including throughout their supply chains. The book provides research rationales as to why responsible organizations must address the

issue of gender equality in the workplace. It also presents case studies, action research and examples of good practices, describing how businesses and organizations are working to promote gender equality in various contexts. The book is designed to support the rationale for gender equality in business and organizations, providing evidence of implementation of gender equality in the workplace and advice on how to deal with and overcome challenges. It will be of interest to academics, employees, practitioners, policy-makers, businesses, institutions and organizations.

Financial Literacy and Financial Education Pearson South Africa
An "intriguing, insightful" look at how algorithms and robots could lead to social unrest—and how to avoid it (The Economist, Books of the Year). After decades of effort, researchers are finally cracking the code on artificial intelligence. Society stands on the cusp of unprecedented change, driven by advances in robotics, machine learning, and perception powering systems that rival or exceed human capabilities. Driverless cars, robotic helpers, and intelligent agents that promote our interests have the potential to usher in a new age of affluence and leisure—but as AI expert and Silicon Valley entrepreneur Jerry Kaplan warns, the transition may be protracted and brutal unless we address the two great scourges of the modern developed world: volatile labor markets and income inequality. In *Humans Need Not Apply*, he proposes innovative, free-market adjustments to our economic system and social policies to avoid an extended period of social turmoil. His timely and accessible analysis of the promises and perils of AI is a must-read for business leaders and policy makers on both sides of the aisle. "A reminder that AI systems don't need red laser eyes to be dangerous."—Times Higher Education Supplement
"Kaplan...sidesteps the usual arguments of techno-optimism and dystopia, preferring to go for pragmatic solutions to a shrinking pool of jobs."—Financial Times

This report responds to an invitation from the Nordic Council of Ministers to map out Nordic initiatives within textiles as a pre-

study to the initiation of a Nordic Roadmap for Sustainable Textiles in 2015. The work has been conducted by: SIFO - National Institute for Consumer Research (Norway) SFA - Sustainable Fashion Academy (Sweden) NFA - Nordic Fashion Association/nicefashion.org (Nordic) IVL - Swedish Environmental Research Institute (Sweden) CRI - Copenhagen Resource Institute (Denmark) Nordic Committee of Senior Officials for Environmental Affairs (EK-M) has been responsible for the funding of this project. The project's steering committee consists of representatives from members from the working groups; Nordic Chemicals Group (NKG), the Nordic Waste Group (NAG) and the Group of sustainable consumption and production (SCP) and officers from the Environmental Protection Agency in Denmark. This steering Group is jointly responsible for the direction and decisions regarding the project. NAG has been coordinating the work. Coordinator of project has been Yvonne Augustsson from the Swedish Environmental Protection Agency.

Improving a Country's Education EduGorilla Community Pvt. Ltd. All over the world, Black and racialized women engage in the solidarity economy through what is known as mutual aid financing. Formally referred to as rotating savings and credit associations (ROSCAs), these institutions are purposefully informal to support the women's livelihoods and social needs, and they act to reject tiered forms of neo-liberal development. The Banker Ladies – a term coined by women in the Black diaspora – are individuals that voluntarily organize ROSCAs for self-sufficiency and are intentional in their politicized economic co-operation to counter business exclusion. Caroline Shenaz Hossein reveals how Black women redefine the banking co-operative sector to be inclusive of informal institutions that are democratic and focused on group consensus, and which build an activist form of economic co-operation that is intent on making social profitability the norm. The book examines the ways in which diasporic Black women, who organize mutual aid, receive little to no attention. Unapologetically biased towards a group of women who have been purposely sidelined and put down for what they do, The Banker Ladies highlights how, in order to educate oneself about their contributions to politics and economics, it is imperative to listen to the voices of hundreds of Black women in charge of financial services for their communities.

Pursued Economy IAP

Working for the administration remains one of the most coveted career paths for young Chinese. *Rejuvenating Communism: Youth Organizations and Elite Renewal in Post-Mao China* seeks to understand what motivates young and educated Chinese to commit to a long-term career in the party-state and how this question is central to the Chinese regime's ability to maintain its cohesion and survive. Jérôme Doyon draws upon extensive fieldwork and statistical analysis in order to illuminate the undogmatic commitment recruitment techniques and other methods the state has taken to develop a diffuse allegiance to the party-state in the post-Mao era. He then analyzes recruitment and political professionalization in the Communist Party's youth organizations and shows how experiences in the Chinese Communist Youth League transform recruits and feed their political commitment as they are gradually inducted into the world of officials. As the first in-depth study of the Communist Youth League's role in recruitment, this book challenges the assumption that merit is the main criteria for advancement within the party-state, an argument with deep implications for understanding Chinese politics today.

Welcoming Practices UN

Now in its ninth edition, this popular introduction tackles the most recent trends in American politics and society through explanation, analyses, and interpretations of government processes – adding valuable context for students by considering these procedures and developments from an international perspective. Fully updated to take account of the many recent developments in American politics and society – exploring developments characterized by the deepest ideological divisions in recent memory Features new chapters on the performance of the Obama presidency and the polarization of American politics Focuses on the divisive ideological climate that now dominates American politics and which was exemplified by the bitter and polarized 2016 presidential election campaign Benefits from a student-friendly style and design with numerous illustrations and a range of helpful pedagogical features, including chronologies, biographies, and definition boxes highlighting key concepts and controversial issues Offers thought-provoking insights into the social background to contemporary politics in America, while fully embracing the latest developments and considering these from a non-U.S. perspective

Christopher Nolan Routledge

Le secteur des industries extractives (IE) occupe une place démesurée dans les économies de nombreux pays en développement. Les économistes et les spécialistes des finances publiques qui y travaillent sont fréquemment confrontés à des problèmes qui requièrent une connaissance approfondie du secteur, de son économie, de sa gouvernance, de ses enjeux stratégiques, et une idée précise de ce que la richesse en ressources naturelles suppose en termes de gestion du budget et des finances publiques. L'ouvrage en trois volumes *Points essentiels à l'intention des économistes et des spécialistes des finances publiques*, publié dans la série des *Études de la Banque mondiale*, a pour objet de donner un bref aperçu des problèmes associés aux IE que ces spécialistes sont susceptibles de rencontrer. Ce premier volume, *Le secteur des industries extractives*, dresse une synthèse des aspects fondamentaux de l'économie des IE, analyse les principales composantes des cadres stratégiques, institutionnels et de gouvernance du secteur, et définit les obligations de financement du secteur public dans ce domaine. Son analyse des aspects économiques des IE couvre l'évaluation des gisements de sous-sol, l'interprétation économique donnée au minerai, et la structure des marchés de l'énergie et des produits minéraux. Il définit les responsabilités des entités publiques compétentes, et présente les caractéristiques des cadres juridique et réglementaire du secteur. Il analyse brièvement ses fonctions essentielles et particulières, ainsi que les structures financières qui soutiennent les mesures de sauvegarde environnementale et sociale, l'investissement des recettes publiques provenant de l'exploitation des ressources pétrolières, gazières ou minières, et la diversification économique à partir des industries extractives. Les auteurs espèrent que les économistes et les spécialistes des finances publiques qui travaillent dans les pays riches en ressources naturelles y compris les décideurs au sein des ministères des finances, des organisations internationales, et autres entités compétentes – jugeront cet ouvrage utile à leur compréhension et à leur analyse du secteur des IE.

The Decline of America Lulu.com

McClellan argues that a collective move towards stewardship within the financial industry is necessary to restore ethical behaviour and public confidence. Drawing on practical examples

and offering new policy recommendations, this unique philosophical study paints a picture of what a truly ethical trading culture of the future might look like.

Rankings and the Reshaping of Higher Education University of Michigan Press

It is a well-known saying that money does not buy happiness. But it certainly helps in life. It is important to have enough of it to satisfy our needs and to secure ourselves from emergency situations. That's what adults think. And what about the youth? What is their approach to money, what do they know about finances and how are their skills in everyday financial management coming along? What kind of knowledge and skills should be provided? Do young people in different countries represent similar or different approaches to financial matters? Using the results of a research on young people in Poland and Germany, the authors draw a picture of financial literacy. They furthermore present a number of recommendations that help developing the knowledge and the financial skills of young people in practice.

Agricultural Statistics 2016 Springer

Distance Learning is for leaders, practitioners, and decision makers in the fields of distance learning, e-learning, telecommunications, and related areas. It is a professional journal with applicable information for those involved with providing instruction to all kinds of learners, of all ages, using telecommunications technologies of all types. Stories are written by practitioners for practitioners with the intent of providing usable information and ideas. Articles are accepted from authors - new and experienced - with interesting and important information about the effective practice of distance teaching and learning. Distance Learning is published quarterly. Each issue includes eight to ten articles and three to four columns, including the highly regarded "And Finally..." column covering recent important issues in the field and written by Distance Learning editor, Michael Simonson. Articles are written by practitioners from various countries and locations, nationally and internationally. Distance Learning is an official publication of the United States Distance Learning Association, and is co-sponsored by the Fischler School of Education at Nova Southeastern University and Information Age Publishing.

Shared Prosperity in America's Communities Oxford

University Press

Consumer law is worthy of greater academic attention at a time when many new questions arise and old ones need new answers. This unique handbook takes the reader on a journey through existing literature, research questions and methods. It builds on the state of the art to offer a springboard for jumping to the heart of contemporary issues and equips researchers with a starter's kit to weave together rich traditions, ranging from socio-economics to behavioural analysis.

Rejuvenating Communism Edward Elgar Publishing

Twenty five years ago the first Human Development Report in 1990 began with a simple notion: that development is about enlarging people's choices - focusing broadly on the richness of human lives rather than narrowly on the richness of economies. This Report starts with a fundamental question - how can work enhance human development? The Report takes a broad view of work, going beyond jobs and taking into account such activities as unpaid care work, voluntary work and creative work - all of which contribute to the richness of human lives. The Report highlights impressive progress on human development over the past quarter century.

The Banker Ladies United Nations

This book presents the core concepts of geographical education as a means of understanding global issues from a spatial perspective. It treats education, supported by high standards, approaches, methodologies, and resources, as essential in exploring the interactions of the world's human and environmental systems at local, regional, and global scales embedded in the nature of the discipline of geography. It covers topics such as climate change, sustainable development goals, geopolitics in an uncertain world, global crisis, and population flows, which are of great interest to geography researchers and social sciences educators who want to explore the complexity of contemporary societies. Highly respected scholars in geography education answer questions on key topics and explain how global understanding is considered in K-12 education in significant countries around the globe. The book discusses factors such as the Internet, social media, virtual globes and other technological developments that provide insights into and visualization - in real time - of the intensity of relationships between different countries and regions of the earth. It also examines how this does not

always lead to empathy with other political, cultural, social and religious values: terrorism threats and armed conflicts are also essential features of the global world. This book opens the dialogue for global understanding as a great opportunity for teachers, educators, scholars and policy makers to better equip students and future citizens to deal with global issues.

Annual Report - Indian Council of Social Science Research Taylor & Francis

Three quarters of our current electricity usage and transport methods are derived from fossil fuels and yet within two centuries these resources will dry up. Energy Economics covers the role of each fossil and renewable energy source in today's world, providing the information and tools that will enable students to understand the finite nature of fossil fuels and the alternative solutions that are available. This textbook provides detailed examinations of key energy sources - both fossil fuels and renewables including oil, coal, solar, and wind power - and summarises how the current economics of energy evolved. Subsequent chapters explore issues around policy, technology and the possible future for each type of energy. In addition to this, readers are introduced to controversial topics including fracking and global warming in dedicated chapters on climate change and sustainability. Each chapter concludes with a series of tasks, providing example problems and projects in order to further explore the proposed issues. An accompanying companion website contains extensive additional material on the history of the major types of fuel as well as technical material relating to oil exploration, the development of solar power and historical environmental legislation. This textbook is an essential text for those who study energy economics, resource economics or energy policy.

x-kit Cram Notes Economics Grade 12 HG&SG Harvard University Press

While the nation's GDP has doubled in the last thirty years, significant increases in family income have been restricted to a small subset of the American population. This disjunct between national economic growth and stagnating incomes in all but the very top tier of the population corresponds with increasing economic inequality and a lack of social and economic mobility. As a consequence, neighborhoods and metropolitan areas have become more polarized. Stark geographic differences in levels of

poverty, income, health outcomes, job opportunities, lifetime earning potential, and educational attainment highlight the degree to which place matters in terms of social and economic opportunity. *Shared Prosperity in America's Communities* examines this place-based disparity of opportunity and suggests what can be done to ensure that the benefits of economic growth are widely shared. Contributors' essays explore social and economic mobility throughout the country to illuminate the changing geography of inequality, offer a portfolio of strategies to address the challenges of place-based inequality, and show how communities across the nation are implementing change and building a future of shared prosperity. Approaching the problem from the vantage point of economics, sociology, and public policy, *Shared Prosperity in America's Communities* offers a timely analysis of the country's growing socioeconomic and geographic division and shows how communities can respond to the challenge of economic inequality to build a nation of opportunity for all. Contributors: J. Cameron Anglum, Timothy J. Bartik, Chris Benner, Angela Glover Blackwell, Anthony P. Carnevale, Raj Chetty, Rebecca Diamond, Lei Ding, Paul A. Jargowsky, David N.

Karp, Elizabeth Kneebone, Douglas S. Massey, Jeremy Nowak, Manuel Pastor, Victor Rubin, Chris Schildt, Nicole Smith, Margery Austin Turner, Susan M. Wachter, Zachary D. Wood.

Humans Need Not Apply Springer

Christopher Nolan is one of the defining directors of the 21st century. Few of his contemporaries can compete in terms of critical and commercial success, let alone cultural impact. His films have a rare ability to transcend audience expectations, appealing to both casual moviegoers and dyed-in-the-wool cineastes. Nolan's work ranges from gritty crime thrillers (*Memento*, *Insomnia*) to spectacular blockbusters (the *Dark Knight* trilogy, *Inception*). They have taken audiences from the depths of space (*Interstellar*) to the harsh realities of war (*Dunkirk*). And they have pushed the boundaries of the possible in modern movie making. This critical history covers his complete filmography, tracing his career from film student to indie darling to Oscar-nominated auteur.

Geography Education for Global Understanding John Wiley & Sons

There has been much debate in recent times between the Anglo American tradition of curriculum studies and the Continental and North European tradition of didactics (*Didaktik*). As important as such debate has been, this book seeks to add new voices to the debate representing ideas and traditions from a different part of the world. The focus is on Chinese curriculum thinking that has passed through a number of stages and currently represents a blend of some aspects of the American tradition and Chinese cultural traditions. How does Chinese thinking about curriculum, teaching and learning resonate with European didactic traditions and what are the implications for theorizing an expanded field of curriculum studies? This book deliberately transcends borders and cultures to explore new territory, to provide a platform for open dialogue and to open up new areas of investigation. Chapters include, *Curriculum Reform and Research in China: A Social-Historical Perspective* *What Mathematics Did Teachers Learn? Comparison of the School and the Pre-Service Teacher* *Mathematics Curricula in Germany and Taiwan* *Living in Parallel Worlds: A Transatlantic Dialogue between General Didactics and Instructional Design*
