Erin Skye Kelly wrote *Get the Hell Out of Debt* after her own struggle to become consumer-debt free. She was tired of listening to middle-aged men in suits tell her to consolidate and refinance her debt when all that seemed to happen was she'd end up in more of it while they profited from it. When Kelly figured out the two most important tools to money management—and started achieving massive results—other women wanted to join in on the debt-free journey. With her sense of humor and straight-shooting sensibilities, Erin began transforming lives. This book is not only a step-by-step process that will walk you through how to pay off your debt—it's a deeply personal journey centered around changing your mindset. As you master each of the three phases through repetition, you will create your own financial freedom, allowing you to live debt-free forever and create wealth and abundance that will positively impact your life—and the people you love and serve. No matter how much consumer debt you carry, this book is a judgment-free zone from cover-to-cover. Your dreams are welcome here.

If you want to get out of credit card debt fast, then get this book! Credit card debt is a form of unsecured debt taken from a financial tool usually credit cards. These credit card debts are generated when credit card holder purchases products from these cards and accumulates due to the interest charged on it. Difficulty arises because people are not able to repay their loans effectively or in time. When a card holder is unable to pay his debts he is declared as "defaulter". In this book, "Living with Credit Card Debts", we are looking at how we can overcome the obstacle we often face when it comes to managing our credit cards. The basic ideas discussed in the book are as follows: * Plan your financial life. Financial problems are something most of us will have to manage eventually in life. In order to cope with the pressure that may arise, we need to have a proper financial plan and even financial goals. * Credit card ratings and debts. We need to know what we should do and not be overburdened by debts. * Study of financial management. We should make money work for us and not the other way round. We should have control of our money and not money have controls over us. * Avoid bad debt. This may be as a result of poor privatization that may make us go for what we do not necessarily need. Handbook of Debt Management Random House

This is how I paid off \$165,000 in debt and saved \$20,000 in just 15 months. Like so many Americans Cheri and I were in a cycle of accumulating credit card debt and paying it off by rolling our credit card debt into our mortgage and declaring, "Never again!" Without any skills or tools to change our behavior, it happened again and again... for nearly sixteen years. I believed the lies. I believed that debt, credit cards, and car payments were tools that would allow me to live "the good life". Indeed, spending unconsciously and living in debt was giving me something I wanted - the ability to pretend that I was achieving my dreams and avoid my reality. Our dream. Since before Cheri and I were married we had talked about taking a year off from work to travel the world. At times, when our debts had been rolled into their mortgage, the dream seemed more likely to happen. Of course, moving debt from one place to another did not really ever pay it off; it just hid the reality of our situation. The truth was I had stopped dreaming. It was the easiest way to stop the negative judgments of myself without having to give up my behavior and confront my choices around money. Over the span of those 16 years, the price became too high. The pain of not living my dreams was greater than the pain of changing. In February 2007 Cheri and I began taking control of our life and our money. Over the following fifteen months, we paid off \$165,000 in debt and saved \$20,000. No, we didn't have huge incomes. We had received a \$40,000 inheritance when my parents passed away - which we didn't use to go to Hawaii. Instead, we paid off some of our debt. In addition to using the \$40,000 to pay off debt, we harnessed our \$80,000 annual income to pay off an additional \$25,000 in debt and save \$20,000. Best of all I found a passion for teaching other people how to take control of their money and life, get out of debt, and live their dreams.

Today, many people live what is known as "the uncertainty of money"; the poor class and the middle class lived under certain rules of money, and while it is regrettable to say it, it is happening today. After the uncertainty of what may happen, people are acting and living financially according to the old "study an important career, work hard to earn a good salary, save money and spend it." Not to mention that this system does not currently work; the quiet behind the facts has led the new generations to save money, people sit on a sack of money while they think they are saving it for their benefit or hoping that the situation they are living now will be stabilize, and on the other hand there are those who are "saving to spend later" without understanding that savings lose value, especially when inflation reaches and grows faster than interest paid on savings accounts. Struggling with debt? Get realistic help that's actually useful, from Liz Weston, one of the most popular and respected personal finance experts! Today, people struggling with debt have far fewer options: lenders are stingier, which makes it harder to avert disaster, or to recover from setbacks like foreclosure, short sales, or bankruptcy. (Meanwhile, people with good credit have more options than ever, including some of the lowest interest rates in decades.) You need an up-to-date guide that can help you assess options, find help, discover opportunities, and take action that works. Liz Weston's Deal with Your Debt, Updated and Revised Edition is that guide. Weston reveals why most "conventional wisdom" about debt is just dead wrong. For most people, it's simply impractical to pay off every dime of debt, and live forever debt free. In fact, doing that can leave you a lot poorer in the long run. You're more likely to give up, or pay off the wrong debts. You could leave yourself too little flexibility to survive a financial crisis. You could neglect saving for retirement. You might even wind up in bankruptcy -- just what you're trying to avoid! For most people, it's smarter to control and manage debt effectively. In this extensively updated guide, Weston shows how to do that. You'll learn which debts can actually help build wealth over time, and which are simply toxic. You'll find up-to-date, real-world strategies for assessing and paying off debt, money-saving insights on which debts to tackle first, and crucial information about everything from debt consolidation loans to credit scores and credit counseling. Weston offers practical guidelines for assessing how much debt is safe -- and compassionate, realistic guidance if you've gone beyond the safety zone. If you've ever worried about debt, you'll find the new edition of Deal with Your Debt absolutely indispensable.
