A swashbuckling tale set in the Caribbean at the time of the French Revolution, *Explosion in a Cathedral* focuses on Victor Hugues, a historical figure who led the naval assault to take back the island of Guadeloupe from the English at the beginning of the nineteenth century. In Carpentier's telling, this piratical character

walks into the lives of the wealthy orphans Esteban and Sofia and casts them abruptly into the midst of the immense changes sweeping the world outside their Havana mansion.

Master modeling and simulation using Modelica, the new powerful, highly versatile object-based modeling language Modelica, the new object-based software/hardware modeling language that is quickly gaining popularity around the

world, offers an almost universal approach to high-level computational modeling and simulation. It handles a broad range of application domains, for example mechanics, electrical systems, control, and thermodynamics, and facilitates general notation as well as powerful abstractions and efficient implementations. Using the versatile Modelica language and its associated technology, this text presents an object-oriented, component-based approach that makes it possible for readers to quickly master the basics of computer-supported equation-based object-oriented (EEO) mathematical modeling and simulation. Throughout the text, Modelica is used to illustrate the various aspects of modeling and simulation. At the same time, a number of key concepts underlying the Modelica language are explained with the use of modeling and simulation examples. This book: Examines basic concepts such as systems, models, and simulations Guides readers through the Modelica language with the aid of several step-by-step examples Introduces the Modelica class concept and its use in graphical and textual modeling Explores modeling methodology for continuous, discrete, and hybrid systems Presents an overview of the Modelica Standard Library and key Modelica model libraries Readers will find plenty of examples of models that simulated distinct application domains as well as examples that combine several domains. All the examples and exercises in the text are available via DrModelica. This electronic self-teaching program, freely available on the text's companion website, guides readers from simple, introductory examples and exercises to more advanced ones. Written by the Director of the Open Source Modelica Consortium, Introduction to Modeling and Simulation of

Technical and Physical Systems with Modelica is recommended for engineers and students interested in computer-aided design, modeling, simulation, and analysis of technical and natural systems. By building on basic concepts, the text is ideal for students who want to learn modeling, simulation, and object orientation.

Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. The Craftsman shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

Por décadas, a comunidade ufológica mundial tem afirmado que diversas missões espaciais e suas tripulações tiveram encontros

ufológicos no espaço. E como um mantra, repete-se que a NASA teria manipulado fotografias e filmagens, para esconder estes eventos, promovendo uma lei de silêncio entre os astronautas. Mas qual a verdade nisso tudo? Todas as informações que se tem hoje são verdadeiras? Todas as imagens alegadamente vazadas da Agência Espacial, tem alguma veracidade? Até que ponto este acobertamento funciona de fato? A pesquisa profunda e detalhada sobre este tema revela surpresas interessantes...

This is the first complete English translation of Geminus's Introduction to the Phenomena--one of the most important and interesting astronomical works of its type to have survived from Greek antiquity. Gracefully and charmingly written, Geminus's first-century BC textbook for beginning students of astronomy can now be read straight through with understanding and enjoyment by a wider audience than ever before. James Evans and Lennart Berggren's accurate and readable translation is accompanied by a thorough introduction and commentary that set Geminus's work in its historical, scientific, and philosophical context. This book is generously illustrated with diagrams from medieval manuscripts of Geminus's text, as well as drawings and photographs of ancient astronomical instruments. It will be of great interest to students of the history of science, to classicists, and to professional and amateur astronomers who seek to learn more about the origins of their science. Geminus provides a clear view of Greek astronomy in the period between Hipparchos and Ptolemy, treating such subjects as the zodiac, the constellations, the theory of the celestial sphere, lunar cycles, and eclipses. Most significantly, Geminus gives us the earliest detailed discussion of

Babylonian astronomy by a Greek writer, thus offering valuable insight into the cross-cultural transmission of astronomical knowledge in antiquity.

Desde el umbral se mira el horizonte; y desde México puede atisbarse a lo lejos el acontecer de otras sociedades. De esa premisa, que acepta que el mundo es ancho pero no ajeno, parte Carlos Martínez Assad para examinar los encuentros y desencuentros entre Oriente y Occidente. A partir de la crítica a la visión orientalista, que se inventó un mundo árabe más cercano de la idealización romántica que de la realidad histórica, Cruzar el umbral al Medio Oriente ofrece una mirada a una pequeña región cuyas dimensiones no corresponden con lo grande de sus aportaciones. En sus páginas se ofrece un recorrido marcado por el testimonio de los grandes viajeros, por la simbiosis entre la lengua árabe y la religión islámica, y particularmente por las representaciones de los escritores de estos países, con sus formas de concebir propuestas culturales y sus posturas respecto a la compleja situación política de hoy.

Dark, moving and original, a story of family, survival, and getting on with life... Flynn Sinclair understands pack loyalty – for years as his Alpha father's enforcer, he has done things in the name of

duty that he can't ever forget. But the vast expanse of Alaska offers him a peace he's never known. Alone, removed from pack life, he can focus on his research and try to forget his life before. But duty has a way of inviting itself in, and Flynn finds himself doing two reckless things in one week: leaving the safety of Alaska to save his brother Connor's life, and unwittingly falling in love with Evie Thompson, a woman who doesn't deserve to be drawn into his terrifying world. Connor carries news of their father's descent into madness, and it looks like neither geography nor Flynn's attempts at disengagement will put off a confrontation. Flynn had finally begun to believe that he might deserve something good in his life – something like Evie – but to move forward in the light, he must first reconcile with the dark.

Through six editions students have relied on Langman's Medical Embryology to provide succinct, yet complete coverage of human development. Now, this new edition has been significantly revised and updated to include these improvements... more clinical information integrated throughout the text; screened "clinical correlates" and clinical "problems to solve" in each chapter; more SEMs, line drawings, clinical photographs and 3-D illustrations that enhance visualization of spaces and sizes; and

expanded coverage on rotation of the midgut and new SEMs that specifically illustrate the neural crest.

From the author of *Eichmann in Jerusalem* and *The Origins of Totalitarianism*, "a book to think with through the political impasses and cultural confusions of our day" (*Harper's Magazine*) Hannah Arendt's insightful observations of the modern world, based on a profound knowledge of the past, constitute an impassioned contribution to political philosophy. In *Between Past and Future* Arendt describes the perplexing crises modern society faces as a result of the loss of meaning of the traditional key words of politics: justice, reason, responsibility, virtue, and glory. Through a series of eight exercises, she shows how we can redistill the vital essence of these concepts and use them to regain a frame of reference for the future. To participate in these exercises is to associate, in action, with one of the most original and fruitful minds of the twentieth century.

This collection of papers originates with a workshop held 24-25 September 2015 in Villa Lante al Gianicolo, Rome. The workshop brought together a number of scholars working in the fields Arabic Studies, Greek and Latin Studies, Septuaginta Studies, and Iranian Studies. The workshop concentrated on the transmission of texts and ideas across language barriers in the Eastern

Mediterranean. The main focus was on literary and historical texts, but also scientific, pseudoscientific, and religious texts were discussed. The workshop and the resulting collection of articles shows clearly that there is still much to do in the field of translation studies in the Long Late Antiquity and the Middle Ages. The various cultures around the Mediterranean have always lived in close contact with each other, and translation of texts has played a central role in the intellectual interaction of these cultures. While parts of this interaction have received scholarly attention, others have been almost neglected. The aim of this volume is to direct attention to the manifold and vivid culture of translation around the Mediterranean.

 Described as a landmark in the ethnographic study of the Maya, this study of ritual and cosmology among the contemporary Quiché Indians of highland Guatemala has now been updated to address changes that have occurred in the last decade. The Classic Mayan obsession with time has never been better known. Here, Barbara Tedlock redirects our attention to the present-day keepers of the ancient calendar. Combining anthropology with formal apprenticeship to a diviner, she refutes long-held ethnographic assumptions and opens a door to the order of the Mayan cosmos and its daily ritual. Unable to visit the region for over ten years, Tedlock returned in 1989 to find that observance of the traditional calendar and religion is stronger than ever, despite a brutal civil war. ". . . a well-written, highly readable, and deeply convincing contribution. . . ." --Michael Coe

Ripped from motherland and family, ethnically mixed to quell the potential of uprisings, and brutalized by regimes of hard labor, the heart - the spirit - of Africa did not stop beating in the New World. Rather, it survived and has re-emerged; changed by contacts with new cultures and environments, but still part of the continuum of African tradition: an African Re-Genesis. This is the first volume in its field to emphasize the interdisciplinary temporal and geographic comparative research of Archaeology, Anthropology, History and Linguistics to allow us to form unique perspectives on broader trends in the transformation and (re-) emergence of African Diaspora cultures. African Re-Genesis confirms that regardless of discipline, from continental Africa to Europe, the Western Hemisphere and Indian Ocean, all Diaspora research requires a relevance to modern communities and sensitivity to the interplay with contemporary cultural identities. Matters concerning race and cultural diversity, though ostensibly de-fused by the vocabulary of political correctness, remain contentious. Indeed, the topic of racial relations has become to the twenty-first century what sex was to the nineteenth century - something best not discussed in public, and better talked around than confronted directly. African Re-Genesis strikes at the nerve of urgency that the past, present and future globalization of African cultures, is a cornerstone of the entire human experience, and it thus deserves recognition as such.

Sempre reforçamos aqui na Projetos Escolares Ensino Fundamental a importância de resgatar, preservar e valorizar as tradições regionais. Na época das festas juninas, isso fica ainda mais evidente. Para aliar essa vontade ao cumprimento do nosso

papel na formação da consciência ecológica e da cidadania das crianças, trazemos nesta edição uma sugestão diferente para organizar a festa junina na sua escola. Em vez de “Olha a cobra! É mentira”, por que não “Olha a semente! Vamos plantar!” ou “Olha o lixo! Vamos reciclar!”? Nesse projeto especial, confira ideias para as tradicionais brincadeiras de pescaria e boca do palhaço feitas de material reciclável, além de uma divertida quadrilha ecológica. A saúde também ganha destaque nesta

edição. Nutrição equilibrada, desperdício de alimentos, escovação dos dentes e respiração são alguns dos temas abordados em dinâmicas que trabalham tais questões de forma lúdica e produtiva. A psicóloga e consultora em educação Rosely Sayão, em entrevista exclusiva, fala sobre diálogo, limite, obediência, responsabilidade e confiança, além de um tema que sempre levanta polêmicas: a sexualidade.
