SPSS adalah salah satu software yang dapat digunakan untuk mengolah data dan mudah dioperasikan. Buku ini berisi panduan pengolahan data dengan langkah-langkah yang sistematis, disertai contoh untuk setiap ujinya, lengkap dengan bagaimana cara menginterpretasikannya. Buku ini merupakan alternatif berbagai kalangan mulai dari pemula maupun yang telah mahir yang membutuhkan panduan dalam melakukan analisis data melalui paket program SPSS. Buku ini diharapkan mampu memberi bantuan terutama kepada pembeli yang sedang mengerjakan skripsi di samping dapat pula digunakan untuk menyelesaikan olah data biasa. Buku yang berisi sebelas bab ini berisi mulai dari pengenalan paket program SPSS, statistik deskriptif, statistik inferensi mengenai metode parametrik, analisis regresi dan korelasi, analisis reliabilitas, statistik non parametrik, berbagai grafik dan tabel statistik yang dilampirkan. Buku ini menunjukkan tahap demi tahap cara melakukan berbagai analisis dan uji/test mulai dari berbagai output yang digambarkan melalui tabel atau plot. Topik bahasan buku ini meliputi: Penelitian - Mengoperasikan SPSS - Statistik Deskriptif - Analisis Validitas dan Reliabilitas suatu Kuesioner - Pengujian Normalitas per Variabel - Chi-Square - Korelasi - Regresi Linear Sederhana dan Berganda - Uji Asumsi Klasik - Uji Normalitas untuk Regresi Linear - Mengatasi Masalah Asumsi Klasik - Mengatasi Data yang tidak Normal untuk Regresi Linear -

Regresi Binary Logistik - Uji Beda Parametrik dan Non Parametrik - Membuat Tabel Statistik dengan SPSS.

Organizational Strategy, Structure, and Process Cambridge University Press

Values have always been a central topic in both philosophy and the social sciences. Statements about what is good or bad, fair or unfair, legitimate or illegitimate, express clear beliefs about human existence. The fact that values differ from culture to culture and century to century opens many questions. In *The Origin of Values*, Raymond Boudon offers empirical, data-based analysis of existing theories about values, while developing his own perspective as to why people accept or reject value statements. Boudon classifies the main theories of value, including those based on firm belief, social or biological factors, and rational or utilitarian attitudes. He discusses the popular and widely influential Rational Choice Model and critiques the postmodernist approach. Boudon investigates why relativism has become so powerful and contrasts it with the naturalism represented by the work of James Q. Wilson on moral sensibility. He follows with a constructive attempt to develop a new theory, beginning with Weber's idea of non-instrumental rationality as the basis for a more complex idea of rationality. Applying Boudon's own and existing theories of value to political issues and social ideas—the end of apartheid, the death penalty, multiculturalism, communitarianism—*The Origin of Values* is a significant work. Boudon fulfills a major task of social science: explanation of collective belief. His book will be of interest to sociologists, philosophers, psychologists, and political scientists.

Dunn presents a problem-oriented, integrated, multidisciplinary synthesis of concepts and methods of public policy analysis. The text draws from political science, public administration, economics, decision analysis, and social and political theory.

Understanding Problem-based Learning Routledge

Stretch Blow Molding, Third Edition, provides the latest on the blow molding process used to produce bottles of the strength required for carbonated drinks. In this updated handbook, Ottmar Brandau introduces the technology of stretch blow molding, explores practical aspects of designing and running a production line, and looks at practical issues for quality control and troubleshooting. As an experienced engineer, manager, and consultant, Brandau's focus is on optimizing the production process, improving quality, and reducing cycle time. In this new edition, the author has thoroughly reviewed the content of the book, providing updates on new developments in stretch blow molding, including neck sizes, new equipment and processes, and the economics of the process. The book is a thoroughly practical handbook which provides engineers and managers with the toolkit to improve production and engineering aspects in their own businesses, allowing them to save money, increase output, and improve competitiveness by adopting new technologies. Provides knowledge and understanding of the latest technological and best practice developments in stretch blow molding Includes money saving, practical strategies to optimize the production process, improve quality, and reduce cycle times Provides a guide to the training of operators, as well as tactics on how to troubleshoot when products are faulty, productivity is low, or machinery is not operating as expected

Statistical Methods in Agriculture and Experimental Biology William Andrew

Like many other scientists, I have long been interested in history. I enjoy reading about the minutiae of its daily unfolding: the coinage, food, clothes, games, literature and habits which characterize a people. I am carried away by the broad sweep of its major events: the wars, famines, migrations, reforms, political swings and scientific advances which shape a society. I know that historians value autobiographical accounts as part of the basic material from which the stuff of history is distilled; this should apply no less to statistical than to political or social history. Modern statistics is a relatively young science; it was while pondering this fact sometime in 1980 that I realized that many of the pioneers of our field could still be called upon to tell their stories. If, however, biographical material about these eminent statisticians was not gathered, then one might lose the chance to gain insight into the origins of many an important statistical development. The remarkable experience of these colleagues could not be readily duplicated. Fired by these thoughts, I took it upon myself to plan the framework of this book. In it, eminent statisticians (probabilists are included under this title) would be invited to sketch their lives, explain how they had become interested in probability and statistics, give an account of their major contributions, and possibly hazard some predictions about the future of the subject.

Buku yang berjudul Data-Driven Entrepreneur: Bisnis Berdaya Saing dengan Data Science dan RapidMiner merupakan panduan penting bagi siapa pun yang ingin memanfaatkan kekuatan data dalam memajukan bisnis. Buku ini ditulis oleh seorang dosen dan pengusaha berpengalaman. Buku ini menjelaskan konsep-konsep dasar data science dan petunjuk penggunaan perangkat lunak RapidMiner untuk mengolah dan memahami data. Buku ini ditulis dengan bahasa yang mudah dipahami oleh masyarakat umum, khususnya para pebisnis dan pelaku Usaha Kecil dan Menengah (UKM), tanpa banyak berkatut di hal-hal teknis yang membingungkan. Melalui contoh-contoh aplikasi di berbagai bisnis, penulis berusaha menjembatani gap antara ilmu data science yang sering kali dianggap kompleks dengan kebutuhan praktis di lapangan. Buku ini tidak hanya memberikan teori, tetapi juga pengajaran praktis Structured Query Language (SQL) dan RapidMiner, dua alat yang penting dalam dunia data science. Pembaca akan dipandu untuk memahami pentingnya data dalam pengambilan keputusan bisnis, bagaimana mengolah data dengan SQL dan RapidMiner, serta cara menginterpretasikan hasil pengolahan data untuk kepentingan bisnis. Dilengkapi dengan kasus dan contoh yang sesuai dengan dunia bisnis, buku ini bukan hanya sebuah buku teori, tetapi merupakan panduan praktis untuk siapa pun yang ingin membuat bisnisnya lebih berdaya saing, khususnya di era digital. Melalui buku ini, kita akan belajar bahwa data bukanlah sekadar angka, tetapi kunci untuk memahami pasar dan meraih keberhasilan. Materi yang dibahas dalam buku ini mencakup: Bab 1 Memanfaatkan Data untuk Pengambilan Keputusan Bab 2 Data dan Kualitas Data Bab 3 Data dan Manajemen Data Bab 4 Structured Query Language Bab 5 Statistika_Tulang Punggung Data Science Bab 6 Mencari Wawasan dengan Data Mining Bab 7 Klasifikasi Menggunakan RapidMiner Bab 8 Regresi Linear Menggunakan RapidMiner Bab 9 Clustering dengan RapidMiner Bab 10 Prediksi Data Time-Series Bab 11 Analisis Asosiasi-Menemukan Koneksi Tersembunyi Bab 12 Text Mining dan Sentiment Analysis Bab 13 Neural Network Bab 14 Membangun Bisnis Berbasis Data

Statistical Abstract of the United States, 2000 Routledge

With its broad coverage of methodology, this comprehensive book is a useful learning and reference tool for those in applied sciences where analysis and research of time series is useful. Its plentiful examples show the operational details and purpose of a variety of univariate and multivariate time series methods. Numerous figures, tables and real-life time series data sets illustrate the models and methods useful for analyzing, modeling, and forecasting data collected sequentially in time. The text also offers a balanced treatment between theory and applications. Time Series Analysis is a thorough introduction to both time-domain and frequency-domain analyses of univariate and multivariate time series methods, with coverage of the most recently developed techniques in the field.

For courses in Performance Appraisal, Compensation Management, and Training and Development. Discover where the real success in business can be found. What makes some businesses more successful than others? The answer: people. Organizations with motivated, talented employees that offer outstanding customer service are more likely to pull ahead of the competition. Performance Management is the first text to emphasize this key competitive advantage, showing students that success in today's globalized business world can be found, not in technology and products, but in an organization's people. The third edition includes updated and current information, and features over forty new cases.

Introduction to Classical and Modern Test Theory Institute of Southeast Asian Studies

Sasaran utama pembaca buku ini adalah mahasiswa semester akhir tujuh-delapan di Fakultas Ekonomi dalam rumpun ilmu Ekonomi, Manajemen, Akuntansi dan Keuangan yang sedang mempelajari mata kuliah metode penelitian. Juga mahasiswa yang sedang menyusun tugas akhir. Buku ini sengaja disusun untuk menuntun-mengarahkan mahasiswa menulis skripsi, tesis, disertasi, sekaligus berperan 'kapal sekali berlayar' sebagai buku ajar dan referensi bagi bapak/ibu dosen pengampu mata kuliah metodologi penelitian. Buku ini memudahkan mahasiswa untuk memahami bagaimana membuat proposal, melaksanakan penelitian sampai ke membuat laporan hasil penelitian. Buku ini penting untuk dimiliki mahasiswa jurusan Ilmu Ekonomi, Manajemen dan Akuntansi. Outline penulisan buku ini disusun berdasarkan silabus mata kuliah metode penelitian di FE ditambah sedikit 'bab reform' yang dianggap penting seperti AUMA (Alat Ukur Model Analisis). Untuk memudahkan pemahaman para mahasiswa, pembahasannya disusun ke dalam beberapa bab dan subbab yang terdiri dari tujuh belas bab. Setiap bab sudah ada petunjuk pembelajarannya. Dalam proses perkuliahan sudah mengandung indikator pembelajaran; Audience; Behavior; Condition; dan Degree (ABCD). Juga terdapat soal-soal esai sebagai ajang latihan mahasiswa sebelum menghadapi ujian tengah semester (UTS) dan ujian akhir semester (UAS).

Berdasarkan pengalaman menulis selama menjadi dosen pengampu, pembimbing, konsultan, penguji mata kuliah metodologi penelitian dan merasakan keluh-kesahnya mahasiswa ketika memulai menulis skripsi, tesis dan disertasi dirasa perlu disusun buku ini. Kesulitan mahasiswa pada umumnya adalah karena mereka kurang memahami aspek metodologi penelitian, mulai dari (a) merumuskan masalah; (b) memilih obyek/subyek yang akan diteliti; (c) memilih topik teori-variabel-indikator; (d) menentukan alat ukur-model analisis AUMA; (e) memilih metode/teknik penelitian; (f) teknik mengambil sampel (teknik sampling); (g) prosedur pengumpulan data hingga sampai ke (h) pengolahan data. Secara substansial isi/fungsi sub-judul penelitian ada di bab sebelas. Memang menulis karya ilmiah itu tidak mudah. Tidak ada yang sulit, bila mahasiswa mau bekerja keras, cerdas, tekun dan tidak mudah putus asa. Di samping memiliki buku metode penelitian ini, disarankan juga anda memahami aplikasi statistik (bila penelitian kuantitatif) dan teori akuntansi, teori manajemen, teori ekonomi yang terkait dengan topik penelitian anda. Selamat belajar dan sukses.

International literacy assessments have provided ample data for ranking nations, charting growth, and casting blame. Summarizing the findings of these assessments, which afford a useful vantage from which to view world literacy as it evolves, this book examines literate behavior worldwide, in terms of both the ability of populations from a wide variety of nations to read and the practice of literate behavior in those nations. Drawing on The World's Most Literate Nations, author Jack Miller's internationally released study, emerging trends in world literacy and their relationships to political, economic, and social factors are explored. Literacy, and in particular the practice of literate behaviors, is used as a lens through which to view countries' economic development, gender equality, resource utilization, and ethnic discrimination. Above all, this book is about trajectories. It begins with historical contexts, described in terms of support for literate cultures. Based on a variety of data sources, these trends are traced to the present and then projected ahead. The literate futures of nations are discussed and how these relate to their economic and sociocultural development. This book is unique in providing a broader perspective on an intractable problem, a vantage point that offers useful insights to inform policy, and in bringing together an array of relevant data sources not typically associated with literacy status.

This multi-disciplinary volume provides a critical examination of corporate governance reform in Southeast Asia especially after the Asian financial crisis in 1997. The weaknesses in the corporate sector, such as poor investment structure, weak legal and accounting systems, faulty financial practices, and questionable political interventions, are some of the pertinent issues raised by the authors, who include legal specialists, corporate practitioners, economists, and political scientists. Policy measures to improve corporate transparency, institutional accountability, and fiscal prudence are also proposed. The volume provides interested readers and policy-makers in Southeast Asia with the most current research and policy options on corporate governance reform, and advocates more committed and effective governance changes in the future.

A thorough and definitive book that fully addresses traditional and modern-day topics of nonparametric statistics. This book presents a practical approach to nonparametric statistical analysis and provides comprehensive coverage of both established and newly developed methods. With the use of MATLAB, the authors present information on theorems and rank tests in an applied fashion, with an emphasis on modern methods in regression and curve fitting, bootstrap confidence intervals, splines, wavelets, empirical likelihood, and goodness-of-fit testing. *Nonparametric Statistics with Applications to Science and Engineering* begins with succinct coverage of basic results for order statistics, methods of categorical data analysis, nonparametric regression, and curve fitting methods. The authors then focus on nonparametric procedures that are becoming more relevant to engineering researchers and practitioners. The important fundamental materials needed to effectively learn and apply the discussed methods are also provided throughout the book. Complete with exercise sets, chapter reviews, and a related Web site that features downloadable MATLAB applications, this book is an essential textbook for graduate courses in engineering and the physical sciences and also serves as a valuable reference for researchers who seek a more comprehensive understanding of modern nonparametric statistical methods.

Penulis : Muhamad Zainuddin Penerbit : Airlangga University Press ISBN : 978-602-7924-61-1 Tahun terbit : 2014 Bahasa : Indonesia Sampul : Soft cover Ukuran : 15,8 x 23 cm Jumlah Halaman : xii, 139 hlm Metodologi Penelitian adalah kajian tentang metode bagaimana melakukan penelitian untuk mendapatkan pengetahuan ilmiah yang baru sesuai dengan kaidah-kaidah yang digunakan oleh masyarakat ilmiah. Secara garis besar ada dua macam pendekatan penelitian, yaitu: pendekatan kuantitatif dan pendekatan kualitatif. Substansi dalam buku ini menggunakan pendekatan

kuantitatif dengan penekanan pada konsep dasar deduktif-kuantitatif melalui pergerakan cara berpikir logico-hipothetico-empirico. Berdasarkan pendekatan tersebut, maka sistematika buku ini dimulai dari Bab I yang menjelaskan secara umum tentang: Pengertian Penelitian dan Peranan Penelitian dalam Pengembangan Ilmu dan Teknologi. Bab II menjelaskan tentang: Langkah-Langkah Pokok dan Pendekatan dalam Penelitian. Bab III tentang: Permasalahan Penelitian sebagai langkah awal sebuah penelitian. Bab selanjutnya merupakan pokok bahasan yang menjadi ciri utama pendekatan kuantitatif, yaitu: Bab IV tentang: Studi Kepustakaan, Kerangka Teoretis dan Hipotesis, Bab V tentang: Variabel dan Definisi Operasional. Bab VI tentang: Rancangan Penelitian, Bab VII tentang: Konsep Dasar Rancangan Eksperimental, Bab VIII tentang: Klasifikasi dan Jenis Rancangan Eksperimental, Bab IX tentang: Rancangan Penelitian Observasional, Bab X tentang: Rancangan Penelitian Survei, Bab XI tentang: Metode Sampling dan Jumlah Sampel, dan Bab XII tentang: Peranan Statistik Dalam Penelitian.

Statistika Deskriptif pada dasarnya dimaksudkan untuk memberikan pengetahuan mengenai analisis data variabel tunggal. Dalam meneliti karakteristik variabel tunggal, data (tidak berkelompok ataupun interval) biasanya direpresentasikan berdasarkan perhitungan data populasi dengan menggunakan beberapa parameter (misal: mean, median, mode, deviasi standar, skewness, dan kurtois). Untuk memberikan gambaran yang lebih jelas mengenai sifat variabel yang diteliti, data tersebut juga disajikan dalam bentuk diagram batang, lingkaran, lambang, dan garis. Selain untuk tujuan tersebut di atas, pembahasan Statistika Deskriptif dalam buku ini dimaksudkan untuk memberikan pengetahuan tentang perubahan nilai pada kurun waktu yang berbeda melalui perhitungan indeks harga dan indeks kuantitas yang sering digunakan untuk perhitungan-perhitungan ekonomi. Dalam buku ini, selain perhitungan ukuran pemusatan, penyebaran, kemencengan, keruncingan, indeks harga, indeks kuantitas, juga dibahas analisis tren (kecenderungan) dengan berbagai metode untuk memahami dasar perhitungan dalam membuat prediksi. Ukuran posisi relatif, ukuran korelasi, penaksiran (estimasi) dan teori probabilitas dibahas pada bagian terakhir buku ini sebagai persiapan dan pengetahuan dasar untuk mempelajari statistika induktif yang dipakai untuk pengujian hipotesis dalam penelitian.
