JOEL JACOBY

The Cosmic Perspective Benjamin-Cummings Publishing Company Existing textbooks on international relations treat history in a cursory fashion and perpetuate a Euro-centric perspective. This textbook pioneers a new approach by historicizing the material traditionally taught in International Relations courses, and by explicitly focusing on non-European cases, debates and issues. The volume is divided into three parts. The first part focuses on the international systems that traditionally existed in Europe, East Asia, pre-Columbian Central and South America, Africa and Polynesia. The second part discusses the ways in which these international systems were brought into

contact with each other through the agency of Mongols in Central Asia, Arabs in the Mediterranean and the Indian Ocean, Indic and Sinic societies in South East Asia, and the Europeans through their travels and colonial expansion. The concluding section concerns contemporary issues: the processes of decolonization, neo-colonialism and globalization – and their consequences on contemporary society. History of International Relations provides a unique textbook for undergraduate and graduate students of international relations, and anybody interested in international relations theory, history, and contemporary politics.

The Tso Chuan Addison-Wesley

Soon to be a major motion picture starring John Cusack! Mr. Quark is a down-on-his-luck pot-smuggler hiding out in the mountains of Colombia with his dog, High Pockets, and a small band of banditos led by the irascible Jose. Only months before, these three and their fearless associates were rolling in millions in cash and high-grade marijuana, eluding prosecution on "ridiculously false" drug and terrorism charges. But times have quickly grown lean, and to liven up their exile, Jose decides to mug a family of American tourists. Among the spoils are physics texts, which launch Mr. Quark on a side-splitting, boisterous adventure north to California, where he confronts the owner of the books with his own theories on relativity, the nature of the universe, and looking for the meaning of life in all the wrong places....

Aeschylus I contains "The Persians," translated by Seth Benardete; "The Seven Against Thebes," translated by David Grene; "The Suppliant Maidens," translated by Seth Benardete; and "Prometheus Bound," translated by David Grene. Sixty years ago, the University of Chicago Press undertook a momentous project: a new translation of the Greek tragedies that would be the ultimate resource for teachers, students, and readers. They succeeded. Under the expert management of eminent classicists David Grene and Richmond Lattimore, those translations combined accuracy, poetic immediacy, and clarity of presentation to render the surviving masterpieces of Aeschylus, Sophocles, and Euripides in an English so lively and compelling that they remain the standard translations. Today, Chicago is taking pains to ensure that our Greek tragedies remain the leading English-language versions throughout the twenty-first century. In this highly anticipated third edition, Mark Griffith and Glenn W. Most have carefully updated the translations to bring them even closer to the ancient Greek while retaining the vibrancy for which our English versions are famous. This edition also includes brand-new translations of Euripides' *Medea*, *The Children of Heracles*, *Andromache*, and *Iphigenia among the Taurians*, fragments of lost plays by Aeschylus, and the surviving portion of Sophocles's satyr-drama *The Trackers*. New introductions for each play offer essential information about its first production, plot, and reception in antiquity and beyond. In addition, each volume includes an introduction to the life and work of its tragedian, as well as notes

addressing textual uncertainties and a glossary of names and places mentioned in the plays. In addition to the new content, the volumes have been reorganized both within and between volumes to reflect the most up-to-date scholarship on the order in which the plays were originally written. The result is a set of handsome paperbacks destined to introduce new generations of readers to these foundational works of Western drama, art, and life.

"[Czerski's] quest to enhance humanity's everyday scientific literacy is timely and imperative."—*Science Storm in a Teacup* is Helen Czerski's lively, entertaining, and richly informed introduction to the world of physics. Czerski provides the tools to alter the way we see everything around us by linking ordinary objects and occurrences, like popcorn popping, coffee stains, and fridge magnets, to big ideas like climate change, the energy crisis, or innovative medical testing. She provides answers to vexing questions: How do ducks keep their feet warm when walking on ice? Why does it take so long for ketchup to come out of a bottle? Why does milk, when added to tea, look like billowing storm clouds? In an engaging voice at once warm and witty, Czerski shares her stunning breadth of knowledge to lift the veil of familiarity from the ordinary.

A History of Latin America, Volume 2 Penguin

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. We follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experience may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. Now, more than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

"The Prism of Lyra is an exploration of Human Galactic Heritage. The Prism of Lyra is a book that examines the idea of creation in a different light. In contrast to the notion that humans are the result of creation, it explores the idea that the collective humanoid consciousness (or soul) created our universe for specific purposes. What are those purposes? Who is involved? These questions and many more are addressed, resulting in startling possibilities. The Prism of Lyra then traces various off-planet races (Lyra, Vega, the Pleiades, Orion, Zeta Reticuli, and more) through their own evolution and ties them into the developing Earth. Highlighted is the realization of our galactic interconnectedness . . . and our shared desire to return home. Explore with us the passage through . . .The Prism of Lyra."
