Central banks have long used dynamic stochastic general equilibrium (DSGE) models, which are typically estimated using Bayesian techniques, to inform key policy decisions. This paper offers an empirical strategy that quantifies the information content of the data relative to that of the prior distribution. Using an off-the-shelf DSGE model applied to quarterly Euro Area data from ...

Estimating Dynamic

Macroeconomic Models : How Informative ... The algorithm applies to a broad class of models, including industry competition models with both discrete and continuous controls such as the Ericson and Pakes (1995) model. We test the algorithm on a class of dynamic discrete choice models with normally distributed errors and a class of dynamic oligopoly models similar to that of Pakes and McGuire (1994).

Estimating Dynamic Models of Imperfect Competition ... Dynamic discrete choice models have been used to understand a wide range of economic behavior. The early dynamic discrete choice models that are empirically implemented tend to be parametric; but recently, a growing list of authors have addressed the non- or semi-parametric identification of dynamic discrete choice models.

Estimating Dynamic Discrete Choice Models with Hyperbolic ... In contrast to models with continuous choices which can be estimated from the first-order conditions, the optimal decision rules for dynamic discrete choice models are characterized by inequality conditions. This has prompted researchers to (numerically) Conditional Choice

Probabilities and the Estimation of ... This paper discusses nonparametric estimation of the distribution of random coefficients in a structural model that is nonlinear in the random coefficients. We establish that the problem of recovering the probability density function (pdf) of random parameters falls into the class of convexly-constrained inverse problems. SEMIPARAMETRIC ESTIMATION OF RANDOM COEFFICIENTS IN ... Abstract We consider least absolute error estimation in a dynamic nonlinear model with neither independent nor identically distributed errors. The estimator is shown to be consistent and asymptotically normal, with asymptotic covariance matrix depending on the errors through the heights of their density functions at their medians (zero). Estimating Nonlinear Dynamic Models Using Least Absolute ... Board of Governors of the Federal Reserve System . International Finance Discussion Papers . Number 1175 . August 2016 . Estimating Dynamic Macroeconomic Models: Estimating Dynamic Macroeconomic Models: How Informative ... At the Ministry of Economy and Finance we have developed a

dynamic factor model to estimate and forecast the rate of growth of the Spanish economy in the very short term. This model uses a coincident indicator, or estimated common factor, to forecast GDP by means of a transfer function. This paper discusses nonparametric estimation of the distribution of random coefficients in a structural model that is nonlinear in the random coefficients.
